

OnPoint Release 8.2							
Release Notes - Web Version				Enhancement = improvement to an existing system feature New Feature = new capability in the system Update = Improved Functionality			
Course Manager (OPCM)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-6551, CORE-6552	-	-	No	Enhancement	OnPoint team members may now import/export language phrases	Support has been added for OnPoint team members to import and export the language phrases for a slice. This function is limited to OnPoint personnel due to the sensitive nature of the process and the opportunity for missing language phrases if incorrectly used. This function will only be utilized in conjunction with a customer request, typically to migrate custom phrases between slices of the same customer.	8.2
CORE-6555	OPCM > Various	OPCM > Events & Activities > Event Session Wizard	Yes	Update	Event Session Wizard now populated with additional default values	When creating sessions via the Event Session Wizard, the Pre-Join Time (customer), Post-Join Time (customer), and Max Registrations (class) configurations will be used to auto-populate the associated fields within the wizard. Previously when creating sessions manually in the system these pre/post and max registrations fields were auto-populated based on the configurations.	8.2
CORE-6588	-	OPCM > Various Object Lists > Advanced Filters	Yes	Update	Object filters added for "In Magento Catalog"	The Advanced Filter view for all object types now includes an "In Magento Catalog" filter to allow admins to easily locate which objects have been made available via Magento.	8.2
CORE-6411, CORE-6412, CORE-6413	OPCM/OPPM > Users & Groups > Users & Managers/User Details	OPCM > Administration > Audit Trail	Yes	Enhancement	Add methods to track user role/status changes in audit trail	For additional tracking and future reference, changes to user roles or statuses from OPCM or OPPM are now recorded in the audit trail.	8.2
CORE-6545, CORE-6546, CORE-6547	-	OPCM/OPPM > Users & Groups > Users & Managers/User Details > Select User > User Extra/Options > Evaluate Dynamic Memberships	Yes	Update	Added support for running all Dynamic Membership rules for a single user	An update action is now available in OPCM and OPPM for processing all Dynamic Membership processing rules for a single user. This allows new users to be assigned to the appropriate groups based on the rules that have been established rather than waiting on the scheduled process.	8.2
CORE-6894	OPCM > Users & Groups > Users & Managers > Select a Manager > Management	OPPM > All	Yes	Update	All administrator roles without any group / job code restrictions now see all users	Previously if administrators below Site Admins did not manage any groups or job codes, they did not see any users in OPPM. Their behavior now matches that for managers, who without any group or job code management restrictions see all users on a slice.	8.2
CORE-2656, CORE-2657	-	OPCM/OPPM > Users & Groups > Users & Managers/User List > Select a Manager	Yes	Update	Management tabs now only shown for users with role lower than self	When logged in to OPCM or OPPM, the Management tab now only appears for administrators and managers with a role "lower" than the logged in administrator or manager. For instance, a Content Administrator will be able to see the Management tab for a Group Manager, but not a Site Administrator, even if that SA was a member of a managed group.	8.2
CORE-6217, CORE-6219, CORE-6539, CORE-6540, CORE-6672	OPCM > Users & Groups > Users & Managers > Select User > Information	OPCM / OPPM > User Record	Yes	Update	User "Hire Date" added as a standard field	A optional "Hire Date" has been added as a standard user field in OPCM and OPPM and their user wizards. This field can be used to track the date a user was initially hired, information that was typically included in one of the user custom fields by way of a data import. Existing imports that track hire dates may need to be updated to utilize this field.	8.2
CORE-2452	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Activities	Yes	Update	Update to Activity Status page for consistency with other objects	For improved consistency, the Activity Status page for users in OPCM has received several updates to look more similar to the status pages for the other object types. All information and functions on the page remain unaffected.	8.2
CORE-6371, CORE-6372	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments	No	Update	Resetting a user's history now clears earned certificates	Resetting a user's history was previously retaining data on earned certificates. This data is now also removed when resetting a user's history.	8.2
CORE-6575	-	OPCM > Users & Groups > Users & Managers > Select a User > Games	Yes	Update	"Date Assigned" column added to user Games tab	The view of a user's Games now includes the date the user was added to each game via their group assignments for additional context.	8.2
