OnPoint Release 8.4	July 8, 2022 - Oct. 18, 2022
Release Notes - Web Version	**Enhancement** = improvement to an existing system feature
	New Feature = new capability in the system
	Update = Improved Functionality

Course Manager (OPCM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7560	-	OPCM > All	Yes	Update	Only administrators without group restrictions can now see the All Users group	If an administrator manages at least one group, they will no longer see the All Users group. Administrators without any group management restrictions will still be able to see and interact with this group.	8.4
CORE-6871	-	OPCM > All > Menus	Yes	Update	Updated OPCM menu items	Several OPCM menus have been updated to better reflect the current usage of each item: - Under *Messaging* , "Send Notifications" has been renamed to "Ad Hoc Notifications". - Under *Messaging* , the Notification Queue, Email Queue, and Mobile Push Queue items have been moved under a new *Monitor Queues* submenu. Additionally, some items have been removed as they are no longer relevant to current usage of the system: - The Competencies item has been removed from the *Skills & Games* menu. - The Content Authors and Licensing items have been removed from the *Administration* menu.	8.4
CORE-8055	-	OPCM > Home	Yes	Update	Shifted Platform field on OPCM Home page	For better display of similar information, the Enterprise/Foundations "Platform" field has been moved from the License section to the Information section on the OPCM Home page.	8.4
CORE-7963	-	OPCM > Home > Tasks	No	Update	Update to improve resiliency of OPTask queue	The OPTask queue has been updated to ensure that if a specific task fails, the failure is logged and the rest of the task queue proceeds as normal.	8.4
CORE-8126	-	OPCM > Home > Tasks	No	Update	Optimizations added to cron processor	Optimizations have been added to the cron processor to prevent it from interrupting when exceptions are caught and logged.	8.4.4
CORE-7590	-	OPCM > Home > Deletion Requests Pending	No	Update	Security update for OPCM Deletion Tasks page	Additional security has been added to the Deletion Tasks page to harden again SQL injection attacks.	8.4
CORE-8212	-	OPCM > Home > LRS Viewer	No	Update	Status update added for xAPI courses reporting completion	An additional check has been put in place to ensure a user's status for an xAPI course is set to Completed if the course reports itself as completed to the OPLRS. This is in addition to the standard processes OPCV and OPMGW use to evaluate and update course statuses and most often would be seen when users exit the xAPI course in a non-standard way.	8.4.6
CORE-7791	OPCM > Home > Delete Requests Pending > Events	Various > Assignments > Found In	No	Update	Updated trigger cleanup when deleting sessions	If an event is deleted, the cleanup of event and session-level triggers has been improved. Previously some records persisted after the deletion, which caused the triggers to continue to appear in object Found In sections in some situations.	8.4
CORE-7640, CORE-7641, CORE-7642, CORE-7735, CORE-7736, CORE-7773, CORE-7774	-	OPCM > Home > Task Monitor > External Process Log	Yes	Update	New log and view of external processes	The Task Monitor in OPCM now includes an additional "External Process Log" view which displays recent external processes, such as user imports and crons. Depending on when they were last updated, custom imports may need to be updated to record appropriate data to appear in this log.	8.4
CORE-7854	-	OPCM > Various	No	Update	Optimizations added to user lists in OPCM	The process to generate lists of users in OPCM has been optimized to improve page loading times throughout OPCM.	8.4
CORE-8066	-	OPCM > Various > Scheduled Reports	No	Update	Update Org Management restrictions in Scheduled report results	Updates were made to the process that generates Scheduled reports to ensure that scheduled reports specific to Org Chart management were properly applying the org chart restrictions of the manager. Previously group and org restrictions were being applied to the results of scheduled reports resulting in fewer results.	8.4.1
CORE-8194	-	OPCM > Various > Reports	Yes	Update	Reports 1339 and 1432 can now include user Foreign ID	Report 1339 "User/Learner List by Org/Group" and report 1432 "User Course Status with Credit Hours" have been updated to include the user Foreign ID field as a display option.	8.4.5
CORE-8211	-	OPCM > Various > Reports > Various	Yes	Update	Updated function of the "Include Recertified" report display option	The function of the "Include Recertified" display option for supported reports has been updated to now display the recertification status changes within the report timeframe. Previously this option only indicated if the object in question was set with scheduled recertification.	8.4.6
CORE-7835	-	OPCM > Various > Analytics	Yes	Enhancement	Support for default Administrator Dashboards	Support has been added for installing the default set of Administrator Analytics Dashboards for a customer. This action will be performed as part of each customer's 8.4 upgrade.	8.4
CORE-7555	-	OPCM > Various Objects > Recertify	Yes	Update	Invalid option hidden when scheduling recertification for Attempted and/or Completed users	When setting the automatic recertification for an object, if "Attempted and/or Completed" is selected for the user status then the schedule can now only be set to be Annually or XX days after Assignment. Previously admins could set the recertification to happen XX days after Completion, which did not apply to Attempted users. The XX days after Completion option remains available when recertifying for only completed users.	8.4
CORE-7525	-	OPCM > Various > Asset > Update Content	Yes	Update	Updated file extension checks when replacing assets	When updating asset files within OPCM, only files with a valid extension (.pdf, .zip, etc...) may now be uploaded to replace existing assets. Previously administrators were able to upload files with no extension in some situations.	8.4
CORE-4836	-	OPCM > Various Objects > Assignments > Assign	Yes	Update	Archived users now appear in Assigned user lists	If an object is archived to a user's history, that user is now displayed in the Assigned users list for that object with a status of Archived. Previously users for whom the object was archived did not appear in either the Assigned or Unassigned lists on the object Assignments pages.	8.4
CORE-7535	-	OPCM > Various Objects > Assignments	Yes	Update	Found In section can no longer be used to remove Progress Board items	Due to the additional requirements presented by Progress Boards, if an object is part of a Skill Profile or Curriculum with an assigned Progress Board then the object can no longer be unassigned from the Skill Profile or Curriculum from the object's Found In section. The object can still be removed by navigating to the Assignments tab of the Skill Profile or Curriculum in question.	8.4
CORE-7568	OPCM > Various Object > Information > Edit	OPCM > Administration > Audit Trail	Yes	Update	Object status changes now added to the audit trail	The Audit Trail has been updated to include object status changes performed by administrators, such as setting an object to Inactive or back to Active.	8.4
EPICS-182	OPCM > Various Assignable Objects > Achievements > Badges	Various > Assigned and Available Objects	Yes	Enhancement	Earnable badges can now be created for all objects	Support has been added for defining a badge for each assignable object. Found under the Achievements tab for each object in OPCM, badges can be set with a title, description, and a badge image. Users earn a badge by having a status of Completed for the associated object, and if a user's status changes (such as through recertification), the user will lose the badge until they once again have a status of Completed. A user's earned badges may be viewed from the User Extra menus in OPCM and OPPM, and custom interfaces can be updated to include this view.	8.4
CORE-7746	-	OPCM > Various > Reports	No	Update	Updated informational text within single-group report filters	Previously some single-group reports had text indicating that multiselect was possible. This text has been updated.	8.4
CORE-8265	-	OPCM > Various > Reports	Yes	Update	Updated status display when filtering by date in listed reports	Additional reports have been updated to display each user's status within the specified timeframe, rather than their current statuses (extension of CORE-8145 from HF 8.4.6). The updated reports are 1075, 1292, 1344, 1346, 1393, 1432, 1394, 1365, 1401, 1410.	8.4.7
CORE-7541, CORE-7571	OPCM > Users & Groups > Users & Managers > Select a Site Admin > User Extra > Site Admin Access	OPCM > Home > Change Customer	Yes	Enhancement	Access options available for Site Administrators	To allow additional control over Site Administrator access to other slices and to Document Manager, a new "Site Admin Access" window is now available for Site Admins in OPCM. Root Administrators may use this to set whether each Site Admin may navigate to other slices on the same server, and/or have access OPDoc. These options allow RAs to designate certain SAs to have these access rights where applicable.	8.4
CORE-7548, CORE-7713, CORE-7714	-	OPCM > Users & Groups > Users & Managers > Select a User > Profile	Yes	Update	Validation check added for Adobe Connect user credentials	To help prevent invalid credentials being saved for Adobe Connect integrations, when entering a password for a user's Adobe Connect account in their OPCM Profile a validation check is now performed and the admin is notified if the validation is unsuccessful. Existing Adobe Connect users now include a "Validate" button in their OPCM Profile which performs the same action.	8.4
CORE-7567	-	OPCM > Users & Groups > Users & Managers > Select a User > User Extra > Assignment Status	Yes	Update	Updates to Assignment Status formatting	The Assignment Status view has been updated to improve formatting and display of a user's assignment statuses in OPCM, OPPM, OPCV, and custom user interfaces.	8.4
CORE-7742, CORE-7743	-	OPCM > Users & Groups > Users & Managers > Select a User > Profile	No	Update	Support for UID parameter for Adobe Connect instructors	The Adobe Connect integration has been updated to support a "UID" parameter for each user set as an Adobe Connect instructor for added accuracy.	8.4
CORE-8033, CORE-8038	-	OPCM > Users & Groups > Users & Managers > Select a User > Profile	No	Update	Updated process to set an instructor as a Zoom Host	Previously an error occurred when setting an instructor to be a Zoom host if the customer's Zoom account was set to use SSO. This has been corrected.	8.4
CORE-7749, CORE-7769, CORE-7770	OPCM > Users & Groups > Users & Managers > Select an Administrator > Profile	OPCM > Events & Activities > Instructor-Led or Webinars > Select a Coaching Event > Classes > Slots	Yes	Update	Support for designating admin-level Instructors to also be Coaches	Administrators may now designate admin-level Instructors to be "Coach" Instructors as well. Only those Instructors set as Coaches may be set as instructors for Slots within Coaching events.	8.4
CORE-7688, CORE-7689	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Select an Activity > Uploaded Activity File(s)	Yes	Update	Activity Recertification History view now includes files for recertified activities	If a user has been recertified for an activity in the past, the "Recertification History" view accessible from their Activity Status page now also includes links to view previously submitted files.	8.4
CORE-7775	-	OPCM > Users & Groups > Groups > Event Session Groups	Yes	Update	Event Session Groups now limited to instructors in OPCM	If an administrator is set to manage at least one people (standard) group, the Event Session Group list in OPCM now only displays the event session groups for the sessions the administrator is set to instruct or coordinate. Previously all event session groups were available to all administrators. Administrators who manage no people groups continue to see all event session groups as before.	8.4
CORE-8053	-	OPCM > Users & Groups > Reports	Yes	Enhancement	Add in Custom LEADS Completion report	A new Custom report has been added for reporting on completion of specifically identified Curricula.	8.4.1

