OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

Portal (OPPORTAL)			
Location/Functional Area	**Type**	**Summary**	**Details**
OP-Portal - Search	B	Search Function fails if search term includes the string "script"	The Portal search function was stripping out any string of characters that equals "script" due to security restrictions. Resolved. Portal search now allows the term "script".
OP-Portal - Login	E	Record that a User's status has been changed to "Inactive" due to incorrect password attempts	When a User's password is entered incorrectly too many times the User's status is set to "Inactive" and is noted in the User's record under the Notes sub-tab. The note in the User's record reads: {first.name} {last.name} made inactive due to too many incorrect password attempts on {date and time}. Optionally, an email is sent to designated addresses. This is established under Global Notifications.
OP-Portal	E	Search function should include skill profiles	The Portal catalog search function has been expanded to include Skill Profiles in addition to Courses and Nuggets, etc.
OP-Portal	E	Prioritize the order in which search results are displayed	To make document search results more relevant, the search now prioritizes search results in the following order: 1. Matches from the Title 2. Matches from the Description 3. Matches from the Content (body of the document)
OP-Portal - Login	E	Password hints now configurable	For customers who consider the use of password hints to be insecure, we made this is now a configurable option and the use of password hints can be turned off.
OP-Portal - Login	E	Require a captcha to be entered to view a password hint	To prevent automated systems from using the password hint functionality to compromise account security, we now require a Captcha to be entered before the password hint is displayed.
OP-Portal - Login	E	Require a Captcha to be entered to use 'Forgotten your password'	Forgotten your Password?' function now requires a Captcha to be entered before a password can be reset for added security.
OP-Portal	E	A document in Document Manager can now be launched directly from the Portal search	A User can now launch a document from the Document Manager directly from the Portal search results list, rather than just seeing the document description.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

OP-Portal	E	Users can uploda an image (avatar)	OP-Portal now allows a User to upload an image (avatar) to their My Profile area for use in gamification. The ability to allow a User to upload an image can be turned on and off in Admin/ Configuration.

Course Manager (OPCM)			
Location/Functional Area	**Type**	**Summary**	**Details**
OPCM - Admin	E	Copy a SCORM Course from one slice to another	The existing Course transfer function has been expanded to support SCORM. A SCORM Course can be copied to from one slice to another.
OPCM - User Assignments	E	Setting an Activity to 'Pending' status deletes comments and previously uploaded file	Setting an Activity to 'Pending' for a User should be the same as setting a Course to 'Not Attempted.' Completion date, comments, and associated files should be deleted and the User allowed to start / access the Activity and complete it once again. A note has been added to the Pending status in the Edit Status page to alert managers that all values will be reset.
OPCM - User Assignments	E!	Remove 'Delete Activity' function from Activity completion process	The 'Delete Activity' selection has been removed as this function can be accomplished by unassigning the activity from the User as you would with other assignment types. The 'Pending' function will allow for new Activities to be reset for Users so they can start again.
OPCM - Content - Courses	B	Multiple single file asset Course does not have proper path for mobile publishing	When a Course is made up of multiple single file swf assets and published for mobile, the created mob### published zip file did not have the proper paths to the files in the pg#_content.html files in order for the Course to be properly played on the devices. Corrected.
OPCM - Events	B	event location custom fields do not support validated responses	When creating an Event location with custom fields, the custom fields were not allowing the Admin to select from the validated list. Corrected.
OPCM - Events	E	Add Delete Event Session to audit trail	When an Event Session is deleted, it is now recorded in Admin-Audit Trail in OPCM.
OPCM - Events	E	Master Event Calendar location dropdown shows all Events associated with any locations under that region	The Master Event Calendar now allows for selection of a region or a location in the drop-down to filter the calendar. All Events associated with any locations under that drop-down heading will be included.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

OPCM - Admin	E	Course Validation uses course timer instead of page timer	The Course Validation function has been updated to function outside of an individual page. Users are prompted to enter responses from their custom field information on a timed basis from the time that they start the Course, regardless of what page they are on. This function now includes a failure configuration to 'close the window' or 'close the window and inactivate the User'. These settings are made under Administration-Configuration. These settings are made under Administration - Configuration.
OPCM - Events	E!	New Master Calendar of events	A Master Event Calendar has been added under Events & Activities - Events. The Master Event Calendar is similar to the User's view in OPCV calendar view. See additional documentation on Master Event Calendar functions. The calendar can be filtered (by Administrators) by Name, event, Location, etc. ADD LINK
OPCM - User Information	E	Associate Instructors with specific Event location(s)	Instructors can now be associated with one or more Event locations in the Instructor record. When creating Event Sessions, once a location is selected for the Session, the Instructor list will default to the Instructor(s) who have been associate with the location. This is designed to help ensure a designated instructor for that locale is selected, but the Instructor can be changed to another Instructor from any other location.
OPCM - events	E	Alert for Double booking of Event Locations	When creating a Session of an event, if the same location is used at the same time, a red message appears to the administrator to warn them of the conflict and encourage changing the location or time. Overbooking of a location is allowed.
OPCM - events	E	Link from Event Locations to Master Calendar	A new link has been added within an Event Location to open the Master Event Calendar filtered to show all Event Sessions occurring in the current month for the selected Event Location.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