CORE-6592	OPCM > Users & Groups > Groups > Select a Group > Parameter	Mobile CellCast Apps	No	Enhancement	MDM builds of mobile CellCast apps may now utilize alternate icons	For customers with MDM builds of the CellCast mobile app, support has been added for replacing the app icon with a customized icon for a group of users. If one or more alternate icons have been bundled in with the MDM build, group parameters may be used to have the alternate icons appear for specific groups of users. For more information please speak to your OnPoint Engagement Manager.	8.2
CORE-6218	-	OPCM > Users & Groups > Groups > Select a Dynamic Membership Group > Dynamic Membership	Yes	Enhancement	Group membership added as a part of Dynamic Membership rule	Support has been added for including group memberships as a part of Dynamic Membership rules, allowing users to be added or removed from a Dynamic Membership group based on their membership in other specified groups.	8.2
CORE-6564, CORE-6565	-	OPCM > Users & Groups > Groups > Select a Dynamic Membership Group > Dynamic Membership	Yes	Update	Updated Dynamic Membership Help text to explain "OR" rules	Additional Help text has been added to the group Dynamic Membership view to help administrators understand and utilize the "OR" rule interactions.	8.2
CORE-2725	-	OPCM > Content > Courses > Assets > Select an Asset > Assignments	Yes	Update	"Assigned to Questions" section added to the Asset View page in OPCM	The Asset Information page in OPCM now includes a section for "Assigned to Questions", displaying a list of test questions (if any) to which the asset is assigned.	8.2
CORE-6598	-	OPCM > Content > Nuggets > Select a Nugget > Re-Publish	Yes	Update	Existing publish settings now default to allow multiple restarts	When republishing a nugget in OPCM, the original publish settings are retained and displayed unless changed. Previously the display of the republish form was reverting to the default publish settings.	8.2
CORE-6833	-	OPCM > Content > Nuggets > Select a Nugget > Prerequisites	Yes	Update	Nugget prerequisite view updated to match other object types	The formatting of the Nugget Prerequisite filter bar has been adjusted to match the filter bar for other object types. This is a display change only; no functionality has been affected.	8.2
CORE-6887, CORE-6895, CORE-6897	-	OPCM > Assessments > Tests > Select a Test with Answer Confidence	Yes	Update	"Partial" added for tests with confidence enabled for some questions	To facilitate reporting and analytics and to make clear which tests prompt users for their answer confidence, tests with confidence turned off but with at least one question with confidence enabled now display "Partial" for the answer confidence field. This does not affect any user views and is there to assist administrators in keeping track of which tests utilize confidence.	8.2
CORE-6892	OPCM > Assessments > Tests > Select a Feedback Type Test > Information	Various > Assessments	Yes	Update	Feedback type assessments now default to allow multiple restarts	As users typically exit and re-enter feedback-type assessments multiple times before submitting, the number of restarts for such assessments now defaults to 99.	8.2
CORE-6589	-	OPCM > Assessments > Tests > Questions > Add Question > Select Sequence Type Question	Yes	Update	New message about sequence-type question availability	When creating sequence-type questions in OPCM, additional tip text now advises administrators that sequence-type questions are not supported within mobile CellCast apps.	8.2
CORE-6590	-	OPCM > Assessments > Reports > Report #1407	Yes	Update	Updates to improve report #1407 export	Report #1407 "Test Answer Analysis for All Questions" has received several updates to improve the formatting and utility of the report export. Specifically, the test name row has been removed as the report only ever displays the results for a single test, and an "Include Correct Answers" display option allows the correct answers for each question to be included in the report results for easy reference.	8.2
CORE-7186	-	OPCM > Assessments > Reports > Report #1495 Answer Confidence by Test	Yes	Update	Answer Confidence report updated	The Answer Confidence report has been updated to adjust some results elements. Additional filters have been added to allow for removing questions that do not have confidence enabled. Mastery information for non answered questions has been updated to indicate NA for those questions where no confidence was provided.	8.2.4
CORE-7177	-	OPCM > Assessments > Reports > Report #1495 Answer Confidence by Test	Yes	Update	Answer Confidence report updated	Updates have been made to the export function in the Answer Confidence report to ensure that html characters are stripped but the text within those characters is left in the exported field. Previously all text within html was removed from the export of the report.	8.2.4
CORE-7156	-	OPCM > Assessments > Reports > Report #1406 Question Details by Test	Yes	Update	Question Details by Test report updated	The Question Details by Test report has been updated to accommodate for situations where question text includes incorrect html and properly strip the html characters where appropriate.	8.2.4
CORE-6853	-	OPCM > Events & Activities > Master Event Calendar	Yes	Update	Updated display of Master Calendar session hover information	The session information that appears when hovering over a session in the OPCM Master Calendar has been split into separate lines for improved readability.	8.2