Reference	Path 1	Path 2	Enabled	Type	Title	Description	Version
CORE-8297, CORE-8326, CORE-8390	-	OPCM > Users & Groups/Content > Reports	Yes	Update	Optimization of reports #1055, #1284, #1450	Reports #1055 "Object Access by Time Period", #1284 "User Assignment Status by Group", and #1450 "Assignment Status By Type By Group Report" have all been optimized to return results quicker than before. This is especially noticeable when running these reports for large numbers of users.	8.4.9
EPICS-207	OPCM > Content > Courses > Select a Course > Sharing (if enabled)	OPCM > Content > Courses	Yes (if enabled)	Enhancement	Introduction of a Shared Content module	A new "Shared Content" module is now available for purchase for customers operating or thinking about operating multiple slices. This module allows for sharing of an object (initially courses only) from a "Primary" slice to one or more "Replica" slices, retaining control of the Adobe content and optionally propagating any updates to the Replica objects. Please speak to your OnPoint Engagement Manager for additional information.	8.4
EPICS-218	OPCM > Content > Courses > Select a SCORM Course > Information (if enabled)	OPCM > Content > Courses	Yes (if enabled)	Enhancement	Introduction of a Federated Content module	A new "Federated Content" module is now available for purchase. Through an external tool integration, this module allows for "converting" a SCORM course into a Federated Content package that plays from an external server instead of locally. This allows the package to be shared to other OnPoint servers or external customers' LMSs, with all users continuing to access the same content complete with user access control. Please speak to your OnPoint Engagement Manager for additional information.	8.4
CORE-7828	-	OPCM > Content > Pages > Select a Page > Assignments	Yes	Update	Pages now only allow the assignment of a single asset	Due to the evolving usage of the OnPoint system, it is now extremely rare for more than a single asset to be assigned to a page. As such, the asset page assignment process has been updated to only allow a single asset to be assigned to each page. This allows better optimization when loading content as we can remove some checks for assigned assets.	8.4
CORE-7637	-	OPCM > Assessments > Assessment Sets > Assessment Templates	Yes	Update	Interactive Assessments no longer require an Assessment Template selection	Since there is now a default Assessment Template available, administrators may now publish an Interactive Assessment without assigning an Assessment Template.	8.4
CORE-7652	-	OPCM > Assessments > Assessment Sets > Advanced	Yes	Update	Both Access Starts and Access Ends dates now displayed in OPCM if defined	Both the Access Starts and Access Ends fields are now displayed on the Advanced tabs of Assessment Sets. Previously both could be defined in the Edit view and had the desired effects, but only the Access Ends date was displayed to administrators.	8.4
CORE-7722	-	OPCM > Assessments > Tests > Select a Test	Yes	Update	Updated assessment configuration naming in OPCM	To provide more clarity of the purpose and effect of each option, the "Allow Retake" and "Allow Restart" options for Assessments have been renamed to "Additional Attempts" and "Resumes Per Attempt" respectively.	8.4
CORE-7543, CORE-7668, CORE-7691	-	OPCM > Assessments > Reports > Report #1502	Yes	Update	Report #1502 added as replacement for report #1006	Report #1006 "Assessment Answer Export" has been updated and replaced with report #1502 with the same name. The new report allows for multi-select of assessments within an assessment set, and includes additional display and question options. The columns have also been rearranged to be more useful.	8.4
CORE-7837	-	OPCM > Assessments > Reports > Report #1407	Yes	Update	Optimizations have been added to report #1407	Report #1407 "Test Answer Analysis for All Questions" has been optimized to return results in a significantly reduced time compared to previous versions.	8.4
CORE-7615	-	OPCM > Events & Activities > Master Event Calendar	Yes	Update	Updated display formatting of Pending Sessions on Master Calendar	Previously Pending Session titles were displayed with hyperlink text on the OPCM Master Calendar. The formatting has been updated to remove the unneeded underscore and bolding. Clicking on the session in the calendar view continues to take the administrator to the Session Information page.	8.4
CORE-7784, CORE-7785	-	OPCM / OPPM > Events & Activities/Evens > Master Event Calendars	Yes	Update	Coaching Slots now differentiated on OPCM / OPPM event calendars	The Master Event Calendar views in OPCM and OPPM have been updated to differentiate Coaching Slots from sessions, and include the distinction in the "Key" below each calendar.	8.4
CORE-7577	-	OPCM > Events & Activities > Instructor-Led or Webinars > Select a Coaching event	Yes (with module)	Update	Non-applicable fields disabled for Coaching events	If an event is designated to be a Coaching event, the "Auto Assign Sessions" and "Use Seat Allocation" fields are now disabled and cannot be utilized. These fields are not applicable to Coaching slots.	8.4
CORE-7621	-	OPCM > Events & Activities > Webinars > Select an Event > Classes > Select a Session > Enrollment > User History	Yes	Update	Join webinar attendance status changes now tracked in Session Registration History	The Session Registration History for webinar sessions now also tracks when a user's attendance status is changed by virtue of them joining the webinar. Previously this History only tracked when a user registered for or withdrew from a session or when their attendance status was changed by an admin or instructor.	8.4
CORE-8047	OPCM > Events & Activities > Webinars > Select a Zoom Webinar > Classes	Various > Zoom Webinar Session	Yes	Update	Zoom linked sessions now use same passcode as the parent	When using linked sessions for Zoom webinars, linked sessions now use the same passcode as the parent session rather than a separately generated passcode. This only applies to customers who require a specific passcode when setting up Zoom sessions.	8.4
CORE-7860, CORE-8026	-	OPCM > Events & Activities > Webinars > Adobe Connect Events	Yes	Update	Adobe Connect webinars now deleted in Adobe Connect when associated session is deleted	When using the Adobe Connect integration, deleting an Adobe Connect webinar session from OPCM now deletes the associated webinar session within the Adobe Connect system to ensure we have data integrity between systems. Previously these webinars were not deleted when the OPLS session was deleted. Note: in general, the best practice is to cancel the session rather than delete when there are active registrants.	8.4
CORE-7573	-	OPCM > Events & Activities > Event Session Wizard	Yes	Update	Class Duration now used to set session End Time in the Event Session Wizard	When creating a session via the Event Session Wizard, the default Class Duration is now used to automatically set the default session End Time. Previously the End Time defaulted to one hour after the Start Time.	8.4
CORE-7817	-	OPCM > Events & Activities > Event Session Wizard > Select a Coaching Event	Yes	Update	Current day now highlighted on Coaching Slot Wizard calendar	The calendar in the Coaching Slot Wizard in OPCM now highlights the current day, similar to the Event Session Wizard.	8.4
CORE-7551	-	OPCM > Events & Activities > Reports > Report #1370	Yes	Update	Additional name and ID information added to report #1370	Report #1370 "Event Attendance by Session" now includes the name and ID of each included event, and the session ID as an additional display option.	8.4
CORE-7550	-	OPCM > Events & Activities > Reports > Report #1498	Yes	Update	Additional ID information added to report #1498	Report #1498 "Event Summary by Date" now includes the ID of each included event, and the session ID as an additional display option.	8.4
CORE-7549	-	OPCM > Events & Activities > Reports > Report #1503	Yes	Update	Report #1503 Event List by Type added to replace report #1118	Report #1503 "Event List by Type" has been added to replace report #1118 with the same name. The new report displays the same data in an updated format, with the Event and Session IDs added and additional export options when compared to the original.	8.4
CORE-8078	-	OPCM > Events & Activities > Reports > Report #1121	Yes	Enhancement	Update Results display options in Event Report	The Event Registration / Attendance by Date Range report (#1121) has been updated to include the user's timezone and email address in the optional Results Display Options for the report results.	8.4.1
CORE-8131	-	OPCM > Events & Activities > Reports	Yes	Enhancement	Add Email to results display for Users Missing Session Assignments by Event #1313	The Users Missing Session Assignment by Event Report #1313 has been updated to include the user's email address as an available field to be added to the results in the Results Display Options.	8.4.3
CORE-7148	-	OPCM > Skills & Games > Skill Profiles/Curriculums > Select a Skill Profile/Curriculum > Triggers	Yes	Enhancement	Recertification Trigger added for Skill Profiles & Curriculums	A Recertification trigger is now available to be added to Skill Profiles and Curriculums. These were previously the only object types which did not yet have this trigger available.	8.4
CORE-7676	-	OPCM > Skill & Games > Skill Profile/Curriculums > Progress Boards/Gameboards	No	Update	Updates for standard boards are now pushed to all copies of the standard boards	If a standard Gameboard or Progress Board is updated (such as pushing out a fix), all boards created as copies of the standard board are now likewise updated. All customer customizations of the boards are retained.	8.4
CORE-7725	-	OPCM > Skills & Games > Game Profiles > Select a Game > Achievements	Yes	Update	Game Achievements display change in OPCM	To better distinguish game Achievements from object Badges, the "Add Badge" option under the game Achievements tab has been renamed to "Add Achievement".	8.4
CORE-7625	-	OPCM > Skills & Games > Reports > Report #1470	Yes	Update	Report #1470 updated to display data more efficiently	Report #1470 "Curriculum Progress Detail Report" previously called an unnecessary additional query which slowed down the report. The report has been updated to provide the data more efficiently.	8.4
CORE-7838	-	OPCM/OPPM > Skill & Games/Reports > Report #1469	Yes	Update	Updated Skill Profile completion percentage checks in report #1469	Report #1469 "Skill Profile Curriculum Percentage Completion by Group" has been updated to read the percentage completion for each user from the database rather than calculating it directly. This ensures the calculation method is the same as used elsewhere in the system and in other reports.	8.4
CORE-8224	-	OPCM > Skills & Games > Reports	Yes	Update	Foreign ID can be included in reports #1360 and #1367	Report #1360 "Skill Profile Status Summary" and report 1367 "Skill Profile Progress Status by Group" have now both been updated to include "Foreign ID" as an available display option.	8.4.7
CORE-7483	OPCM > Messaging > Monitor Queues > Notification Queue	OPCM > Home	No	Update	New alert process for halted notification queue	If the notification queue halts for any reason, an alert process has been added which displays a message on the OPCM Home page and sends an email to OnPoint support. This will help the support team to more quickly become aware of and address the issue.	8.4
CORE-7515	OPCM > Messaging > News Items > Select a News Item > Linked Object - Poll	Web or Mobile UIs > News or Slider	Yes	Enhancement	News items can now link to a user's Polls	Polls can now be included as a Linked Object in a news item. When a user clicks on a news or slider item linked to polls, the user will be taken to their polls list page. This differs from other object types, where any object ID can be specified and the user is taken to that object when they click on the news or slider item.	8.4
EPICS-191	-	OPCM > Administration > UI Management > Select an Interface > Thumbnail	Yes	Enhancement	Custom interfaces may now be set with individual thumbnails	To assist customers with multiple custom interfaces for different groups, thumbnails may now be set for user interfaces within OPCM. This feature is for administrators; end users will not see these thumbnails.	8.4
CORE-7776	-	OPCM > Administration > Display Hierarchy > Tree View	Yes	Update	Print feature added to Display Hierarchy in OPCM	A Print function has been added to the Display Hierarchy view in OPCM. This option appears in the top right when the hierarchy is in Tree View, and can be used to export or print a summary of the hierarchy.	8.4
CORE-7750	-	OPCM > Administration > Certifications	Yes	Update	Foreign ID field added to External Certifications in OPCM	To assist with tracking and distinguishing External Certifications beyond just the name, a Foreign ID value may now be set for External Certifications from within OPCM.	8.4
CORE-7844, CORE-7880, CORE-7881, CORE-7882	-	OPCM > Administration > Configuration > Customer	Yes	Update	Common modules converted to customer configurations	As these add-on modules are now available to all customers in standard builds, the Allow Activity Uploads, Organization Chart, and Engagement Points modules have been converted to customer configurations and are now available in the Configurations menu of OPCM.	8.4
CORE-7633	OPCM > Administration > Configuration > Customer > General > Password Reset Interval	Various > Reset Password	Yes	Update	New configuration for password reset timer	A "Password Reset Interval" customer configuration has been added to allow admins to set the length of time that a generated password reset link can be utilized. The default interval is 15 minutes. Users who access via SSO are unaffected.	8.4
CORE-7605, CORE-7606, CORE-7627, CORE-7628	OPCM > Administration > Configuration > Customer > General > Recommendation Retention Period	OPCM > Users & Groups > Users & Managers > Select a User > Recommendations > History	Yes	Enhancement	Configuration added to remove user recommendations after a time	Support has been added for automatically removing user recommendations after a configurable number of days. Recommendations that are removed are no longer presented to users but continue to be displayed under a new History button on the user's Recommendations tab in OPCM. By default recommendations are retained indefinitely, and this feature must be enabled for any recommendations to be removed.	8.4