OPCM - Users	E	Link from Instructor information to Master Calendar	A new link has been added within the User's Instructor information in order to open the Master Event Calendar filtered to show all Event Sessions occurring in the current month for the selected Event Instructor
OPCM - events	E	Creation of an access hours table for Event Locations	Each Event Location can have associated availability scheduled by week. This controls whether the Administrator can schedule an Event Session at that Location within that availability period. If a Session is scheduled outside the availability period, the Administrator will see an alert message.
OPCM - events	E	New event-level parameter controls whether Users can change an assigned Event Session	There are two fields at the Event level that control a User's ability to select or change assigned Sessions. The first one (Select Session) controls whether a User can select an initial Session, while the second (User Change Session) controls whether the User can change an assigned Session.
OPCM	E	Create a new Event level parameter to control whether Users can change the Session of an Event they are assigned	An Event Level configuration has been added to control the ability of a User to change the Session that they have been assigned. Using the Allow Event Session Selection allows the User to select their initial Session, while the Allow Event Session Change can be used to prevent Users from changing the Session they are assigned after initial selection.
OPCM	E	Add group/job code assignment information to the assignments tab of an object	The Assignments subtab of objects, including Course, Nugget, Assessment Set, Skill Profile, events and Activities now shows where an object is assigned.
OPCM - Content (Mobile)	E	Update file types on wizard	A display change was made to the wizards to only show the available content file types in the two columns to elimiate confusion when selecting.
OPCM - Content (Mobile)	E	New link for mobile HTML Course templates	A new link has been added to the bottom of the Wizards main page to allow customers to download the mobile html Course templates for Dreamweaver Course creation.
OPCM - Triggers	E	Recertification Trigger for Courses / Nuggets / Assessment Sets	A new Trigger has been added to the available triggers in Courses, Nuggets, and Assessment Sets to allow for the creation of a recertification notification that could be sent during a recertification process.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

OPCM - Admin	E!	Root Admins can increment language version number	Added the ability for a Root Admin to increment the version of the language file with which that the Root Admin is primarily associated. The reason for this update is to allow a mobile device to sync to the latest version of the language file in OPCM.
OPCM - events	E	New Search filters events	Quick filters for Category and Event Name have been added above the Event list for quick searching and filtering as is provided for all other object types.
OPCM - events	E	New Instructor 'send-to' option for Event Session trigger	event Instructor has been added as a 'send-to' option within the Assigned to Event Session trigger, for alerting Event Session Instructors of changes or assignments to the Event Session.
OPCM - Users	E	Limit the User reset history function to RA's and SA's	Reset User history functions will now only appear for SA and RA system roles to avoid instances where lower level Admins mistakenly reset a User's history.
OPCM - events	E	New popup to confirm Event Class Deletion	A confirmation popup has been added to ensure that an Admin meant to delete an Event Class when the Delete Class selection box has been chosen.
OPCM - Announcements	E	Announcement - add field for Display in OPCM	When an announcement is marked as "Urgent" Users see it as a pop-up as soon as they log into the Portal. These were also appearing at the bottom of the Course Manager Home page. A new selection has been added allowing Administrators to exclude OPCM from the Urgent Announcement display.
OPCM - Admin	E	Added Course Filter to 'Publish Multiple Courses' Page	The administrative function to publish multiple Courses now has an added filter capability to allowing filtering for specific Courses in order to publish multiple Courses at one time. Admin is able to select which courses to republish. Each course will be republished one at a time. The new course filter allows for all the standard filter options, making it easier to generate the desired Courses list more easily.
OPCM	E	Ability to create triggered actions for specific forums	Within a given Forum, there is a new column to create or edit a Trigger. Administrators can create triggered emails to be sent out to a User, Manager, or Other that alerts when a new post has been made to a Forum that a User is a member.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

OPCM - Users	E	Disable Activity Completion Edit Functions		In order to preserve data, Admins cannot edit a User's Activity completion comments or date. If an Admin changes a User's Status from 'Completed' to 'Pending'; this deletes all comments, completion dates and the uploaded file. This essentially sets the User back to a 'Not Attempted' state.
OPCM - Skills	E	Default to 0 as unlimited expiration period for skill profiles		Skill Profiles now allow for a default of 0 as the standard expiration for newly created skill profiles. Using 0 will indicate that the skill profile does not have an expiration date.
OPCM - Content Courses	E	Recertification of SCORM Course retains history		When a SCORM Course is recertified, SCORM progress is now historically retained (including test score and completion date) and all current table information deleted to allow the User to reattempt the Course anew.
OPCM	E!	New Meta Tag field for assignable objects		All object types should accomodate the addition of meta tag data on the Advanced tab. This meta tag data will be used in future releases to better define search functions and organize groupings of results.
OPCM - OPCV	E	New Real-Time Virus Scanning Implemented		Real-time Virus scanning has been implemented for all content upload areas in OPCM (Asset upload, Admin file management, Thumbnails, etc.) and OPCV (Activity File Upload). As files are uploaded they are now scanned by our built-in virus protection to insure that infected files are not allowed. Files that are found to be infected will be rejected at the end of the upload / scan process and the Admin or User alerted that the file did not pass the virus scan and has been deleted from the system.
OPCM - Skills	B	Skill Profile filter custom fields bug		The Skill Profile filter has had a bug corrected that was preventing the skill profile custom fields from properly filtering the list.
OPCM - Certifications	E	="User Certifications Date drop-down"		On the 'Certifications' tab of a User record in OPCM - when clicking the 'Add' link, the year drop down has been increased to allow selection of years back to 1969 to accommodate additional historical certifications.
OPCM	E	SCORM Course scores User score should reflect tbl_SCORM_progresss for non SkillSoft Courses and tbl_SCORM_test for SkillSoft Courses		The User Test Scores table has been updated to display non-SkillSoft SCORM test scores as well as properly pulling and displaying the final User score provided to the db for SkillSoft SCORM test scores.
OPCM	E	Additional test results view to show results without test score		An additional test results display option has been added for all tests that allows for the display of the full test, with correct and incorrect answers or the full test with incorrect answers. Neither of these options will display the User's score at the end of the test.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