CORE-6495	OPCM > Events & Activities > Activities > Select an Activity > Assignments	OPCV > Activities > Launch an Activity	Yes	Update	Activity Links now available through OPCV	The view of assigned activities in OPCV has been updated to display defined Activity Links. These are presented as clickable links and were previously only available through mobile CellCast apps.	8.2
CORE-6526, CORE-6527, CORE-6528, CORE-6529	OPCM > Events & Activities > Activities > Select an Activity > Prerequisites	Various > Activities	Yes	Enhancement	Activities now support prerequisite objects	Similar to courses and nuggets, Activities can now be set with prerequisite objects which must be completed prior to accessing the activity.	8.2
CORE-6913	-	OPCM > Events & Activities > Reports > Report #1498 Event Summary by Date	Yes	Update	Event Summary by Date report updated	The Event Summary by Date report has been updated to allow for an option to "include sessions with no registered users". This additional filter option will allow an Admin to run the report for all sessions not just those with registered users.	8.2.4

EPICS-177	OPCM > Skills & Games > Skill Profiles/Curriculums/Game Profiles > Progress Boards > Custom Templates	Various > Gameboard and Progress Board List and Selection Views	Yes	Enhancement	New Board Designer tool for customizing Gameboards and Progress Boards	To allow administrators to make alterations and adjustments to Gameboards and Progress Boards, a "Board Designer" is now available in OPCM. Administrators can use this tool to change the background images, colors, and, in a future release, waypoint locations on board templates or boards already assigned to games, skill profiles, and curriculums. The boards which support this feature are identified with a "Configurable" label in the Gameboard and Progress Board list views. While the standard set of boards may not be altered, a "Create Copy" option allows administrators to create a customized clone of their desired board which may then be modified with the designer tool.	8.2
CORE-1858	-	OPCM > Skills & Games > Skill Profiles > Select a Skill Profile > Advanced	Yes	Update	Updated Due Date appearance for skill profiles	In order to match the other object types, the User Due Date field selection for skill profiles and curriculums have been updated to use a dropdown selection instead of radio buttons.	8.2
CORE-6576, CORE-6577, CORE-6578	-	OPCM > Skills & Games > Skill Profiles > Select a Skill Profile > Advanced	Yes	Update	Dynamic Certificate deep links available for skill profiles and curriculums	"Dynamic Certificate" deep links for navigating directly to earned certificates are now included on the Advanced tab for skill profiles and curriculums. These links were previously only available for courses, nuggets, and assessment sets.	8.2
CORE-3433	-	OPCM > Skills & Games > Game Profiles > Select a Game > Associated Objects > Documents	Yes	Update	Game document filter now applied to all sub-nodes as well	When assigning specific documents to a game in OPCM, the "Name" filter now searches the current node and all sub-nodes. Previously the filter only returned documents in the currently viewed node.	8.2
CORE-7229	-	OPCM > Skills & Games > Skill Profile/Curriculum/Game Profile > Progress board / Gameboard	No	Update	The Board configurator toolbar header would sometimes not load when editing a Progress or Gameboard.	An update has been made to the process that launches the Progress board and Gameboard configurator to ensure that the toolbar header for the configurator properly loads.	8.2.6
CORE-7143	-	OPCM > Skills & Games > Reports > Curriculum Progress Detail Report #1470	Yes	Update	Updates made to improve efficiency of report	The Curriculum Progress Detail Report (1470) has been updated to provide for efficiencies when running for large groups of users. The report would sometimes error out due to updates being triggered by the report libraries specific to Incomplete Skill Profiles and Curriculum.	8.2.3
CORE-6197	-	OPCM > Messaging > Send Notifications > To Interactive Assessment Assignees	Yes	Update	Send Notification option added for Interactive Assessments	Similar to the existing pages to send notifications to object assignees, a new dropdown option has been added in OPCM to send notifications to users assigned to specific interactive assessments. The flow to craft a message, choose notification method(s), schedule the message, select an object, and optionally select a status remains the same as the flow for the other object types.	8.2
CORE-6407, CORE-6408, CORE-6409, CORE-6410	OPCM > Administration > Configuration > Customer > General > Audit Trail Retention Period	OPCM > Administration > Audit Trail	Yes	Enhancement	Audit Trail entries older than six months now automatically archived	To prevent the audit trail from becoming excessively large and slow to query, entries sent more than a configurable number of days ago are now automatically archived and removed from the list. By default this period is 180 days, but this can be changed via the "Audit Trail Retention Period" customer configuration. Archived audit trail entries are stored in a new table accessible to OnPoint personnel should reporting be required.	8.2