Item#	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7558	-	OPCM > Administration > Configuration > Customer > Course Manager> Dynamic Groups	Yes	Enhancement	Dynamic Groups converted to customer configuration	Dynamic Groups have been converted from a separate module to a customer configuration, allowing all customers to enable the functionality if they so choose.	8.4
CORE-7563, CORE-7565, CORE-7566	OPCM > Administration > Configuration > Customer > General	Various > Forums > Select a Forum > Upload	Yes	Update	New configurations for forum file uploads	New configurations for "Allowed Forum Uploads" and "Maximum Forum Upload Size" are now available for customizing which file types can be uploaded with forum posts, and the maximum size of each file up to a 1000MB limit. Previously both of these were hard-coded.	8.4
CORE-7781, CORE-7792	OPCM > Administration > Configuration > Customer > Performance Manager	OPPM > Events > Select a Coaching Session	Yes	Update	Registration Date customer configuration now applies to Coaching Slots in OPPM	Previously the "Apply Open/Close Registration Date Restrictions" customer configuration was not being applied to Coaching Slots in OPPM. This has been corrected.	8.4
CORE-7659, CORE-7660	OPCM > Administration > Configuration > Customer > Document Manager	OPDoc > Various	Yes	Enhancement	New configuration to set document launch method	Support has been added for a new "Document Launch Method" configuration which sets whether documents opened from OPDoc are opened in a new tab or as a modal popup. The modal popup is the default behavior.	8.4
EPICS-210	OPCM > Administration > Configuration > Customer > Microsoft Teams Settings (if enabled)	OPCM > Events & Activities > Webinars	Yes (if enabled)	Enhancement	Microsoft Teams now available as an integrated webinar provider	The Microsoft Teams integration module is now available for purchase. Through the module, customers may use Team's extensive functionality to create, manage, host, attend, and review Teams meetings directly through the OPLS. The integration is similar to that available for the other supported webinar types (WebEx, Adobe Connect, and Zoom), but we recommend that any interested customers contact your OnPoint Engagement Manager if you would like to learn more.	8.4
CORE-7723, CORE-7727, CORE-7728, CORE-7729	-	OPCM > Administration > Configuration > Customer > Zoom Settings	Yes	Update	Renamed Zoom waiting room configuration	The "Embed Passcode in URL" Zoom session configuration has been renamed to "Default to Waiting Room" to better reflect the effect on end users. The functionality of the setting remains the same.	8.4
CORE-7578	OPCM > Administration > Configuration > Customer > External LRS Configuration	OPCM > Various > Triggers	No	Update	xAPI triggers can no longer be deleted if a customer has a configured External LRS	To help preserve data integrity, admins for customers who are configured to send xAPI statements to an external LRS may not delete object-level triggers set to "Send to [External] LRS".	8.4
CORE-7484	-	OPCM > Administration > Configuration > Customer > External Content > OpenSesame	Yes	Update	Refresh button added to OpenSesame configuration	The OpenSesame integration has been updated to include a "Refresh" button in the OpenSesame configuration window. When this button is pressed by an administrator, the system reaches out to the OpenSesame servers and retrieves any updates available for the configured customer. This ad-hoc Refresh action is in addition to the nightly update.	8.4
CORE-8028, CORE-8039, CORE-8051	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	Yes	Update	Updates to Subplot Bar Horizontal analytics visualization	The Subplot Bar Horizontal analytics visualization (scale above the chart) has received several updates, such as supporting pagination and displaying the maximum value (such as in test scores).	8.4
CORE-7593	OPCM > Administration > Configuration > Dashboards	Various > Analytics > Performance - Question Analysis widget	Yes	Update	Line Graph visualization added to Question Analysis widget	The "Performance - Question Analysis" widget has been updated to support Line Graph visualization. This provides an alternate view for the analyzing points earned for question answers.	8.4
CORE-7623	OPCM > Administration > Configuration > Dashboards	Various > Analytics > Assessment - Question Analysis widget	Yes	Update	Assessment - Question Analysis widget now allows for filtering on a specific question	The Assessment Question Analysis widget builder now includes an optional filter which can be used to limit the display information to only those questions with specified parameters, meta tags, or display tags, extending the ability to provide focus to a specific question.	8.4
CORE-7839, CORE-7851, CORE-7887, CORE-7979	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	Yes	Enhancement	Updated Assessment - Question Analysis widget with new options	The Assessment - Question Analysis analytics widget has been updated to include additional disaggregation and display options, allowing the widget to, among other things, disaggregate by user or question, display the data for a specific user, and sort the list of users alphabetically or by their score in the assessment.	8.4
CORE-7486, CORE-7572	OPCM > Administration > Configuration > Classifications > Event Classifications	Custom Interfaces > Events	No	Enhancement	Additional functionality added for Event Classifications	Event Classification functionality has been enhanced to set the sequence of classifications, select which should be available to users, and to allow the assignment of a thumbnail to each classification. Custom interfaces will need to be updated to utilize this functionality.	8.4
CORE-7649	OPCM > Administration > Thumbnails, Badges & Images	Various	Yes	Update	Deleting a thumbnail now clears that thumbnail from all objects	If a thumbnail is deleted from the OPCM thumbnail library, all objects set to use that thumbnail now revert to using the default thumbnail for the object type. Previously these objects retained the association with the deleted thumbnail, which caused no thumbnail to appear for users or administrators.	8.4
CORE-5578	-	OPCM > Administration > Thumbnails, Badges & Images	Yes	Update	Updated Content Thumbnails management page	The Thumbnails management view in OPCM has received several updates, including new informational text and an option to upload a zip file containing multiple thumbnails at once.	8.4
CORE-7638	OPCM > Administration > Thumbnails, Badges & Images	OPCM > Content > Wizards > Nugget Wizard	Yes	Update	Nugget Wizard now uses default thumbnails for nugget sub-types	If a customer has default thumbnails defined for individual nugget sub-types (video, document, etc...), then the "Default" thumbnail option in the OPCM Nugget Wizard now uses the sub-type default thumbnail instead of the standard default for nuggets. Content-specific thumbnails may still be set for objects created via the wizards.	8.4
CORE-7767	-	OPCM > Administration > Thumbnails, Badges & Images	Yes	Update	Thumbnail lists in OPCM have been paginated	To accommodate for a large number of thumbnails on a server, the thumbnails list pages in OPCM have been paginated and now display up to 50 thumbnails at a time.	8.4
CORE-7760, CORE-7846	-	OPCM > Administration > Copy to Other Slices	Yes	Update	"Transfer [Object]" utilities renamed to "Copy [Object] to Other Slice"	To better indicate their function, the "Transfer Course/Nugget/Assessment Set" utilities have been renamed to "Copy Course/Nugget/Assessment Set to Other Slice" and the informational text has been updated. Due to the architecture of xAPI courses, xAPI courses may no longer be selected to copy to another slice using the course utility. Previously xAPI courses could be selected but the process could not complete.	8.4
CORE-7603, CORE-7772	OPCM > Administration > System Administration > Manage Customers > Select a Customer > Banners	Various	Yes	Update	Selected application banner now displayed for all users	Due to underutilization, specific banners may no longer be defined for individual groups. The banner set for each application is now displayed to all users, such as in OPCM, OPPM, and OPCV. These banners are set per application at the slice level; different slices will continue to display different banners where set to do so.	8.4
CORE-7795	OPCM > Administration > System Administration > Manage Customers > Select a Customer > Banners	OPDoc > All	Yes	Enhancement	OPDoc may now be set with a unique banner	Like for OPCM, OPPM, and OPCV, Administrators may now set a unique banner to display in the Document Manager application.	8.4
CORE-7845	-	OPCM > Administration > System Administration > Manage Customers > Select a Customer > Modules	No	Update	Updates to customer Modules page in OPCM	The customer Modules page in OPCM has been updated to better organize the add-on module listings and remove deprecated modules which are no longer being supported.	8.4
CORE-7737	-	OPCM > Administration > System Administration > Languages	Yes	Update	Language phrases containing HTML tags can now be edited via OPCM	Administrators are now able to edit language phrases which contain HTML tags. Previously these phrases were not able to be edited via OPCM and required a database update to edit.	8.4
CORE-7653, CORE-7657	OPCM > Administration > System Administration > Administration Matrix > Role Menu Visibility	OPCM > Administration > Manage Reports	Yes	Update	Reports Management once again available to all admins	After being limited to select administrators in a previous build, the Reports Management interface in OPCM is once again available to all administrator roles. The access to this page can be controlled via the Administration Matrix.	8.4
CORE-7841	OPCM > Administration > System Administration > Administration Matrix > Role Administrative Rights > Skill Profile & Games	OPCM > Skills & Games > Skill Profiles or Curriculums > Advanced	Yes	Update	Extension of Skill Profile/Curriculum admin matrix flag to Advanced tabs	The "Add/Edit Skill Profile" admin matrix flag has been extended to also control whether admins can make edits on the Advanced tabs of Skill Profiles and Curriculums.	8.4
CORE-7842	OPCM > Administration > System Administration > Administration Matrix > Role Administrative Rights > Administration	OPCM > Administration > Display Hierarchy > Select a Node	Yes	Update	Extension of display hierarchy admin matrix flag to node assignments	The "Add/Edit Hierarchy Nodes" admin matrix flag has been extended to also control whether admins can make edits to the hierarchy nodes themselves, such as assigning or removing items, changing group assignments, and adding or removing child nodes.	8.4
CORE-7055	OPCM > Administration > System Administration > Administration Matrix > Performance Manager	OPPM > Evaluations > Interactive Assessments	Yes	Update	OPPM Admin Matrix flags extended to Interactive Assessments	The "Assign/Unassign Content to Users" OPPM administration matrix flags are now also used to determine whether managers may assign/unassign Interactive Assessments for their managed users. Requires the Interactive Assessments module.	8.4