OPCM		E	Gamification - items listed to be associated with a Game Profile should not be restricted by items assigned to group	
OPCM		E	Audit Trail - Track in Audit trail when an assignment has been unassigned from a User	
OPCM		E	Gamification - support for document download in a game	
OPCM		E	Write Event Session unassignments to the audit trail	When a User unassigns themselves from an Event Session in opcv, this unassignment is tracked in the audit trail for that User.
OPCM		E	Add OPCV configuration to allow the Course Glossary to be turned off in a Course	A configurable option has been added to the Content Viewer configuration in OPCM, that allows for the Glossary button to be turned off for a specific Customer. This can only be done for the entire slice.
OPCM		E	Mass Deletion of Users	A Command line utility has been created for our administrative purposes only that allows for the deletion of Users from test systems. Users marked for deletion using this utility are added to the delete request pool in OPCM for their respective slice.
OPCM		E	Replace User import spreadsheet template with attached updated file - update 2011	Updates to the User import spreadsheet to correct time zone format and remove unnecessary columns.
OPCM		E	add ability to select whether reg code should be emailed - yes or no to reg code creation in User's mobile profile	When generating a registration code, the administrator has the ability to uncheck the mail to option for the registration code. This allows for the creation of the registration code and then to run a registration report and send out the registration codes in an alternate manner.
OPCM		E	Add server level config to determine if Password hint should be available in OPPortal login	
OPCM		E	Edit to Course availability and republish should change access_ends period in Course_progress for all assigned Users	Changes to the availability of a Course were not reflected in the access information for Users that had been assigned to the Course prior to the change. This edit will update the access period for any User previously assigned to the Course to insure that availability changes are reflected to all assigned Users.
OPCM		E	Update User import spreadsheet - 2011 - for all servers	Above import spreadsheet update pushed to all customer servers.
OPCM		B	Multi-File asset creation process does not inlcude javascript files in the created asset	Security bug corrected to allow JavaScript files in multi file asset zip files
OPCM		B	Multi-File asset creation process does not preserve certain characters in HTML files	Security bug corrected to allow JavaScript files in multi file asset zip files

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

OPCM	B	When creating a new Session of an event, should be able to use any Instructor regardless of location assignment	The introduction of the Instructor location association was previously only allowing those Instructors associated with that location to be able to instruct.
OPCM	B	Edit of "Master" game causes the type to revert to "standard"	
OPCM	B	Edit of "master" game information unassigned the associated group from the game	
OPCM	B	Asset ID is added to content playback in URL/Link style Courses	
OPCM	B	Video Wizard is not creating the correct associations between assets and files	
OPCM	B	Answers can not be created in Test Wizard	
OPCM	B	OPCM is showing the managed_Users group when a Performance Manager is managing a individual Users	
OPCM	B	SSO from OPPortal to OPCM is no longer working	
OPCM	B	Gamification - game profiles are showing up across slices	
OPCM	B	Gamification - leaderboard is not accessible	
OPCM	B	Great Clips - OPCM forces E in "Evaluate" to be lower-case	
OPCM	B	Tests: The 'close' link located at the bottom of a Test Preview does not work.	
OPCM	B	OPCM - Assessment Set Descriptions field will not save capital letters	
OPCM	B	Completed Nugget set back to Incomplete when Update Status button clicked	Bug fixed that was causing Nuggets to revert to Incomplete when the update status button was clicked in OPCM.
OPCM	B	Wizard Updates: New User Wizard should replace those on Users page	The previous Wizards have been replaced and all wizard links now direct to the new single content wizard.
OPCM	B	Forums: Session expiration issue	
OPCM	B	Wizard Updates: New Content Wizard should replace those on Courses page	The previous Wizards have been replaced and all wizard links now direct to the new single content wizard.
OPCM	B	Wizard Updates: New Content Wizard should replace those on Nuggets page	The previous Wizards have been replaced and all wizard links now direct to the new single content wizard.
OPCM	B	Wizard Updates: New Assessment Wizard should replace those on Tests page	The previous Wizards have been replaced and all wizard links now direct to the new single content wizard.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