CORE-3459, CORE-6621	OPCM > Administration > Configuration > Customer > General > Allow Forum Attachments	OPCM > Messaging > Forums	Yes	Update	New configuration for default forum attachment setting	A "Default Forum Attachments Setting" customer configuration has been added for the default value of the "Allow Forum Attachments" setting for new forums. This is a global setting that controls whether all new forums should allow attachments or not.	8.2
CORE-6517, CORE-6518, CORE-6519, CORE-6520, CORE-6521, CORE-6531	OPCM > Administration > Configuration > Customer > General > Generated Login Format	OPCM / OPDM > Create a New User	Yes	Enhancement	Support for generating login IDs for new users	Support has been added for optionally generating login IDs from a configurable template for new users in OPCM and OPDM. These logins can be configured to include the users' names, initials, OPLS IDs, email addresses, and/or last 4 digits of their phone numbers. Login IDs may still be entered as normal, but if the "Generate on Save" checkbox is selected for a new user an appropriate login ID will be generated upon user creation. The same process can be incorporated into user imports to automatically generate login IDs for imported users. This does not apply to customers utilizing SSO for access.	8.2
CORE-2118, CORE-2120, CORE-6676	OPCM > Administration > Configuration > Customer > Course Manager > Date-Based Triggered Notification Timing	OPCM > Messaging > Notification Queue	Yes	Update	New configuration for the timing of triggered notifications and scheduled reports	Currently triggered notifications and scheduled reports set to go out on a specific date are scheduled based on the time of day the trigger was fired for each user. A new "Date-Based Triggered Notification Timing" customer-level configuration is now available that allows an admin to change that time and set their own time at which to send out notifications and scheduled reports set for a specific day. If the configuration is not set the current behavior will be retained.	8.2
CORE-6593, CORE-6594	OPCM > Administration > Configuration > Customer > Content Viewer	OPCV > Assessments	Yes	Update	OPCV assessment set Information page can now be optionally bypassed	A configuration has been added for whether to "Bypass Assessment Set Information Page on First Attempt". If set to Yes, users accessing an assessment set for their initial attempt will bypass the assessment set information page. The page will always be shown on subsequent accesses after the user has completed or failed the assessment set.	8.2
CORE-6201, CORE-6516	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	Yes	Update	New "Event - Complete" widget	A new "Event - Complete" widget is now available for inclusion in analytics dashboards. This widget provides information about event completions, with visualizations for total completions, % completions vs assignments, and completions over time.	8.2
CORE-2230	OPCM > Administration > Configurations > Dashboards	Various > Analytics Dashboards	Yes	Update	New "All Objects Duration" widget	A new "All Objects Duration" widget is now available for inclusion in analytics dashboards. This widget provides information on average and total time spent within assigned objects, with options to show the data for everyone or for each user.	8.2
CORE-1845, CORE-1846	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	Yes	Update	New "Skill Profile/Curriculum Incomplete" widgets	New "Skill Profile Incomplete" and "Curriculum Incomplete" widgets are now available for inclusion in analytics dashboards. These widgets provide information on how many users are Incomplete vs Completed for their assigned skill profiles and curriculums, including a list of such users.	8.2
CORE-3009, CORE-6896, CORE-6902	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	Yes	Enhancement	Analytics dashboards can now filter based on group classifications	Recommended for customers with a large number of groups, if one or more group classifications have been defined analytics dashboards may now be set to filter by and display users who are members of groups within a selected classification. The overall effect is the same as if the groups were selected individually.	8.2
CORE-6854, CORE-6855	OPCM > Administration > Configurations > Dashboards	Various > Analytics Dashboards	Yes	Enhancement	New "Assessment - Confidence" widget	A new "Assessment - Confidence" widget is now available for including data on user answer confidence in analytics dashboards. This widget may be used to compare user scores against their confidence in their responses, providing a more in-depth look at user understanding of their assigned learning.	8.2
CORE-6910	-	OPCM > Administration > Configuration > Dashboards	Yes	Update	Site Admins can now create new dashboards	While customer administrators with the Advanced Analytics module could use the dashboard builder, new dashboards previously had to be created by OnPoint team members. This has been updated and Site Administrators can now both create and configure new analytics dashboards.	8.2