OPCommon (OPCommon)

Item#	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7683, CORE-7684	-	Various > Join Zoom Webinar Session	No	Update	Automatic user Zoom account checks have been added when joining a Zoom webinar	When a user clicks on the Join URL for a Zoom webinar session, the Zoom API now verifies that the user has an account on the Zoom side and is associated with that account in the database. If a Zoom account is not present then one will be automatically created for the user in Zoom using the email address associated with their profile (required). This ensures that user attendance and duration are properly recorded for all users who attend the webinar.	8.4
CORE-7664, CORE-7685, CORE-7686	-	Various > Zoom Webinar Session	No	Update	All users who join a Zoom session now do so through their Zoom accounts	Due to recent changes in the Zoom system to require user accounts, all users who join a Zoom webinar session through OPCV, OPPM, or a custom interface will be connected with their Zoom account based on their email address or they will be emailed a link from Zoom to create a new account.	8.4
EPICS-185	-	Various > Events > Slot Registration	Yes	Enhancement	Coaching functionality extended to allow user self-registration to Slots	Where previously only managers and administrators could assign their users to Coaching Slots, users may now register themselves for Coaching Slots within assigned or available Coaching events. To facilitate this, a new calendar view has been created which can be included within custom interfaces. Please speak to your OnPoint Engagement Manager for additional information.	8.4
CORE-7853	-	Various > Assignments	No	Update	Optimized assignment Access Begins/Ends date checks	The checks for assignment Access Begins and Access Ends dates have been optimized, reducing interface loading times for users.	8.4