OPCM	B	Print of Test need to look better	
OPCM	B	event Master Calendar should only display the Event Name and time on the calendar - remove the class name	Too much information was being displayed on new master Event calendar. The class name was removed as it was unnecessary.
OPCM	B	event Synopsis 'buggered' is HTML mark-up is added.	Security enhancements prevented html markup from being used in Event Synopsis. This was corrected with a security exception.
OPCM	B	Shared Devices Groups unable to send Registration Code	Bug fixed that was preventing a Shared Device group registration code from being generated for a group.
OPCM	B	Wizard Updates: Updates to the Assessment Wizard	The previous Wizards have been replaced and all wizard links now direct to the new single content wizard.
OPCM	B	Nuggets: Availability date not displayed	The Nugget availability date was not appearing in OPCM. This bug has been corrected.
OPCM	B	Registration emails not created when using the User Import process	The User import process was not properly creating mobile registration emails when the import process was instructed to generate registration codes on import.
OPCM	B	events: event-Session-Cancelled trigger fields in notification are incorrect.	Notifications sent from the event-Session-cancelled trigger were improperly pulling the data for the substitution fields and were not changing the fields to the proper data. This has been corrected and now the proper substitution fields are being substituted with values.
OPCM	B	All Activity statuses are displayed in User activity completions	The Activity Completions page was not properly filtering to only show Activities that were pending or incomplete only. This bug has been corrected and the filtering is properly filtering out completed activities.
OPCM	B	Forums: forum_link items retained after forum is deleted	A bug existed that was not fully deleted the forum link items even if the forum itself was deleted. this caused a ghosting of the previous forum to still appear when the User went to view their assigned forums.
OPCM	B	Gamification - Game Profile indents skill profile associations weirdly	
OPCM	B	Add ability to display Course Author information in Course Catalog.	Course Authors can be assigned to a particular Course from the list of available Content Authors. Content Authors are created in the administration section of OPCM and exist outside of the User list. the Content Author function allows for creation of an outside Author with a bio and image. Once assigned to a Course or Nugget, then the author's name appears in the Author column with a link to see their bio, etc.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

OPCM		B	Skill Profiles incorrectly set to Complete	A bug was present that was incorrectly setting skill profiles to complete if the assignment had items that were set to be "assigned after" and also had a limited number of needed skills for completion.
OPCM		B	Trigger Notification Fields do not give correct data	Notifications sent from the event-Session-cancelled trigger were improperly pulling the data for the substitution fields and were not changing the fields to the proper data. This has been corrected and now the proper substitution fields are being substituted with values.
OPCM		B	Category Code in Trigger Notification Message Incorrect	Category Code in a trigger notification was incorrectly pulling the wrong data into the triggered email.
OPCM		E	Create new test_score_history table to copy test_Score data to when a test is unassigned from a User	As part of the recertification process, the User's test attempt and score information should be memorialized in the history tables when the User is recertified for an assignment that has a test associated.
OP-Common				
Location/Functional Area	**Type**		**Summary**	**Details**
opcommon		E	WebEx participation should assign and complete matching User email addresses for those Users sent back as participants	
opcommon		E	Include Mobile Registration Code Expiration Date in email message.	The Mobile Registration Code expiration date has been added a variable field in the Mobile Registration code emails sent out to Users to alert them when the current Registration code expires.
Content Viewer (OPCV)				
Location/Functional Area	**Type**		**Summary**	**Details**
opcv		E	Support for SCORM 2004 Interactions added to SCORM api	We have introduced the ability to record SCORM 2004 interactions. Interactions allow for the SCORM 2004 Course to record the question and User's given answer to test questions.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

opcv	B	In some cases, leaving a test without completing all questions resulting in an incorrectly scored	if a User exited out of a test that was set to display all questions on one page and did not require answers, then the test would be graded improperly by using the wrong number of total questions when calculating the score. The incorrect score was based on the number of questions answered instead of the total number of questions. The improper behavior was dependent on the types of questions and the test had to be exited by clicking the submit / finish test button
opcv	B	event Time zone Discrepancies when taking attendance	If the server time zone is set to Central and the Event to takes place in Eastern time zone, the Event time and status displays properly, but the Instructor can not take attendance until the appropriate Central time, i.e., attendance is delayed by 1 hour. For example, an Event setup for 9a.m. Eastern w/ closing registration 15 mins. before Event - the Instructor cannot take Attendance until 9:45a.m. Eastern (or 8:45a.m. Central). But the Event had already taken place - 8:00a.m. Central/9:00a.m. Eastern. This occurs regardless of the Instructor's time zone setup in their User record.
opcv	B	Tests: Unable to complete a Test in OPCV if Complete-Assessment triggers not in English	If a Test is setup with a Complete-Assessment trigger notification, and the language used within the notification is in a language other than English (i.e. Japanese) then an error is encountered when the trigger is parsed.
opcv	E	Update Courses tab view to reduce confusion	The Courses tab has been updated to clearly indicate that the initial view is assigned Courses. From the Courses tab, after the assigned Courses has displayed, the User can then choose to view a specific Catalog.
opcv	E	Add a Launch button to the Course Request page	After the Users requests a Course from a catalog, if approval is not required, a Launch button is displayed so the User can immediately take the Course.
opcv	E	The User can be required to take the items in a Skill Profile in the order assignments are presented	If Enforce Sequence is enabled for a Skill Profile, then the User will be not be allowed to take the assignments out of order