CORE-5844	-	OPCM > Administration > Configuration > Dashboards	Yes	Update	Widget title translations may now be removed	Widget title localizations/translations could previously not be removed after they had been added. This has been addressed.	8.2
EPICS-170	OPCM > Administration > Configuration > Proxy Management	OPPM > All	Yes	Enhancement	Support for setting managers to temporarily "proxy" for other managers	"Proxy Managers" may now be set to temporarily cover for other managers (GM or RM roles). When a proxy is established, the "proxying" manager gains temporary management rights over the groups, job codes, org units managed by the "proxied" manager until the proxy is ended. Both managers can continue to access OPDM in the same manner, the only difference being that the "proxying" manager now also sees the members of the temporarily managed groups, job codes, and org units as well as their normal users. To facilitate this feature, a new dropdown option has been added in OPCM under which administrators can create new proxies, view/end existing proxies, and review past proxies. Only administrators may create/end proxies; managers may not do this themselves.	8.2
EPICS-182	OPCM > Administration > Thumbnails, Badges & Images > Select Badge	OPCM > Various > Badge Assignment	Yes	Enhancement	Badge views now include "Badge Origin" fields and filters	The views of badges through OPCM have been updated to include if each badge is Standard (downloaded from the central server via the Image Pack-ages view), Customer (uploaded manually in OPCM), or Unknown (pre-dating the 8.2 update, treated as Customer badges). This distinction and the associated filters allow administrators to more easily locate their desired badges for objects and games without having to look through the full list of available badges each time. This only affects OPLS-created and managed badges; integrations with systems such as Badgr are not included in this functionality.	8.2
CORE-6549	-	OPCM > Administration > Import/Export > Import Data > Import Users	Yes	Enhancement	"Active Record" option added to OPCM user import	The user import function in OPCM now includes an option to import users as Active Records instead of Active Users, and to send out activation emails to each user to facilitate their initial login. This is only available for the spreadsheet user import in OPCM; automated imports remain unaffected. This is a requirement for the bulk user activation process.	8.2
CORE-7487	-	OPCM > Administration > Import/Export > Import Data > Import Users	No	Update	Updates have been made to prevent duplicate user creation	Updates have been made to the User Import process to prevent the inadvertent duplication of users when being imported. Steps have been taken to prevent multiple incorrect paths that could result in duplicates.	8.2.6
CORE-6394	-	OPCM > Administration > Import / Export > Export Data > SCORM/xAPI Export	Yes	Enhancement	Support for exporting SCORM/xAPI packages from OPCM	Support has been added for exporting the zip packages for SCORM/xAPI courses from the OPLS. Previously these were available by contacting the OnPoint support team, but administrators may now utilize the "SCORM/xAPI Export" option to export and download the packages themselves.	8.2
CORE-6595, CORE-6622	-	OPCM > Administration > System Administration > Languages > Edit /Configure Languages	Yes	Update	Configuration and language phrase edits no longer scroll to top of page	When a language phrase is edited or a configuration value is changed, the administrator's view now remains unchanged and no longer scrolls to the top of the page.	8.2
OPCommon (OPCommon)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-6171	-	OPLRS	Yes	Update	New tracking of board access in the LRS	The system now uses xAPI statements to track when progress boards or gameboards are launched by a user, allowing administrators to report on usage using the available LRS viewer.	8.2
CORE-6406	-	OPDoc > Any Document List	Yes	Update	Descriptions now included in OPDoc document lists	The document list in the Document Manager application now includes a column for the document Description. Long descriptions are cut off instead of wrapped to prevent them from taking up too much of the page.	8.2

EPICS-167	Various	Various	No	Enhancement	Additional support for Degreed integration	Additional support has been added for integrating with the Degreed platform. For more information please speak to your OnPoint Engagement Manager.	8.2
CORE-6579	-	Various > Interactive Assessments	No	Update	Emojis are now auto-converted to text in Interactive Assessment responses	Corrected an issue where emojis included in an Interactive Assessment comment blocked the submission of the comment. This has been addressed, and emojis are now automatically converted to their text equivalents for submission.	8.2