Content Viewer (OPCV)

Item#	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7777		OPCV > Assessments > Test Results Page	Yes	Update	Updated Continue button phrase in OPCV	The phrase key for the "Continue" button on the OPCV test results page has been replaced with a new phrase key for "Click to Update Assignment Status" to better communicate to the user the purpose of the button. This phrase key replacement only affects the test results page in OPCV.	8.4

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7589	-	OPCV > Assessments > Test Results Page	Yes	Update	Error message added to OPCV test results	Instead of the white page which appeared previously, an error message is now displayed if a user attempts to use the browser "Back" button after submitting a test.	8.4
CORE-7724	-	OPCV > Assessments > Start an Assessment	Yes	Update	Updated OPCV assessment option button phrases	To provide more clarity about each option available to users, the default phrases for the "Resume" and "Restart" buttons for assessments in OPCV have been changed to "Resume Progress" and "Restart From Beginning" respectively. Additionally, the "Restart From Beginning" button only appears if the user has submitted at least one assessment within the assessment set, and not if the user has not yet submitted any of the assessments.	8.4
CORE-8115	-	Events > Webinars	Yes	Update	Linked Event Sessions updated to provide Join link	Webinars that utilized linked Event Sessions have been updated to properly show a join link for the secondary + linked sessions. Previously, the join link was only available for the initial session of the Event. This is specific to OPCV and addressed separately in the UI view of Linked Event Sessions.	8.4.3
CORE-7607	-	OPCV > Instructor login > Event Attendance Page	Yes	Update	Event Attendance page now displays times in instructor's Timezone	The OPCV Event Attendance page now displays the session times in the instructor's Timezone, rather than the Timezone set for the event in OPCM.	8.4

Performance Manager (OPPM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7462	-	OPPM > User Details	Yes	Enhancement	Alternative grid view added to OPPM user list	The user list in OPPM now includes an alternate tile view. If managers select the tile view option, the user list changes to display a grid of user profiles, each containing the user's ID, profile image, name, and title. Managers may switch their view at any time, and each manager's preference is saved for their next access.	8.4
CORE-7646	-	OPPM > Events > Master Calendar > Select a Coaching Event Slot	Yes	Update	Timing restrictions added for managers adding their users to coaching slots	Managers in OPPM can no longer assign a user to a Coaching Slot if the registration period for the slot has ended or the Start Time for the slot is in the past.	8.4
CORE-7790	-	OPPM > Events > Select a Coaching Slot	Yes	Update	Updated Available Users list for Coaching Slots in OPPM	When assigning users to a Coaching Slot in OPPM, the Available Users list was previously excluding users already assigned to the event but who lacked a session or slot assignment. This has been addressed, and such users are once again included in the Available Users list.	8.4
CORE-7614	-	OPPM > Evaluations > Interactive Assessments	Yes	Update	Updated user filter for OPPM Interactive Assessments	The last name (A-Z) selection option has been replaced with a standard user filter on the user list for more flexibility in finding users for Interactive Assessments in OPPM.	8.4
CORE-7553	-	OPPM > Evaluations > Appraisals	No	Update	Support for UI link to Appraisals	Support has been added to launching directly to the OPPM Appraisals view from a portal UI. Custom interfaces will need to be updated to utilize this functionality.	8.4
CORE-8261	-	OPPM > Reports > Scheduled Reports	Yes	Update	Scheduled reports now lists the included groups/org nodes	When an admin or manager views a scheduled report, the header now displays the list of groups or org nodes included in the displayed results, rather than "All" which was displayed previously.	8.4.7

Document Manager (OPDoc)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7561	-	OPDoc > Various	Yes	Update	Updated Action button color in OPDoc list views	The color palette used for Action buttons in OPDoc has been updated to a lighter color.	8.4
CORE-7721, CORE-7759, CORE-7761, CORE-7857, CORE-7869	-	OPDoc > Administration > Reports > Document Downloads Report	Yes	Update	Report #1504 added as replacement for report #1102	Report #1102 "Document Downloads" has been updated and replaced with report #1504 with the same name. The new report has been optimized to return results more quickly, and includes a "Last Viewed" column and additional display and question options.	8.4
CORE-8208	OPCM > Customer Configurations >	OPDoc > Any Document	Yes	Update	Corrected group filter issue in report 1337	Previously the "Add New Version" and "View Version History" options for documents were only available to document administrators if the "Allow Users to view historic document versions" customer configuration was enabled. This has been updated, and document administrators now always have access to these options. User access to previous versions of documents continues to be controlled via the configuration.	8.4.5

User Experience (OPUX)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7538	-	OPUX > Web Portals > Various	No	Update	Additional accommodation for template usage spikes	Additional support has been added to accommodate for spikes in users simultaneously accessing complex progress boards, gameboards, or assessment templates at the same time.	8.4
CORE-6912	-	OPLogin	No	Update	Additional login checks added	Additional checks have been added to ensure the login field is always populated on the login page. Users accessing via SSO are unaffected.	8.4
EPICS-205	-	OPLogin	Yes	Enhancement	Support for Login Templates	The OnPoint user login process has been enhanced through the addition of Login Templates. There is a default template used for all customers, but custom templates can be created for individual use cases. Users who access via SSO are unaffected. Please speak to your OnPoint Engagement Manager for further information.	8.4
CORE-7581	-	Web UI or Mobile CellCast UIs > Various > Assignment Status	No	Enhancement	UI support for launching to a user's Assignment Status view	Support has been added for launching to a user's Assignment Status view from their Web or Mobile CellCast interface. This is the same Assignment Status view which was previously available only to administrators from the User Extra menu in OPCM. Custom interfaces will need to be updated to utilize this functionality.	8.4

Analytics Dashboards (OPAnalytics)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7506	-	Analytics Dashboards	Yes	Enhancement	Competency disaggregation added to Assessment - Confidence widget	To display competency data within the "Assessment - Confidence" widget, "Competency" has been added a secondary disaggregation when disaggregating by Answer.	8.4
CORE-7967	-	Analytics Dashboards > Various	No	Update	Support for customized dashboard coloring	The analytics dashboards now support customized color styling within charts, action buttons, widget headings, and filter pane backgrounds. These customizations must be performed by the OnPoint team.	8.4
CORE-7661	-	Analytics Dashboards > Assessment - Question Analysis widget	Yes	Update	Question numbers added to the "Assessment - Question Analysis" widget	In addition to the "Prev" and "Next" buttons, question numbers have been added to the "Assessment - Question Analysis" widget. These allow managers to see the number of the currently viewed question and to "jump" between the questions by selecting a question number.	8.4
CORE-7877	-	Analytics Dashboards > Question Analysis widget	Yes	Update	Drilldown now automatically closed when switching questions in Question Analysis widget	When navigating to a different question within the "Assessment - Question Analysis" analytics dashboard widget, any opened drill down for the previous question is now automatically closed instead of remaining open.	8.4
CORE-6872	-	Analytics Dashboards > Various Widgets	Yes	Update	Modal popup added for reading horizontal bar chart labels	For analytics widgets displayed using Stacked Bar Horizontal visualization, clicking on the truncated label now opens a modal popup containing the full label. This is useful for visualizations with long labels, such as question text.	8.4
CORE-7613, CORE-7617, CORE-7618	-	Analytics Dashboards > Various Widgets	Yes	Update	Pre-configured object titles now displayed within analytics widgets	If an object has been pre-configured for a widget via the Dashboard Builder, the title of that object is now displayed within the widget, below the widget name.	8.4

API Integrations (OPAPI)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7658, CORE-7690, CORE-7694, CORE-7701	-	Zoom Webinar APIs	No	Update	Zoom integration now uses Zoom IDs to map to session attendees	Due to recent changes in the Zoom system, user account emails are no longer provided when receiving user attendance detail via the Zoom APIs. As such, the OnPoint system now uses the provided Zoom ID to map to users instead of the email address for attendance purposes.	8.4
CORE-7872	-	OPAPI	No	Enhancement	Support for setting group management via API	Support has been added for setting a Group or Reporting Manager to manage one or multiple groups via the OPAPI module. Using the addon OPAPI module, this will allow custom API integrations to better control group management.	8.4
CORE-8000	-	OPAPI	No	Enhancement	Support for retrieving user memberships or management via API	A new method is now available within the OPAPI addon which supports retrieving the list of groups a user manages or those for which the user is a member.	8.4
CORE-8016	-	OPAPI	No	Enhancement	Additional group data now available via APIs	Group data returned via OPAPI methods now includes fields for group_foreign_id (Foreign ID), group_class_id (Classification ID), and group_class_name (Classification Name).	8.4