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

opcv	E	Change page timer to display time as "hh:mm:ss"	Change the timer display from number to seconds to a friendlier and more easily understood hh:mm:ss format.
opcv	E	Display a User friendly message when a User attempts to join a WebEx Session that has not started	When a User attempts to join a WebEx Session that has not yet been started by the host, they are taken to a page that displays a portion of the Webex join url. Although this is the default WebEx behavior, this response does contain the information that the Session has not yet started. We have added an additional parameter to the initial WebEx call to tell WebEx to use a User friendly error messages.
opcv	E	Replace Course/Assessment Set/Nugget comments with links to object specific forum	Traditional comments have been replaced with links to the appropriate forum. Forums have more functionality and allows for better administrative control.
opcv	B	Multiple Choice / Multiple Answer questions do not properly use UTF-8 encoding when saving answers	When a User answers a Multiple Choice/Multiple Answer test that has answers with UTF-8 characters, the answer is not written in UTF-8 format and then the comparison with the correct answer fails even if the User picked the correct answer.
opcv	B	When a User fails a SCORM Course the Course is marked as Incomplete instead of Failed	When a SCORM Course is marked as failed through the SCORM API the Course should be marked as failed.
opcv	B	Catalogs should allow for search within a specific category	When searching a catalog the User should be able to pick a category and limit the search to category
opcv	B	The assignment completion status does not always display correctly when retaking a Course	If a Course is retaken and the assignment completion parameter is set to "Last" AND the Course status was "Complete" prior to the retake, then, when the User finishes the Course, the status that is displayed at the end of the Course reflects the previous "Complete" status instead of the new status based on the current result. This was a display only problem, the completion status was being stored properly.
opcv	B	Courses Tab is highlighted when viewing a skill profile in the skill profile catalog	When viewing a Skill profile the "Learning Paths" tab should be highlighted instead of the "Courses" tab

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

opcv	E	Should be able to expand more than one section when viewing "My Status"	When viewing "My Status" the User should be able to expand and view multiple sections instead of limiting the User to viewing one at a time.
opcv	B	OPCV - Finish Message not updating Status properly.	When completing a Course in the 4.5 Build, the final finish page of the Course was not properly updating to reflect the User's correct status. This has been corrected and the User's accurate status is displayed on the Finish page of the Course.
opcv	B	Change default activity completion date to date marked complete	When a User updates the status of an Activity to Completed, but does not enter a Completion Date (i.e., leaves the date blank), the system used the date the activity was assigned. The functionality has been changed: when the Completion Date is left blank, the current date is used as teh Completed date.

Document Manager (OPDOC)

Location/Functional Area	Type	Summary	Details
OPDOC	E	Support wider menu tabs	Raise the maximum width of menu tabs from 125 to 200.
OPDOC	E	New Group Read/Write Permission Inheritances should apply to Created Documents as well.	Inherited permissions now apply to uploaded documents, documents created using the WYSIWYG editor, referencing documents and bulk imports.
OPDOC	E	Performance Manger nodes should restrict Read/Writes	In an node that is marked for inherited Performance Manager view, a Performance Manager should only see those documents that they have uploaded or docs that were uploaded by a DA, SA, RA to that node.
OPDOC	E	Change how PDF documents are stored for searching	When a PDF is loaded into the system the following information should be indexed for searching: meta tags, author, title, subject, keywords, creator and the first two pages of text.
OPDOC	E	Performance Manager nodes should organize documents by manager name	When Performance Manager Nodes are used, the documents in the node are now grouped and listed by the uploading manager. This display will be used for anyone who has 'read' access to documents uploaded by more than one Performance Manger.
OPDOC	B	OPDOC: Mongo DB connection error	Internal error. service was not running
OPDOC	B	Some large files do not appear after upload	Some very large files are not added to Document Manager after upload.

OnPoint Release 4.5

March 2012 Release Notes - Web

E!=Key Enhancement/Update

E=Enhancement

B=Bug Fix

OPDOC	B	Uploading a new version of an item with a different file extension does not update the document type.	If a new version of a document was uploaded for a document, but the new version had a different file extension, the new file was not replacing the old file as the document. This was corrected and deployed to the customers that needed this correction.

eCommerce (OPEC)			
Location/Functional Area	**Type**	**Summary**	**Details**
OPEC	B	event Session Descriptions Inaccurate	When viewing the events by Date or By Name, Event information such as Duration or Instructor were not correct unless that Event had only one Session or the Event that appeared in the list had its first Session on the given date.
OPEC	E	Make the sending of registration email a configurable option.	The configuration is needed at the CellCast package level. The option would allow us to select the type of registration code to use for each CellCast package. This config would allow us to select that this particular CellCast package should generate: none, code or sso mobile registration codes. If code or sso is selected, then the registration email should not be sent, instead, only the registration code email from OPLS should be created and sent to the User. We need to be able to accommodate the two different types of registration codes, "code" and "sso" from within each CellCast Package. This package generates and sends only one email for SSO reg codes and this reg package
OPEC	E	Make failed Credit Card transaction messages part of language file	Added a language phrase that can be used to display a friendly error message when a transaction fails. The phrase can be customized for each customer, but there can only be one message for all failures.