CORE-6624, CORE-6625, CORE-6636	-	Various > Curriculum Assignments	Yes	Update	Updates to completion percentage tracking for curriculums	Previously if a curriculum contained a skill profile, the percentage completion of curriculum counted the skill profile as a single item and only updated once all of the items in the skill profile were completed. Updates have been made to independently track these completion percentages so that the curriculum completion percentage now updates whenever an associated item is completed, including those items within an assigned skill profile.	8.2
CORE-6916, CORE-6917, CORE-6918, CORE-6919	-	Database	No	Update	Support for longer WebEx session IDs	Various updates have been made to support the longer session IDs that are now being utilized by WebEx.	8.2
CORE-7021	-	SSO		Update	Updates to SSO for 8.2 specific scenarios	Updates were made to ensure that SSO is properly connecting and authenticating for users using existing bookmarked URLs.	8.2.1
External LRS (OPLRS)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7005	Administration - Configuration - Customer - External LRS Configuration	External LRS	No	Enhancement	Allow for sending Account Type of User Login to External LRS	The External LRS configurations have been updated to allow for sending the user's Login as the unique account value when sending xAPI statements to an External LRS.	8.2.1
CORE-7134	Administration - Configuration - Customer - External LRS Configuration	External LRS	No	Enhancement	Allow for sending Account Type of User Foreign ID to External LRS	The External LRS configurations have been updated to allow for sending the user's Foreign ID as the unique account value when sending xAPI statements to an External LRS.	8.2.3
CORE-7465	-	External xAPI statements	Yes	Update	Update to allow for configuring the xapi homepage value	Updates have been made the process of sending xAPI statements to an external LRS to provide for configuration options to define the Homepage value in the account of the statement to be dynamic from a parameter at the user level.	8.2.6
Content Viewer (OPCV)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-6356	-	OPCV > Launch Assigned Objects	Yes	Update	Corrected OPCV page number display	Corrected the spacing of page numbers in OPCV. They now appear as "Page 1 of 2" instead of "Page1of2".	8.2
CORE-6620	-	OPCV > Events	Yes	Update	Location button now only displayed on session registration page for ILT sessions	As webinars do not have a physical location, the Location button no longer appears on the webinar session registration page in OPCV. The button remains available for traditional ILT sessions.	8.2
Analytics Dashboards (OPAnalytics)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-2055, CORE-6600, CORE-6633,	-	Various > Analytics Dashboards > Details	Yes	Update	"Total" values included in widget detail views	The details pane for all analytics widgets now includes one or more "Total" values, displaying the total number of users, objects, search terms, etc... displayed in the widget.	8.2
Performance Manager (OPPM)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-6506	-	OPPM > Events	Yes	Update	OPPM calendar display option moved to top right of page	For consistency with OPCM and to make the option to switch between OPPM calendar views more prominent, the "Calendar Display" dropdown has been moved to the top right of the page.	8.2
CORE-7111	-	OPPM > User List	Yes	Update	Optimize Group Selection dropdown	The Group Selection dropdown has been optimized to utilize select2 style search options with pagination to load the list of managed groups more efficiently. This is especially helpful when Admins access OPPM or Managers that manage a lot of groups.	8.2.3
OP-Portal (OPPORTAL) and UI/UX							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-6523	-	Custom Interfaces > Display Hierarchy Nodes	Yes	Update	Support for xAPI statements for display hierarchy views	The OPLRS now supports recording specific "node" xAPI statements when a user views an individual hierarchy node in their UIs. Custom Interfaces will need to be updated to send these statements to the LRS.	8.2
CORE-6591	-	Custom Interfaces > Events	No	Update	Custom UIs can now indicate self-assigned events	Custom UIs can now be updated to display whether an event was assigned by a manager or administrator or if the user assigned it to themselves out of an available catalog.	8.2
CORE-6991	-	Customer Interfaces > Catalog Thumbnails	No	Enhancement	Update messaging to include unassigned object thumbnails for Portal	Updates have been made to provide thumbnail information to the UI that loads in a Browser (Portal) for unassigned and available catalog items. **This may require UI review to display and is not supported in the Mobile APP.	8.2.1
CORE-7192	-	Event Self Assignment		Update	UI Event Session selection marked as Optional	Updates have been made to ensure that Event Sessions selected from the UI are properly marked as Optional. Previously User selected sessions were marked as Required.	8.2.4
CORE-7191	-	UI News		Enhancement	News articles now adhere to start and end dates	The News information sent to the UI has been updated to ensure that News articles adhere to the defined start and end dates for the News Item.	8.2.4
CORE-7469	-	Language specific login	Yes	Update	Language selection reflected promptly on login	An update has been made to ensure that language selection changes on login and in a user's profile are reflected promptly without the user having to close their browser.	8.2.6