External LRS (OPLRS)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7647, CORE-7675, CORE-7677	-	-	No	Update	Updated External LRS API communication	The External LRS integration has received several updates to the data sent to external LRS systems.	8.4

Mobile Gateway (OPMGW)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7695	-	Mobile CellCast App > Open a Document	Yes	Update	Updated OPDoc behavior for opening documents within iOS app	New OPDoc behavior has been introduced to ensure that documents opened from the iOS CellCast application are opened in a new tab within the app instead of a modal popup window.	8.4
CORE-7695	-	Mobile CellCast App > Open a Document	Yes	Update	Updated OPDoc behavior for opening documents within iOS app	New OPDoc behavior has been introduced to ensure that documents opened from the iOS CellCast application are opened in a new tab within the app instead of a modal popup window.	8.4
CORE-7831	-	Mobile CellCast Apps	No	Update	Optimized assignment calls for mobile users	The calls to retrieve user assignments for Mobile CellCast apps have been optimized, reducing loading times for users.	8.4
CORE-8225	OPCM > Skills & Games > Skill Profiles > Progress Board	Mobile CellCast Apps	No	Update	Ensured progress board value is included in mobile data	Added additional information in alternate sync methods to ensure that the UI is always alerted when a skill profile or curriculum has a progress board.	8.4.6

OPZOOM (Zoom Support)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8121	-	Events & Activities - Webinars - ZOOM Session	No	Enhancement	Create ZOOM user	Additional Support and configurations have been added to allow for setting the ZOOM integration to NOT create users in the connected ZOOM account. In this scenario, users will be prompted to access or login to the ZOOM account, but a new user account will not be added to the integrated ZOOM account nor Users merged into the ZOOM account.	8.4.3
CORE-8140	-	Events & Activities - Webinars - ZOOM Session	No	Enhancement	Support varied meeting settings per customer	Updates have been made to allow for setting the distinct Meeting settings to be applied to all Meetings created through the Integration. Specifically these configs allow for defining if all Meetings should have the Waiting Room enabled or allow guests to access the meetings. These configs are currently defined by OP Technical staff and will be exposed through Customer configurations in 8.5.	8.4.3
CORE-8153	-	Events & Activities > Webinars > ZOOM Session	No	Enhancement	Support varied webinar settings per customer	Updates have been made to allow for setting the distinct Zoom Webinar settings to be applied to all Webinars created through the Integration. Specifically these configs allow for defining if all Webinars should have the Waiting Room enabled or allow guests to access the Webinars. These configs are currently defined by OP Technical staff and will be exposed through Customer configurations in 8.5.	8.4.4

OnPoint Release 8.4 Bug Fixes
Release Notes - Web Version

Bug = feature not working as expected

Course Manager (OPCM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7636	-	OPCM > Various > Reports > Listed Reports	Yes	Bug	Updated reports to address org chart filter issue	A number of reports have been updated to address an org chart filter issue which prevented results from being returned. The updated reports are: #1085, #1240, #1324, #1328, #1329, #1330, #1331, #1332, #1335, #1336, #1346, #1355, #1378, #1473, #1394, #1401, #1407, #1411, #1418, #1419, #1426, #1442, #1467, #1470, #1471, #1476, #1500, #1501	8.4
CORE-8101	-	OPCM > Users & Groups/Content/Assessments/Events & Activities/Skills & Games > Reports	No	Bug	Updates to specific reports for Org / Group selection	An update has been made to the listed reports to ensure that the Group / Org information is properly applied to the results. Previously these specific reports were applying too much management restriction on the results. Reports impacted: 1332 Event Attendance by Org/Group 1131 Game Leaderboard Location 1349 Course Progress for a Specific Course with Language Equivalent 1334 Nugget Progress by Org / Group 1363 Org Chart User Assignment 1452 Performance Evaluation Status Report 1211 SCORM 2004 Interactions Test Results 1240 Curriculum / Skill Profile Progress Summary 1284 User Assignment Status by Group 1339 User / Learner List by Org / Group	8.4.2
CORE-7976	-	OPCM > Various > Reports > All Reports w/ Org Node Multi-Select	Yes	Bug	Corrected report org node filter for administrators who do not manage any org nodes	Previously if an administrator did not manage any org nodes, reports with org node multi-select filters did not return any data for the administrator. This has been corrected, and such reports now include data for all org nodes for administrators who do not manage any org nodes.	8.4
CORE-7440	-	OPCM > Various > Triggers > Add / Edit Notification	Yes	Bug	Special characters now displayed in trigger group names	Special characters in group names now appear as expected when applying group filters to triggered notifications. Previously these characters appeared in their HTML encodings instead.	8.4
CORE-7884	-	OPCM > Users & Groups > Users & Managers > Select a User > User Extra > Trigger Execution Log	Yes	Bug	Corrected object ID filter in user trigger log	Previously the Trigger Log for a user in OPCM returned no results when filtered by an object ID. This has been corrected.	8.4
CORE-7587	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Skill Profiles > Assign	Yes	Bug	Corrected filter issue in available skill profile list for a user in OPCM	In OPCM, corrected a filter issue that caused the available skill profile list for a user to fail to load in some situations.	8.4
CORE-7679	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Assign	Yes	Bug	Quick filters no longer affect other object types on user object assignments page	When assigning objects to a user in OPCM, if an admin applied quick filters to one object type and then selected the tab for another object type, the applied filters previously carried over. This has been corrected, and the filters for each object type once again do not affect the other object types.	8.4
CORE-8213	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments	Yes	Bug	Corrected user curriculum time totals	If an object is assigned to a skill profile within a curriculum, the time spent in the object previously did not get counted towards the Completion Time and Total Time for the curriculum in some situations. This has been corrected.	8.4.6
CORE-7556	-	OPCM > Users & Groups > Users & Managers > Select a User > History	Yes	Bug	In Progress skill profiles no longer save a Completion Date when recertified	If a user is In Progress for a skill profile when it is recertified, a Completion Date is no longer saved to the user's recertification history. Previously the date of recertification was saved to that field.	8.4
CORE-7645	-	OPCM > Users & Groups > Users & Managers > Select a User > Assignments > Select an Activity	Yes	Bug	An activity submission declination reason can once again be provided by admins	Administrators are once again able to provide a reason when declining a user's activity submission. Previously an error caused the decline reason popup to not appear.	8.4
CORE-7862	-	OPCM > Uses & Groups > Reports > Report #1450	No	Bug	Corrected error in report #1450	Corrected a back-end error which occurred when running report #1450 "Assignment Status by Type by Group".	8.4
CORE-8145	-	OPCM > Users & Groups > Reports > Report #1292	Yes	Bug	Updated status display when filtering by date in report #1292	When filtering report #1292 "User Course Status" by status within a specific timeframe, the report results would previously return the correct records but would display each user's current status rather than the status within the specified timeframe. This has been corrected.	8.4.6
CORE-7702	-	OPCM > Users & Groups > Users & Managers > Select a User > Memberships > Org Chart Assignment	Yes	Bug	Corrected display of a user's org chart assignments	Previously a user's org chart assignments were not being displayed on the user's Memberships tab in OPCM. This has been corrected.	8.4
CORE-7836, CORE-8040	-	OPCM > Users & Groups/Content > Reports > Reports #1418, #1474, #1410	Yes	Bug	Corrected date picker issues in reports #1418, #1474 and #1410,	Corrected date selection issues which prevented reports #1410 "Course Completion by Group for Multiple Courses", #1418 "Monthly Access Summary", and #1474 "Attestation History" from returning results in some situations.	8.4
CORE-7794	-	OPCM > Content > Wizards > Course Wizard	Yes	Bug	Corrected issue with HTML course upload in content wizard	Previously admins encountered an error when uploading an HTML course via the Course Wizard in OPCM. This has been corrected.	8.4
CORE-8138	-	OPCM > Content > Courses > Select Course > Triggers	Yes	Bug	Assigned to Course Trigger not firing	An error has been corrected that was introduced in the early 8.4 release that prevented the Assigned to Course Trigger from firing when a user was assigned to a Course with a standard or regular Assigned to Course Trigger established.	8.4.3
CORE-7868	-	OPCM > Content > Reports > Reports #1419	Yes	Bug	Corrected answer drilldown in report #1419	Report #1419 "xAPI Test Answer Analysis" previously did not display any data when drilling into correct or incorrect answer counts. This has been corrected.	8.4
CORE-7609	OPCM > Assessments > Assessment Sets > Certificates / Templates	Various > Complete Assessment Set	Yes	Bug	Certificates now generated after completing an assessment set through a template	Previously if a user completed an assessment set through an assessment template, the user would not be awarded the associated certificate if one was defined. This has been addressed.	8.4
CORE-7611	-	OPCM > Assessments > Assessment Sets > Select an Assessment Set > Advanced	Yes	Bug	Assessment Set Acknowledgment Message modal now closes on save	Previously when editing the Acknowledgement Message for an Assessment Set, the message modal did not close and required the administrator to refresh the page. This has been addressed.	8.4
CORE-7823	-	OPCM / OPPM > Events & Activities/Events > Master Event Calendar	Yes	Bug	Corrected deletion of external webinars for sessions converted back into slots	Within a Coaching webinar event, if a session is converted back to a slot the session's external webinar session was previously not being deleted. This has been corrected.	8.4
CORE-7570	-	OPCM > Events & Activities > Master Event Calendar	Yes	Bug	Corrected formatting and search case issues for OPCM Master Event Calendar	Previously on the Master Event Calendar in OPCM, the event Name filter was case sensitive and the dropdown filter formatting would change when using each filter. The Name filter is no longer case sensitive and all filters retain their formatting when utilized.	8.4
CORE-7905	-	OPCM > Events & Activities > Instructor-Led or Webinars > Select an Event > Advanced	Yes	Bug	Editing the Advanced tab of an event no longer clears the Synopsis	Previously editing the Advanced tab of an event would clear the Synopsis field. This has been corrected.	8.4
CORE-8124	-	OPCM > Events & Activities > Instructor Led or Webinar Events > Select Event > Triggers	Yes	Bug	Correct No Assigned Event Session trigger	Updates have been made to ensure that the "No Assigned Event Session" trigger is properly fired as part of the overnight process to alert when users are assigned to the Event but have not selected a Session.	8.4.3
CORE-7643	-	OPCM > Events & Activities > Webinars > Select a Zoom Webinar > Classes > Select a Past Session	Yes	Bug	Correction for error when viewing Zoom Type for past or invalid sessions	Opening the Zoom Type window for a past or invalid (no longer existing on the Zoom side) Zoom session previously threw an error and displayed a white page to the administrator. This has been addressed, and past or invalid sessions no longer cause an error.	8.4
CORE-7693	-	OPCM > Events & Activities > Webinars > Select an Event > Classes > Add Session	Yes	Bug	Corrected default End Times for webinar sessions	Previously when creating webinar sessions in OPCM, the default Start and End times were the same. This has been addressed, and the default End Time is now appropriately later than the default Start Time based on the class duration.	8.4