OnPoint Release 4.5

March 2012 Release Notes - Web

E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

Location/Functional Area	Type	Summary	Details
OPEC	E	Physical items should support all assignment functions displayed	When creating a physical item for sale in OPEC, the assignment page items are all now supported. If a physical item is purchased, all group, Course, Assessment Set, Nugget assignments that may be associated with the item should be triggered by the purchase
OPEC	E	Additional configuration to allow for defining the upper limit of the quantity selector	Added an additional config to allow for the expansion of the upper limit of the quantity selector for physical items. The configuration should allow the administrator to define the scroll limit instead of defaulting to 100.
OPEC	E	Add configuration parameter to control whether purchases of multiples of one item are allowed	We need to be able to turn on or off the ability to purchase more than one of a single electronic item at a time. Currently this is turned off for non-physical items, but needs to be a config parameter so that if a customer does want to manage this themselves they can.
OPEC	B	Permit a certification ID to be required, but not stored.	If the configuration for a customer is set to require a certification id, but NOT store it in custom 9, then the customer should be able to use custom 9 for a different purpose.
OPEC	B	Agency Fee should accept decimal values	If a value is entered in the Agency Fee ($) field on the 'OnPoint e-Commerce Credit Processing Configuration (ePay Payment Service)' page that is not a whole number, then the message "The agency fee must be a valid number" is displayed. This field now supports a decimal value, e.g., 25.55.
OPEC	B	Managed Password option is not available for mobile Users after User creates an account through self-registration	For Users who create their accounts through the self-registration process, there is no managed passwords option if you need to create a new mobile registration code using Content Manager.

Performance Manager (OPPM)			
Location/Functional Area	**Type**	**Summary**	**Details**

OnPoint Release 4.5

March 2012 Release Notes - Web

E!=Key Enhancement/Update

E=Enhancement

B=Bug Fix

OPPM - User Details	E	On User Details page, show all managed Users regardless of system role	The User Details list only showed Users managed by the manager logged in. The page now shows all system roles that are managed by the specific Performance Manager.
OPPM - Activities	E	Activity completion - should allow Performance Managers to add new comments, but should not allow editing of existing User comments	Activities marked as 'Participated' by the User allowed the Performance Manager to edit User comments. Now the User's comments are visible but not editable and the Performance Manager can provide a new comment.
OPPM	E	Remove password hint from OPPM login	Password Hints and Find Password functionality is now only available from Portal login pages, so that security surrounding access is controlled.
OPPM	E!	New Mentoring functionality	When Users are assigned a mentor, they are added to a virtual "Mentor Group". This enables the Performance Manager to manage the User in the same way they manage all other Users.
OPPM	E!	New Activity Completion file upload review and approval	If an Activity includes a file upload, that uploaded file is accessible For the Performance Manager to review as part of marking a User complete for an Activity.
OPPM	E	Uploaded Activity file link	When a Performance Manager views a User's Assignment Status, Activities that have files uploaded with them will display the filename and a link to download the file.
OPPM	E	Reports grouped by type	The OPPM Reports tab now organizes reports by type
OPPM	E!	Add Mobile Registration code creation link to User's mobile profile on User Details page	Create a mobile registration code for a User they manage.
OPPM	B	Language issue for different logins on the same computer	Corrected an issue when Performance Managers using the same computer but with different language settings saw a mixture of languages.
OPPM	B	Japanese graphics display issue	Graphics do not have access to the proper font correctly display Japanese characters
OPPM	B	User information with a single quote (') issue	Corrected an issue where creating a new User including a single quote caused record save issue.

Reports

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

Location/Functional Area	Type	Summary	Details
All	E	All Reports should track individual runs in the report table in opdb	All reports should increment the hit column for the report whenever they are run through OPPM or OPCM.
All	B	ESS Completion Export Report is not working properly	ESS's custom Completion Export Report has an issue with the XLS exporter. It is currently adding only the report title, customer and date.
All	B	New reports (Elmo) not working with older versions of IE	New reporting system called the report submission JavaScript method in a way that IE 7 did not support
All	B	Unicode values break Elmo heading parser	Reporting code updated to handle UTF-8 characters in the header
Assessments	E	Create Multiple Selection version of "Test Scores by Assessment Set by Group" report	Create a new version of the "Test Scores by Assessment Set by Group" report that allows multiple Assessment Sets to be selected on the filter page.
Assessments	E	Change [Test Scores by Multiple Assessment Set by Group] to only show one entry per User based on best score.	Please adjust this report to show only 1 entry per User. This entry will be based on the User's best score. Make sure that you factor in when the test was taken, as it's important that the entry be correct if a date range is specified.
Assessments	E	Update format of Test Scores by Group report	Updates Test Scores by Group report include: Changes to the viewable results and all exported results to replace the current version of the report. The test name and ID are moved from a separate row to columns within the report results. User login is removed from the immediate results, but still an option in the "Results display options" (it would just not be checked by default). The following columns are sortable: User id, User Name, Test id, Test Name,

