OnPoint Release 8.5	October 2022 - March 2023
Release Notes - Web Version	**Enhancement** = improvement to an existing system feature
	New Feature = new capability in the system
	Update = Improved Functionality

Course Manager (OPCM)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8250	OPCM > Various	-	No	Enhancement	Updates to Federated Distribution view	Various updates to the information about content distributed via the Federated Content Server. These updates provide additional management options for Distributed content for Admins. Speak to your Engagement Manager for additional information and details about the Federated Content Server.	8.5
CORE-8394, CORE-8400, CORE-8401, CORE-8402	OPCM > Home > Pending > Recertification requests pending approval	User Interfaces > Assignments > Recertification Request	No	Enhancement	Support available for users to request a reregister action for a previously attended event	Support has been added to allow users to request the ability to select a new session of an event that they have previously attended. Administrators or Managers must approve the request and will require custom updates to the UI in order to support this functionality. Actions taken to approve the request will save the user's previous attendance and then allow the user to select a new available session of the event.	8.5
CORE-8127	-	OPCM > Various Objects > Select Object > Achievements > Certificates	Yes	Enhancement	Support added for bulk printing of certificates	Support has been added for printing multiple user-earned certificates through a single action. From the Achievements tab of an object, admins may filter by user ID, name, group, and certificate date, and from the list admins may select one or more users for whom to print certificates. This action can be used to generate a	8.5
CORE-8378	-	OPCM > Users & Groups > Reports > Report #1506	Yes	Enhancement	New report for eCommerce transactions	A new report #1506 "eCommerce Transaction Detail" is now available for reporting a list of Magento eCommerce transactions for managed users, with filters for group/org chart, user status/role, and date range.	8.5
CORE-8017, CORE-8018	-	OPCM > Content/Assessments > Nuggets/Assessment Set > Select a Nugget or Assessment Set > Sharing	Yes	Enhancement	Content Sharing functionality extended to Nuggets and Assessment Sets	Content Sharing functionality has been extended to include Nuggets and Assessment Sets. If the Content Sharing module is enabled, admins will be able to share those object types to other slices on the same server. Please see the Content Sharing feature guide for more information.	8.5
CORE-8085, CORE-8099, CORE-8222, CORE-8376, CORE-8385	OPCM > Content > Wizards > Content Wizard	Various > Courses	Yes	Enhancement	Federated Content module now supports cmi5 and AICC packages	The Federated Content module now supports creating courses from cmi5 or AICC content in a SCORM wrapper. If a customer has the Federated Content module, a new "AICC/cmi5 to SCORM (zip package)" option is now available in the Content Wizard, allowing the upload of a cmi5 or AICC package to be converted to a Federated Content SCORM package. Please see the Federated Content feature guide for more information.	8.5
CORE-7995	OPCM > Events & Activities > Webinars > Select a Microsoft Teams Webinar Event	OPCM > Events & Activities > Webinars > Select a Microsoft Teams Webinar Event > Classes	Yes	Enhancement	Event Coaching support extended to Microsoft Teams integration	The Event Coaching module functionality has been extended to include Microsoft Teams webinar events. If both the Event Coaching module and Microsoft Teams integrations are enabled for a customer, administrators are now able to create Coaching Slots for Teams events and manage them similarly to other events.	8.5
CORE-7993, CORE-7994	OPCM > Events & Activities > Webinars > Select a Teams Webinar	Various > Events	Yes	Enhancement	Teams webinars may now utilize coaching slots	Coaching functionality has been extended to Teams webinar events, enabling the creation and usage of Teams Coaching slots. Please see the Teams feature guide for more information. Coaching functionality was already supported via the WebEx, Adobe Connect, and Zoom modules.	8.5
CORE-8173	-	OPCM > Events & Activities > Webinars > Select a Zoom Event > Classes > Sessions > Select a Session > Enrollment > Check Zoom Participants	No	Enhancement	OPZoom integration now attempts to match guest data to OPLS users	OnPoint's Zoom integration has been updated to attempt to match data for session guests to users in the OPLS. The system first checks for a matching Zoom ID value, and if that is not found it will check for a matching email address and finally name. Customer admins may still need to confirm these matches from the session in OPCM.	8.5
CORE-8766	-	OPCM > Events & Activities > Reports > Report #1512	Yes	Enhancement	New report #1512 for event session group reporting	A new report #1512 "Event Session Group Test Answer Analysis for All Questions" has been created. This report has the same functionality of report 1415 "Test Answer Analysis for All Questions - Multi Select", except it is targeted at event session groups and so only includes groups of that type for selection.	8.5.7
CORE-8767	-	OPCM > Events & Activities > Reports > Report #1511	Yes	Enhancement	New report #1511 for event session group reporting	A new report #1511 "Event Session Group Test Answer Response Comparison" has been created. This report has the same functionality of report 1501 "Test Answer Response Comparison", except it is targeted at event session groups and so only includes groups of that type for selection.	8.5.7
CORE-8177	-	OPCM > Skills & Games > Skill Profiles or Curriculums> Select an object > Sharing	Yes	Enhancement	Content Sharing functionality extended to Skill Profiles and Curriculums	Content Sharing functionality has been extended to include Skill Profiles and Curriculums. If the Content Sharing module is enabled, admins will be able to share those object types to other slices on the same server. Doing so automatically shares all objects with the Skill Profile or Curriculum as well. As of the 8.5 release, only Skill Profiles and Curriculums containing Courses, Nuggets, and Assessment Sets may be shared; sharing is blocked for any containing Events or Activities. Sharing Events and Activities will be enabled as part of the 8.6 release, including as part of a Skill Profile or Curriculum. Please see the Content Sharing feature guide for more information.	8.5
CORE-8185, CORE-8186	-	OPCM > Skills & Games > Skill Profiles > Recertify > Version	Yes	Enhancement	Version numbering added to Skill Profiles and Curriculums	Object version numbers and notes have been added to Skill Profiles and Curriculums in OPCM. This allows an admin to track changes to Skill Profiles and Curriculums over time, and the version numbers helps facilitates the sharing of Skill Profiles and Curriculums between slices.	8.5
CORE-8448	OPCM > Skills & Games > Reports > Report # 1367	-	Yes	Enhancement	New Custom Skill Profile / Curriculum report	A new custom report has been created called Curriculum / Skill Profile Status Report by Group Report #1367 that shows the status of skill profiles or curriculums in the selected time frame and membership with the ability to limit the skill profile / curriculum list in the filter by defined validated responses for skill profile custom 5.	8.5.1
EPICS-222	OPCM > Administration > Configuration > Customer > Adobe Connect Settings	OPCM > Events & Activities > Webinars/Event Session Wizard > Select Event > Create an Adobe Connect session	No	Enhancement	Support for utilizing Adobe Connect meeting templates for new sessions	The Adobe Connect webinar integration has been updated to support meeting templates, pulling in established templates from the configured Adobe Connect account and allowing them to be used as a base for new sessions in the OPLS. Please see the Adobe Connect documentation for additional information on how to create and manage templates.	8.5
CORE-8121, CORE-8122	OPCM > Administration > Configuration > Customer > Zoom Settings	-	Yes	Enhancement	Zoom integration updated to support additional user creation configuration	The OnPoint Zoom integration has been updated to support an additional "Create Zoom Accounts" configuration. This configuration controls whether free accounts are created within the Zoom system for users who join a Zoom webinar session and who lack a Zoom account within the configured Zoom tenant. Please see the Zoom feature guide for additional information.	8.5
CORE-8407	OPCM > Administration > Configuration > Customer > CellCast	Shared CellCast App	Yes	Enhancement	New customer configuration for shared device SSO login	A new customer configuration has been added for whether shared devices should utilize SSO or passwords to authenticate individual users. This allows for controlling whether shared device users can authenticate differently than individual device users.	8.5
CORE-8067, CORE-8073	OPCM > Administration > Import / Export > Import Data > Import Users	OPCM > Messaging > Monitor Queues	Yes	Enhancement	Additional welcome message options added to user import function	The spreadsheet user import process has been updated with additional welcome message options for the imported users, such as including a registration code, a reset password link, or an account activation link as needed. The login type selected by the admin determines the function of the login links and other options.	8.5