CORE-7479	-	Progress boards	No	Update	Optimize Progress board waypoint display	Updates have been made to optimize the load of Progress boards when accessed by users. In some situations, users were encountering long loading times depending on traffic and the number of items in the Progress board.	8.2.6
OnPoint Release 8.2							
Release Notes - Web Version				Bug = feature not working as expected			
Course Manager (OPCM)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-6554	-	OPCM > Home > LRS Viewer	Yes	Bug	Corrected display of special characters in LRS Viewer	Previously the user selection menu in the LRS viewer displayed special characters as their HTML encodings instead. This has been addressed.	8.2
CORE-6426	-	OPCM > Home > Course / Nugget / Assessment Set Requests Pending	Yes	Bug	Corrected duplicate display of managed users	Previously if a Site Admin managed multiple groups, the Course, Nugget, and Assessment Set Request pages displayed the same users multiple times if they were members of more than one managed group. This has been addressed and users now correctly appear a single time.	8.2
CORE-6562	OPCM > Various > Triggers	OPCM > Messaging > Notification Queue	No	Bug	Corrected updated trigger action sometimes not sending notifications	Previously if an object without a due date had a trigger set to fire "On Due Date" and later changed to fire "On Trigger", notifications would not be generated in some situations. This has been addressed, and triggers set to fire "On Trigger" will now always generate notifications as expected.	8.2
CORE-6542	-	OPCM > Various > Reports	No	Bug	Corrected event report phrase display	Corrected an issue where the "All" phrase did not properly display in the filters for some event reports.	8.2
CORE-5762	-	OPCM > Various Objects > Assignments > Users > Recommend	Yes	Bug	User list now properly restricted when recommending users to an object	Previously when recommending an object from the object Assignments tab in OPCM, the user list was not limited by the administrator's group/job code restrictions and they could recommend the object to any user on the slice regardless of whether they were members of a managed group. This has been addressed and the list is now limited as expected.	8.2
CORE-6893	OPCM > Users & Groups > Users & Managers > Select a User	Web-Based Portals > Login	No	Bug	Cached language selection now overridden on language change	Changing a user's preferred language now updates the user's view to the new language immediately. Previously the old preferred language selection was cached and continued to be used in some situations.	8.2
CORE-6367	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Select a Skill Profile	Yes	Bug	Updated display of activity status on skill profile status pages	Activities for which the user has a status of Participated now appear as "Participated" rather than "Incomplete" on user skill profile status pages in OPCM.	8.2
CORE-6618	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Assessment Sets	Yes	Bug	User test results detail view now properly displays manually set scores	Previously if an administrator set a test score for a user manually in OPCM, the user test results view would always display the user's score as 100%. This was a display issue only and has been addressed; the score was always properly stored in the database and included in reports.	8.2
CORE-6985	-	OPCM > Users & Groups > Reports > Report #1354 Assignment Completion by Group	Yes	Bug	Correct display of Curriculum in the Assignment Completion by Group Report	The Display of the object type has been corrected in the Assignment Completion by Group report #1354 to properly show "Curriculum" for those objects. Previously these objects showed no Type in the Item Type column.	8.2.1
CORE-6359	-	OPCM > Content > Nuggets > Select a Nugget	No	Bug	Corrected status reset of manually completed nuggets	Previously the Update Status function for nuggets was setting nuggets manually Completed via OPCM back to Not Attempted. This has been addressed.	8.2
CORE-6873	-	OPCM > Content > Nuggets > Select a Nugget > Assignments	No	Bug	Corrected manual assignment of pages to nuggets	Previously if a nugget had a page manually assigned rather than via the content wizard, the nugget would not load for users in some situations. This has been corrected, and manually created nuggets once again function as expected.	8.2
CORE-6650	-	OPCM > Assessments > Assessment Sets > Select an Assessment Set	Yes	Bug	Update Status function no longer prematurely marks users as Failed	Previously if the Update Status process was run for an assessment set, Incomplete users with no more available retakes were set as Failed for the assessment set. This has been corrected, and users remain as Incomplete until they submit their test.	8.2
CORE-6614, CORE-6615	OPCM > Assessments > Tests > Select a Test	Various > Assessments	No	Bug	Corrected status evaluation upon exiting an assessment template	Previously if a user existed a test with an assessment set template without answering all of the questions, the user was incorrectly set as Completed for the assessment set. This has been addressed, and the "Require Answers" setting is now properly adhered to. Assessments taken without a template were not affected.	8.2

