OnPoint Release 8.2 Enhancements - October 2021						
Release Notes - Web Version				**Enhancement** = improvement to an existing system feature		

Course Manager (OPCM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-6551, CORE-6552	-	-	No	Enhancement	OnPoint team members may now import/export language phrases	Support has been added for OnPoint team members to import and export the language phrases for a slice. This function is limited to OnPoint personnel due to the sensitive nature of the process and the opportunity for missing language phrases if incorrectly used. This function will only be utilized in conjunction with a customer request, typically to migrate custom phrases between slices of the same customer.	8.2
CORE-6411, CORE-6412, CORE-6413	OPCM/OPPM > Users &Groups > Users & Managers/User Details	OPCM > Administration > Audit Trail	Yes	Enhancement	Add methods to track user role/status changes in audit trail	For additional tracking and future reference, changes to user roles or statuses from OPCM or OPPM are now recorded in the audit trail.	8.2
CORE-6592	OPCM > Users & Groups > Groups > Select a Group > Parameter	Mobile CellCast Apps	No	Enhancement	MDM builds of mobile CellCast apps may now utilize alternate icons	For customers with MDM builds of the CellCast mobile app, support has been added for replacing the app icon with a customized icon for a group of users. If one or more alternate icons have been bundled in with the MDM build, group parameters may be used to have the alternate icons appear for specific groups of users. For more information please speak to your OnPoint Engagement Manager.	8.2
CORE-6218	-	OPCM > Users & Groups > Groups > Select a Dynamic Membership Group > Dynamic Membership	Yes	Enhancement	Group membership added as Dynamic Membership rule	Support has been added for including group memberships as a part of Dynamic Membership rules, allowing users to be added or removed from a Dynamic Membership group based on their membership in other specified groups.	8.2
CORE-6526, CORE-6527, CORE-6528, CORE-6529	OPCM > Events & Activities > Activities > Select an Activity > Prerequisites	Various > Activities	Yes	Enhancement	Activities now support prerequisite objects	Similar to courses and nuggets, Activities can now be set with prerequisite objects which must be completed prior to accessing the activity.	8.2
EPICS-177	OPCM > Skills & Games > Skill Profiles/Curriculums/Game Profiles > Progress Boards > Custom Templates	Various > Gameboard and Progress Board List and Selection Views	Yes	Enhancement	New Board Designer tool for customizing Gameboards and Progress Boards	To allow administrators to make alterations and adjustments to Gameboards and Progress Boards, a "Board Designer" is now available in OPCM. Administrators can use this tool to change the background images, colors, and, in a future release, waypoint locations on board templates or boards already assigned to games, skill profiles, and curriculums. The boards which support this feature are identified with a "Configurable" label in the Gameboard and Progress Board list views. While the standard set of boards may not be altered, a "Create Copy" option allows administrators to create a customized clone of their desired board which may then be modified with the designer tool.	8.2
CORE-6407, CORE-6408, CORE-6409, CORE-6410	OPCM > Administration > Configuration > Customer > General > Audit Trail Retention Period	OPCM > Administration > Audit Trail	Yes	Enhancement	Audit Trail entries older than six months now automatically archived	To prevent the audit trail from becoming excessively large and slow to query, entries sent more than a configurable number of days ago are now automatically archived and removed from the list. By default this period is 180 days, but this can be changed via the "Audit Trail Retention Period" customer configuration. Archived audit trail entries are stored in a new table accessible to OnPoint personnel should reporting be required.	8.2
CORE-6517, CORE-6518, CORE-6519, CORE-6520, CORE-6521, CORE-6531	OPCM > Administration > Configuration > Customer > General > Generated Login Format	OPCM / OPPM > Create a New User	Yes	Enhancement	Support for generating login IDs for new users	Support has been added for optionally generating login IDs from a configurable template for new users in OPCM and OPPM. These logins can be configured to include the users' names, initials, OPLS IDs, email addresses, and/or last 4 digits of their phone numbers. Login IDs may still be entered as normal, but if the "Generate on Save" checkbox is selected for a new user an appropriate login ID will be generated upon user creation. The same process can be incorporated into user imports to automatically generate login IDs for imported users. This does not apply to customers utilizing SSO for access.	8.2
CORE-3009, CORE-6896, CORE-6902	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	Yes	Enhancement	Analytics dashboards can now filter based on group classifications	Recommended for customers with a large number of groups, if one or more group classifications have been defined analytics dashboards may now be set to filter by and display users who are members of groups within a selected classification. The overall effect is the same as if the groups were selected individually.	8.2
CORE-6854, CORE-6855	OPCM > Administration > Configurations > Dashboards	Various > Analytics Dashboards	Yes	Enhancement	New "Assessment - Confidence" widget	A new "Assessment - Confidence" widget is now available for including data on user answer confidence in analytics dashboards. This widget may be used to compare user scores against their confidence in their responses, providing a more in-depth look at user understanding of their assigned learning.	8.2
EPICS-170	OPCM > Administration > Configuration > Proxy Management	OPPM > All	Yes	Enhancement	Support for setting managers to temporarily "proxy" for other managers	"Proxy Managers" may now be set to temporarily cover for other managers (GM or RM roles). When a proxy is established, the "proxying" manager gains temporary management rights over the groups, job codes, org units managed by the "proxied" manager until the proxy is ended. Both managers can continue to access OPPM in the same manner, the only difference being that the "proxying" manager now also sees the members of the temporarily managed groups, job codes, and org units as well as their normal users. To facilitate this feature, a new dropdown option has been added in OPCM under which administrators can create new proxies, view/end existing proxies, and review past proxies. Only administrators may create/end proxies; managers may not do this themselves.	8.2
EPICS-182	OPCM > Administration > Thumbnails, Badges & Images > Select Badge	OPCM > Various > Badge Assignment	Yes	Enhancement	Badge views now include "Badge Origin" fields and filters	The views of badges through OPCM have been updated to include if each badge is Standard (downloaded from the central server via the Image Packages view), Customer (uploaded manually in OPCM), or Unknown (pre-dating the 8.2 update, treated as Customer badges). This distinction and the associated filters allow administrators to more easily locate their desired badges for objects and games without having to look through the full list of available badges each time. This only affects OPLS-created and managed badges; integrations with systems such as Badgr are not included in this functionality.	8.2
CORE-6549	-	OPCM > Administration > Import/Export > Import Data > Import Users	Yes	Enhancement	"Active Record" option added to OPCM user import	The user import function in OPCM now includes an option to import users as Active Records instead of Active Users, and to send out activation emails to each user to facilitate their initial login. This is only available for the spreadsheet user import in OPCM; automated imports remain unaffected. This is a requirement for the bulk user activation process.	8.2
CORE-6394	-	OPCM > Administration > Import / Export > Export Data > SCORM/xAPI Export	Yes	Enhancement	Support for exporting SCORM/xAPI packages from OPCM	Support has been added for exporting the zip packages for SCORM/xAPI courses from the OPLS. Previously these were available by contacting the OnPoint support team, but administrators may now utilize the "SCORM/xAPI Export" option to export and download the packages themselves.	8.2

OPCommon (OPCommon)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
EPICS-167	Various	Various	No	Enhancement	Additional support for Degreed integration	Additional support has been added for integrating with the Degreed platform. For more information please speak to your OnPoint Engagement Manager.	8.2