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

Assessments	E	Update sorting on Test Scores by Assessment Set by Group report	The following columns are now sortable on the Test Scores by Assessment Set by Group report: User id Name Login all User extra fields all Membership fields all Custom fields
Assessments	B	Optimize Feedback Statistics report to run in Elmo	Convert report to the new reporting engine (Elmo)
Assessments	B	Feedback Statistics - Internal Error	Deploy updated (Elmo) version of the report
Assessments	B	Reports - Test Answer Analysis for all Questions with historical results	This report was producing incorrect results and sometimes crashing on customer server due to bad records in the database.
Assessments	B	Test Answer Analysis for All Questions: Complete response to essay questions not displayed	MySQL configuration changed to allow longer text fields to be used in queries having a GROUP CONCAT statement
Assessments	B	Test Answer Analysis for All Questions with historical results -- Test Data Displayed is incorrectly being shown multiple times	The test versions for each attempt are being duplicated for each test date in the report. This is resulting in additional data when the report is run. Each grouping contained the same data, other than the test date.
Content	E	New report: ESS Custom Proctored Exam Report	Create a Proctored Exam Report that is based on the existing Course Progress report
Content	E	Teknion Course Completions - add organization as an option in the results display options	In the Teknion Course Completions report, add Organization as an option to display in the results. This option should be checked by default.
Content	E	New custom report based on Teknion Course Completion report	The results should be similar to the existing Teknion Course Completions, but limiting the number of Courses that are referenced. Limit the Course completions based on Course.custom10. Custom 10 will contain the value that distinguishes the order that the specified Course should fall in the results. Only Courses that have a numeric value in this field should appear in the report results. The 16 Courses will have values 1-16 in this custom field. The Course with custom10 = 1 would be the first Course results column in the report results.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

Content	E	Teknion Degree Completions - add incomplete status to completion status filter	In the filter for the Teknion Degree Completions report - add in Incomplete as an option to the filter. This would show all Users in the specified group(s) that have NOT completed the skill profiles in the results.
Content	E	New report: SkillSoft SCORM Test Scores by group	New standard report that provides the SkillSoft SCORM test scores for all Users in a group.
Content	E	Teknion Degree Completions - remove first four header columns and other heading changes	The customer has requested that the first four extra header rows be removed and replaced with new headers. Doctorate 16 Courses - Remove title, but leave row Masters - Remove title, but leave row Masters - Remove title, but leave row Masters - Remove title, but leave row Bachelor Cor Products 9 Courses - Rename to Bachelor Core Products Masters - Systems should start at column 10 after the User data. Next heading should be named - Masters - Ancillary Products - should start at column 13 after the User data Masters Architecture should start at column 17 after the User data Add a new heading at column 19 after the User data - "Bachelor of Operations"
Content	E	New report: SCORM Test Scores by group (duplicate of 4407?)	New standard report that provides the SCORM test scores for all Users in a group.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

Content	E	Custom Report Request from Community Bank	Detailed request from Artimus Mallory at Community Bank for a custom report. --Name-- Standard Compliance Report for Specific Course --Title-- Standard Compliance Report for Specific Course --Description-- Course progress report for regular compliance reporting. Includes profile creation date and the date that the Course was assigned to the associate. --Columns-- User id, Name, Login, Title, Role, User Status, Profile Creation Date, Primary Group, Country (Table: tbl_User Field: custom1), Department/Banking Center (Table: tbl_User Field: custom2), Manager (Table: tbl_User Field: custom3), Assigned Date, Completed Date, Status --Filter Options-- Course, Group, Completion Status, User Status, User Role, Start Date, End Date, Results Display Options
Content	B	Export to Excel/PDF does not work	For the report under Content -> Reports 357 Sta-home User Transcript Report The report runs, but when exported the report is empty.
Content	B	Course Compliance Yearly allow non-compliance reports to be selected	The Course Compliance Yearly report is allowing Courses to be selected that have a compliance duration of 0. The report was designed to only return results for reports that have set compliance duration (i.e. 365 days).
Content	B	Unable to specify Completion Status for Nugget Progress for Specific Group	If the Nugget Progress for Specific Group report is run with a Completion Status that is not '- All -' , then the report does not complete properly.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

Content	B	Unable to run Nugget Time Analysis on a customer server	This only appears to be occurring on one server. When attempting to run the '*Nugget Time Analysis' report in OPCM the an exception is thrown.
events	E	New report: Event Assignments by Job Code	Name: Event Assignments by Job Code Description: List of Users and the events they are assigned to, filtered by group and job code. Reports on Session attendance within the date range. filters: Group Job Code event type Approved Attended User Status Start Date End Date Results Display Options This report will be based entirely on the Event Assignments by Group report with the added filter of Job Code. Only the Group filter should be mandatory. The report should be able to report on a specific group and job code at the same time.
events	E	ESS Proctored Exam Progress Report should include User first / last name as columns after the exam completed column	The report is configured with the User's first / last name as a row above the results. This is not appropriate for exporting and does not provide what was requested for the report. The User first and last name should be columns after exam completed in line with the rest of the data. If there are multiple entries for a User, then their name will appear multiple times.