Document Manager (OPDoc)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8245	OPDoc > Administration > Tree Structures	OPDoc > Various	Yes	Enhancement	Admins may now define translations for OPDoc nodes	Admins may now provide translations for OPDoc node titles, with users being shown the translation that matches their Preferred Language, or English if an appropriate translation is not defined.	8.5
CORE-8246, CORE-8247	-	OPDoc > Various	Yes	Enhancement	Language support added for OPDoc items	OPDoc items may now be set with a language, and a language filter has been added to the document lists to allow users to filter for only those documents in their language. The lists are auto-filtered by the user's Preferred Language, but this may be changed by the user.	8.5

User Experience (OPUX)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8093	-	OPUX/Mobile CellCast UIs > Various > Competency Matrix	No	Enhancement	UI support for launching to a user's Competency Matrix view	Support has been added for launching to a user's Competency Matrix view from their custom UI. Custom interfaces will need to be updated to support this functionality.	8.5
CORE-8156	-	OPUX > Custom Interfaces > Various	No	Enhancement	Survey support can now be added to user interfaces	Support has been added for taking surveys for completed content directly from the user interface, without accessing through the OPCV application. This allows for easier indication of which objects have associated surveys, and a more seamless process for accessing and completing them to encourage more users to provide feedback. Custom interfaces will require an update to utilize this functionality.	8.5
CORE-8300, CORE-8301	-	OPUX > Custom Interfaces > Events	No	Enhancement	Support for users to recertify completed events	In situations where users had a No Show and need the option to select a replacement future session, a function can now be included in user interfaces to allow that. Please be aware that doing this effectively removes the user's current attendance status for the event. Please speak to your OnPoint Engagement Manager about a UI update to accommodate for this functionality.	8.5

API Integrations (OPAPI)

Item #	Configuration Area	Functional Area	Testable	Issue Type	Summary	Description	Release Bundle
CORE-8446	-	OPAPI > Welcome Email	No	Enhancement	Provide a new API method to generate the Welcome Email	OPAPI has been updated to provide for a new API method that can be used to generate the Welcome Email for newly created users or those that need to reset their email. The process will generate the established Welcome email with a unique, one-time use link to authenticate the user in and force them to change their password if not using SSO.	8.5.1