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7899	-	OPCM > Events & Activities > Webinars > Select WebEx Event > Classes > Select Session > Delete	Yes	Bug	Corrected deletion of WebEx webinar sessions	Previously when a WebEx webinar session was deleted in OPCM, the associated WebEx webinar session was not deleted in some situations. This has been corrected.	8.4
CORE-7720	-	OPCM > Events & Activities > Event Session Wizard > Select a Coaching Event	Yes	Bug	Corrected calendar display within Coaching Slot wizard	Corrected a calendar display issue within the Coaching Slot wizard in OPCM when the 1st of the displayed month fell on a Sunday.	8.4
CORE-8095	-	OPCM > Events & Activities > Event Session Wizard	No	Bug	Event Session Wizard - Event Selection	Corrected a bug that prevented the Event list from properly populating when a customer did not have the ZOOM module enabled.	8.4.2
CORE-8141	OPCM > Events > Triggers	OPCM > Messaging > Monitor Queues > Notification Queues	Yes	Bug	Corrected missing event session trigger	Previously "No-Assigned-Event-Session" triggers for events were not firing for newly established triggers. This has been corrected.	8.4.5
CORE-8059	-	OPCM > Events & Activities > Reports > Report #1121 and #1122	Yes	Bug	Corrected instructor display in reports 1121 and 1122	Report 1121 "Event Registration / Attendance by Date Range" and report 1122 "Event Registration Summary by Group" were previously not displaying the instructor for each session in some situations. This has been corrected.	8.4
CORE-7616	-	OPCM > Skills & Games > Skill Profiles > Progress Boards	Yes	Bug	Copying a Standard board template now creates a Custom Template	When copying a Standard gameboard or progress board template, the copy is now created as a Custom template which allows for a greater degree of customer customization. Previously the copies were being saved as Standard templates instead.	8.4
CORE-7620	OPCM > Skills & Games > Game Profiles > Select a Game > Triggers	OPCM > Users & Groups > Users & Managers > Select a User > User Extra > Trigger Execution Log	Yes	Bug	Corrected Game Completion trigger logic	Previously if an Activity was the final object to be completed by a user within a game, the Game Completion trigger would not be fired. This has been corrected.	8.4
CORE-7672	-	OPCM > Skills & Games > Reports > Report #1470	No	Bug	Corrected Expand function of report #1470	Report #1470 "Curriculum Progress Detail" previously did not display all records when the Expand link was clicked in some situations, though the export options did include all data. This has been corrected.	8.4
CORE-8180	-	OPCM > Skills & Games > Reports > Report #1337 Skill Profile Progress Summary by Org/Group	No	Bug	Corrected group filter issue in report #1337	Corrected an issue which prevented report #1337 "Skill Profile Progress Summary by Org/Group" from returning results in some situations.	8.4.4
CORE-8315	-	OPCM > Skills & Games > Reports	Yes	Bug	Corrected completion status filter for report #1470	Previously report #1470 "Curriculum Progress Detail Report" returned users with all completion statuses even if filtered for a specific status. This has been corrected.	8.4.9
CORE-8032	OPCM > Messaging > Standard Notifications > New User Notifications	OPCM > Messaging > Monitor Queues	Yes	Bug	Corrected New User Welcome messages for Records	If New User Welcome triggered notifications (the only triggered messaging option for records) are configured to send after a period of time rather than immediately, they were previously not being sent to new Record users. This has been corrected.	8.4
CORE-7847	-	OPCM > Administration > Display Hierarchy > Select a Node > Translations	Yes	Bug	Corrected error in hierarchy node Translations	Corrected an error which occurred when accessing the language Translations tab for a Display Hierarchy node in OPCM.	8.4
CORE-7824	-	OPCM > Administration > Configuration > Customer > Adobe Connect Settings	Yes	Bug	Validation of Adobe Connect integration once again displays result message	When validating the Adobe Connect integration settings, the response (success or failure) was previously not displayed within the Adobe Connect Settings window within the customer configurations. This has been corrected, and admins are once again notified if the integration validation was successful.	8.4
CORE-7562	OPCM > Administration > Configuration > Customer > Course Manager > Retain Skill Profile Completion Status	Mobile > Skill Profiles	No	Bug	Corrected skill profile certificate issue on mobile	Previously if the Retain Skill Profile Completion Status configuration was enabled for a user, users completing the skill profile on mobile would not earn the appropriate skill profile certificate. This has been corrected.	8.4
CORE-7832, CORE-7833	OPCM > Administration > Configuration > Customer > Content Viewer > Launch Window Size	Custom Interfaces > Assignments	Yes	Bug	Content launched from interfaces now adheres to configured size limits	When launching content from within a custom interface, the resultant OPCV window was previously not adhering to the "Launch Window Size" customer configuration. This has been addressed.	8.4
CORE-7902	OPCM > Administration > Configuration > Dashboards	Various > Analytics Dashboards	Yes	Bug	Corrected Line Graph visualization for Performance - Question Analysis widget	Previously if a Performance - Question Analysis widget was set to display with Line Graph visualization, the widget did not display data on the dashboard. This has been corrected.	8.4
CORE-7634	OPCM > Administration > Thumbnails, Badges & Images	Web or Mobile CellCast UIs > Various > Available Nuggets	Yes	Bug	Appropriate nugget sub-type thumbnails now displayed for available nuggets	Previously if a customer had default thumbnails defined for nuggets and each separate nugget type (PDF, HTML, etc...), only the default thumbnail for nuggets was displayed rather than the sub-type thumbnail for available nuggets. This has been corrected, and each available nugget without a defined thumbnail now displays the default thumbnail for its respective sub-type.	8.4
CORE-7667	OPCM > Administration > Thumbnails, Badges & Images	Web or Mobile CellCast Interfaces > Various > Events	Yes	Bug	Updated event thumbnail display logic	Previously if a customer had a default thumbnail defined for events but no thumbnails for each event sub-type (ILT/webinar), then each event which did not have a defined thumbnail was displayed with no thumbnail at all. This has been addressed, and event thumbnails are now displayed according to the following: 1) If the event has a defined thumbnail, that is displayed 2) Otherwise, display the default thumbnail for the event sub-type (ILT/webinar) 3) If those are not defined, display the default event thumbnail	8.4