CORE-6655	OPCM > Assessments > Questions > Select a Question > Assignments	OPCV > Assessments	Yes	Bug	Question image assets once again displayed within surveys	If a test question had an assigned image asset, previously the image did not display within survey-type tests in OPCV. This has been addressed.	8.2
CORE-6563	-	OPCM > Skills & Games > Select a Skill Profile > Advanced	No	Bug	"Update Existing Users" Due Date function now sets correct time of day	Previously the "Update Existing Users" button for skill profiles and curriculums was setting the due date for already assigned users to be 24 hours earlier than intended. This has been corrected.	8.2
CORE-7196	-	OPCM > Skills & Games > Game Profiles > Select Game > Achievements	Yes	Bug	Game Objectives properly shows all Events as options	A issue has been corrected that would only allow the selection of the first Event associated with a Game when defining Objectives for the Game. This has been corrected.	8.2.5
CORE-6664	-	OPCM > Events & Activities > Activities > Select an Activity > Prerequisites	Yes	Bug	Corrected error in activity prerequisite view	Corrected a typo in the activity prerequisite view that threw an error when applying or clearing the objects filter in the prerequisite assignment area. This has been addressed.	8.2
CORE-6477	-	OPCM > Messaging > Send Notifications	Yes	Bug	Corrected duplication of ad hoc notifications for multiple memberships	If an ad hoc notification was set to go out to multiple groups, users who are in more than one of those groups would previously receive the notification multiple times. This has been addressed.	8.2
CORE-6503	-	OPCM > Messaging > News Items	Yes	Bug	Corrected error when deleting news items	Deleting a news item in OPCM no longer throws an error.	8.2
CORE-6361	-	OPCM > Administration > Configurations > Dashboards	Yes	Bug	Editing a dashboard no longer affects its sequence	Previously editing an analytics dashboard would drop it to the bottom of the dashboard sequence. This has been addressed.	8.2
OPCommon (OPCommon)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-6543	-	Various > Analytics Dashboards	No	Bug	Corrected display of analytics data by year	Corrected an issue where widgets disaggregating data by year would not display the current year when set to display all dates.	8.2
CORE-6497	-	Various > Complete a Skill Profile	No	Bug	Corrected earning duplicate skill profile certificates	Corrected an issue where users could earn duplicate certificates for a skill profile or curriculum in some situations.	8.2
CORE-6632	-	Various > Assessments	No	Bug	User responses to multiple answer questions now retained within assessment templates	Previously user selections in multiple choice, multiple answer questions were cleared upon submission of the test via an assessment set template. This has been addressed.	8.2
CORE-6998	-	Triggers	Yes	Bug	Correction to Standard Failed to Start / Failed to Finish notifications	An issue was found that prevented Standard Failed to Start and Failed to Finish notifications from being generated as part of overnight checks.	8.2.1
Analytics Dashboards (OPAnalytics)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-6907	-	Various > Analytics Dashboards	Yes	Bug	Analytics dashboards now display more than 10 managed groups for selection	If a manager managed more than 10 groups, the managed groups dropdown in analytics dashboards was previously only showing the first 10 groups. This has been addressed and all groups are now available for selection and filtering.	8.2
CORE-6924	-	Various > Analytics Dashboards	No	Bug	Corrected duplication of analytics drill down sort arrows	Previously when multiple different visualizations existed on the same analytics dashboard, multiple "sort" arrows could appear in the drilldown tables in some situations. This has been addressed.	8.2
Performance Manager (OPPM)							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-2485	-	OPPM > Games > Select a Game > Leaderboard	Yes	Bug	OPPM Game Leaderboard now responds to group filter	Previously the game leaderboard in OPPM did not update when a group filter was applied. This has been addressed.	8.2
OP-Portal (OPPORTAL) and UI/UX							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7094	-	UI > Forums > Forum attachments	Yes	Bug	Corrected video playback in Forum posts	A change in a library used for video playback was preventing videos added to Forums from properly playing for users. This has been corrected.	8.2.2
OPLSCron							
Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7460	-	Object Triggers - Failed to Start / Failed to Finish	Yes	Bug	Failed to Start / Failed to Finish triggers fire on configured interval	Fail to Start and Fail to Finish triggers have been corrected to ensure subsequent notifications are properly fired on the configured schedule when sending out repeating reminders to users. The issue was specific to these triggers when no due date was being utilized.	8.2.6