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

events	E	Update ESS Proctored Exam Progress Report	The data is correct, we just need to change slightly what is displayed for the User with slightly different titles and dates from the test_score table instead of Course table. The connection between the Event and the Course is still relevant. Test Date column = change this column to display the test_score.test_date for the tests assigned to the Course referenced in the event. Exam column = Change this to display the test.test_name of the assessment assigned to the Course referenced in the Event custom field. Address2 = Remove this column Current Job title = Add this column from tbl_User.User_title before Organization Office Phone = Add this column from tbl_User.phone2_number before Email column. Exam Score = Only show a score for test.test_type = Test. If the test_type = Feedback do not show a score. Course Status = Rename to Exam Status and Change this to display the test status as it is in test_score.sco_status_code. Don't display the code, make sure to interpret it.
events	B	Nugget Progress by Group: Results not returned if Test not assigned to Nugget	If a Nugget does not have a Test assigned to it the Nugget Progress by Group report does not return any results.
Skills	B	Customization of Skill Profile Detail report	Meridian requests the following changes to the Skill Profile Detail report: 1) Add 'All' option to Skill Profile filter 2) Remove 'All' option from Groups filter

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

Skills	B	Custom Skill Profile Detail report for Medtronic with filtered skill profile lists	Medtronic requested a customized version of the Skill Profile Detail Report. Please mark the title of this custom report as: MDP Skill Profile Detail Report the only change would be in the Skill Profile list on the filter page. The list of skill profiles should be filtered by skill profiles that have the following phrase in custom 1: skillprofile.custom1 = "MDP Program" Only skill profiles with this in their custom 1 field should appear in the filter drop down and then all results should only be for these same skill profiles in the results and export of the report.
Skills	B	Report - MDP Skill Profile Detail - Enhancements	Enhancement Requests for "MDP Skill Profile Detail". Please add left-most column with name of Skill Profile, so that results under each User is easier to parse as what Skills pertain to which Skill Profile. Currently there is little way to tell what Skills relate to which Profiles if a report is run against multiple Skill Profiles.
Skills	B	A10. Payroll Report Error	When trying to run the A10. Payroll Report (under Skills->Reports), an error is encountered. This is regardless of filter settings.
Skills	B	Assignment Progress Time Analysis report fails on customer server	The report fails with a 500 error on a single customer server
Users & Groups	E	Add User status filter to Group List report	Add a User status filter to the filters on the Group List report to filter the number of group members by: All, Active, Inactive, Request Delete. Default to All

OnPoint Release 4.5

E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

Users & Groups	E	New Mobile Registration Code report	Title: Mobile Registration Codes by group Description: This report provides a list of all active mobile registration codes for Users in a specific group. The report allows for retrieving the current active registration codes that expire within a certain timeframe. filters: Group: with all option User status: defaults to active with all option User system roles: checkboxes date range: results display options: This report will replace the existing report as we cannot allow access across
Users & Groups	B	Inactive Users report - not logged in after date does not work to limit results	When running the Inactive Users report, there is a "not logged in after" date that reverts to the wrong year once the report is run and does not properly filter the report results based on the User's last login date.
Users & Groups	B	User Course Status by Group is not properly filtering by completion status	If the User Course status by group report is run for a specific completion status, the results would not be properly filtered by that completion status.
Users & Groups	E	New User Assignment Status by Group report	Report is based on the User Course Status by Group Report and lists Users and their assignment progress. The Completion status of each Course, Nugget, Assessment Set, activity, and Event that is assigned to the User are displayed in the results.

opcommon	B	Remove extra <msg> in response message in all opcommon rest calls	

New Modules			
Location/Functional Area	**Type**	**Summary**	**Details**
Gamification	E!	New Gamification Module Available	
	E	Gamification: At object level change 'Skills' tab to 'Skills and Games'	
	E	Gamification: Game Profiles	
		Gamification - the game profile information page should list all items associated with the game	
OPCM - Activities	E	Activity Completion now includes uploaded file links	Add to the OPPM list as well
		Customer Level config to determine if Activity upload is allowed	
OPCM - Mentoring	E!	New Mentor functionality for Performance Managers	
OPCM	E!	Tie Instructors with Event Locations at the Location level	Administrators can now associate Users who are also Instructors with one or multiple Event Locations. This is done under the Instructor's User Record. Then, when an Admin is creating a Session of an Event and selects a Location, the Instructor drop-down will sort by Instructors associated with that location first; other Instructors will be listed below.
OPCM	E	Allow for the removal / deletion of Instructor photo	An Admin can now delete an Instructor photo from the Instructor's User Record.
OPCM	E	Event Master Calendar - add print option to Event Master Calendar	Admin can now print from the Master Calendar view in Course Manager.
OPCM	E	Event Master Calendar - Event Session times displayed in standard time format with pm / am demarcation	

OnPoint Release 4.5

March 2012 Release Notes - Web
E!=Key Enhancement/Update
E=Enhancement
B=Bug Fix

OPCM	E	Event Master Calendar - allow for display of events in alternate timezones	New time zone filter on the Event Master Calendar allows an Admin to change the time zone to view the calendar from a different time zone. The default time zone is the default time zone (typically Central Time).
OPCM	E	Event Session should utilize associated Event location time zone as Session time zone	When an Admin creates a Session and selects a location with a specific time zone (e.g., Pacific Time), the Session time zone will change to the associated Location time zone. This can be changed at the Session level if required.