OPCommon (OPCommon)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7564	-	Database	No	Bug	Updated recording of Skill Profile due dates	Previously if an access period was defined for a skill profile, the end of the access period was incorrectly recorded as the user due dates in some situations. This has been addressed.	8.4
CORE-7797	-	Various > Achievements	No	Bug	Corrected loading of legacy certificates in OPCM	Previously legacy certificates opened from the Achievements tab of objects in OPCM failed to load in some situations. This has been corrected.	8.4
CORE-7951	-	Various	No	Bug	Update to retain certain cached data when scaling events occur in AWS	Within AWS environments, scaling events could cause xAPI courses to not mark completions and fire triggers appropriately during the user's session. This was due to a caching problem when the AWS environment scaled. This has been corrected.	8.4

Content Viewer (OPCV)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7681	-	OPCV > Event Instructor View	No	Bug	Corrected Event Instructor view error	Corrected an issue which caused the OPCV Event Instructor view to throw an error when viewed by an Alternate Instructor or Event Coordinator.	8.4
CORE-7697	-	OPCV > Event Instructor View	Yes	Bug	Corrected Event Instructor calendar filter issue	Previously the Event Calendar within the OPCV Event Instructor View did not apply filters to sessions for which the user was an Event Coordinator. This has been addressed, and the filters are now applied to all displayed sessions as expected.	8.4
CORE-7698	-	OPCV > Various Content	Yes	Bug	Corrected prerequisite check in OPCV	Previously users in OPCV were sometimes informed their assigned object had prerequisites when it did not. This has been corrected.	8.4
CORE-7991	-	OPCV > Events	No	Bug	Corrected users being able to change to a full session	If an event session was full (ie. no seats were available), users were previously able to switch their registration to the session that was full via OPCV in some situations, even with waitlisting turned off. This has been corrected, and now the user would be added to the session waitlist if that is enabled.	8.4
CORE-7998	-	OPCV > Assessments > Fail Tests within an Assessment Set	No	Bug	Added status checks to prevent incorrect Assessment Set completion	If an Assessment Set contained multiple tests, users were previously able to get a status of Completed for the Assessment Set even after failing each test in some situations. Additional status checks have been added to prevent this from occurring.	8.4
CORE-8262	-	OPCV > Exit Content	No	Bug	Updated time recording when exiting OPCV content	The process for exiting content in OPCV has been updated to ensure the user's total time is appropriately recorded for skill profiles and curriculums. Previously a race condition caused the user's time to not be included in their total skill profile time when that skill profile was also part of an assigned Curriculum.	8.4.7

Performance Manager (OPPM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7629	-	OPPM > Evaluations > Interactive Assessments	No	Bug	Updated user Interactive Assessment submission logic	Previously if a user submitted an Interactive Assessment and closed the window immediately after, the user's submission was recorded but additional data were not recorded, which prevented Managers from starting their part of the assessment in OPPM. This has been addressed.	8.4
CORE-7778, CORE-7780, CORE-7906	-	OPPM > Evaluations > Interactive Assessments	No	Bug	Corrected Interactive Assessment manager submission issue	Corrected an issue which prevented managers from submitting Interactive Assessments for users in some situations.	8.4
CORE-7798	-	OPPM > Events > Select a Session or Slot	Yes	Bug	Corrected Audience Field restrictions for sessions and slots in OPPM	When Audience Field restrictions are applied to a session or slot, users not matching the audience restrictions appeared in the Available User list for the session or slot in OPPM in some situations. This has been corrected.	8.4
CORE-7799	-	OPPM > Events > Select a Session or Slot	Yes	Bug	Updated registration window text on OPPM session/slot Assign Users page	The informational text on the session/slot OPPM Assign Users page has been updated to better communicate the available registration window dates.	8.4
CORE-7631	-	OPPM > Reports > Report #1324	Yes	Bug	Corrected group logic for report #1324	For managers without any managed groups, report #1324 "User Access by Group" previously displayed data for all users. This has been corrected, and report #1324 now only displays data if a manager manages at least one group.	8.4
CORE-8395	-	OPPM > User Details > Add User > Preferred Language	No	Bug	Corrected preferred language setting for users created via OPPM	When creating users via OPPM, the user's preferred language is now correctly set with lowercase characters. Previously uppercase characters were used, which affected case-sensitive language checks in rare cases.	8.4.9

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8092	-	OPPM > Scheduled Reports	Yes	Bug	Pagination support on Scheduled reports page	The Scheduled reports page has been updated to ensure that it properly allows navigating to additional pages when presented in the OPPM scheduled Reports page.	8.4.2

User Experience (OPUX)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7619	-	OPUX > Launch Form Activities	Yes	Bug	Corrected launching Form Activities	Corrected an issue which prevented Form Activities from loading as expected when launched.	8.4
CORE-7712	-	OPUX > Forums > Video Attachment	Yes	Bug	Users once again able to close videos attached to a forum post	When viewing a video attached to a forum post, the exit button once again closes the video as expected. Previously the player did not close, requiring users to close the browser window instead.	8.4
CORE-7796	-	OPUX > Various > Gameboard or Progress Board	No	Bug	Corrected issue when loading gameboards or progress boards	Previously users sometimes encountered errors when using gameboards and progress boards which caused the boards to fail to load. This has been corrected.	8.4
CORE-7820	-	OPUX > Digital Classroom / Custom Interfaces	No	Bug	Corrected Zoom Join URL display in interfaces	Corrected an issue which caused the Join URL for Zoom sessions to not display in the Digital Classroom or custom interfaces in some situations.	8.4

Analytics Dashboards (OPAnalytics)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7610	-	Analytics Dashboard> Assessment Question Analysis	Yes	Bug	Corrected answer sequence in Assessment Question Analysis widget	The Assessment Question Analysis widget now displays the question answers in the sequence defined within the test. Previously the answers were displayed in the order they were added, so this change ensures the answers appear in the same sequence they are displayed to users.	8.4
CORE-7787	-	Analytics Dashboard > Assessment - Question Analysis widget	Yes	Bug	Assessment - Question Analysis widget now displays answers in the appropriate sequence	The "Assessment - Question Analysis" widget previously displayed question answers which have been selected by users at the bottom of the answer list. This has been corrected, and the answers are now always displayed in the appropriate sequence.	8.4
CORE-7874	-	Various > Analytics Dashboards	Yes	Bug	Corrected the closing of modal popups on analytics dashboards	Previously when closing a modal popup within an Analytics Dashboard, if a dashboard filter was present behind the close button then it would register the click through the popup. This has been addressed, and the filters are not longer opened in such situations.	8.4
CORE-7700	-	Analytics Dashboards. > Performance - Question Analysis Analytics Widget	No	Bug	Corrected widget display after server upgrade	Previously the Performance - Question Analysis analytics widget would not load if changes were made to the widget in a software update. This has been addressed, and the widget now loads as expected following a software update.	8.4

Mobile

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-7569	-	Mobile > Complete Objects with Certificate	Yes	Bug	Corrected earning certificates on mobile	Corrected an issue which prevented users from earning certificates for objects completed via their mobile CellCast app.	8.4
CORE-7583	-	Mobile > Safari Browser > OPDoc	No	Bug	Updated OPDoc navigation in mobile Safari browsers	When using a mobile Safari browser, users were previously unable to use OPDoc navigation buttons after entering and then exiting a document. This has been addressed.	8.4
CORE-8034	-	Mobile CellCast Apps	No	Bug	Corrected language caching issue on mobile	Corrected a caching issue which could cause a user's preferred language to be applied to other users' mobile CellCast apps in some situations.	8.4
CORE-8387	OPCM > Various Object Types > Information > Require Approval	Mobile CellCast Apps > Search for available objects	Yes	Bug	Self-assigning objects via CellCast now adhere to "Require Approval" settings	Users who self-assigned themselves to available objects via their mobile CellCast app previously had the objects set to require manager approval in all instances. This has been addressed, and mobile self-assigned objects once again only require approval if the "Require Approval" flag is enabled for the objects in OPCM.	8.4.9

API Integrations (OPAPI)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8284	-	OPAPI > Import Courses/Nuggets	No	Bug	Corrected OPAPI import methods	Corrected an issue which prevented the import of courses and nuggets via the available OnPoint API methods.	8.4.7
