

OnPoint Release v6.5		Jun-17		
Release Notes - Web Version		Bug = feature not working as expected	New Feature = new capability in the system Enhancement = improvement to an existing system feature	Yellow highlight indicates a Feature Guide is being written and will be available soon.
Course Manager (OPCM)				
Item #	Location/Functional Area	Type	Summary	Details
LMS-6706	OPCM - Home - Pending Approval - Event Sessions Pending Approval	Enhancement	Adding fields to Events Pending Approval page for location and requested date	Add additional fields to the OPCM Event Registrations Pending Approval page for Location and Requested Date, to provide admins with more information as to the session the user is attempting to sign up for and is awaiting approval for, as well as to show when the user actually made the request to attend that specific Event Session.
LMS-6230	OPCM - User & Groups - Users & Managers - User Details - Memberships	Enhancement	Make recommendations from User's tab	Provide option to make and remove recommendations from user's recommendations tab. In the previous release, you had to go to the object and to the recommendations tab for that object and make the recommendation there. This update allows you to make recommendations from the user's record. Requires custom UI/UX for this release. Will be added to standard portals in v6.7.
LMS-6321	OPCM - Users & Groups - Groups - Recommendations	Enhancement	New option for making recommendations to a group	New tab in OPCM next to Assignments for Recommendations for making recommendations to a group. Recommendations made on this page will persist and be made for all current and future members of that group.
LMS-6544	OPCM - Users & Groups - Users & Managers - User Details - User Actions	Issue	Resetting a user's history makes archived skill profiles active again	Resetting a user's history has been updated to ensure that archived skill profiles are made active again and appear in the user's record. Previously archived skill profiles were left in the user's history when everything else had been reset to Not Attempted.
LMS-6546	OPCM - Users & Groups - Users & Managers - User Details - Assignments	Enhancement	New button to access the recertified event history for a user	Addition of a button to access the recertified history for events that have been recertified for a user. This is accessed from the user's assignments for a specific event in OPCM. Previously we were tracking it but not letting an Admin see it in the User's record; you could only see the most recent recertification.
LMS-6547	OPCM - Users & Groups - Users & Managers - User Details - History	Enhancement	Update User Event Recertification to show all recent data	Update Event Recertification in user's history to show all recent data. Recertified events now list all recertified sessions of a specific event as well as the event title and session date / time. This is connected to the item LMS-6546, just adding it to the History tab.
LMS-6645	OPCM - Users & Groups - Users & Managers - User Details - Assignments	Bug	Test Lock out message should no longer appear past the lock out time	The Lock out message for a test should not appear past the lock out time set in OPCM for that test for that user. The lockout indicator was incorrectly being displayed within Course Manager even when the lock out period had passed.
LMS-6782	OPCM - Users & Groups - Users & Managers - User Details - Assignments - Events	Enhancement	Show additional session info when assigning a user to sessions	Update the view of the available and selected sessions when assigning a user to sessions from within the user's record in OPCM, to show additional session information including duration and location.
LMS-7039	OPCM - Users & Groups - Groups - Add Group	New Feature	New option to auto-create a forum when a group is created	Add new option with an additional checkbox to automatically create a forum when a group is created and associate the new group with that forum.
LMS-7570	OPCM - Users & Groups - Users & Managers - User Details - Assignment Views - Trigger Execution Log	Enhancement	Add log of trigger actions per user	Add in an individual log of fired trigger actions per user; tracks all notifications as well as assignment actions. This enhancement should assist admins in trouble-shooting whether notifications and triggered assignments occurred when a user claims otherwise.
LMS-7196	OPCM - Users & Groups - Groups - Recommendations	Bug	"Select-all" not working on Recommendation page	"Select-all" not working in Group Skill Profile Recommendation page; corrected.

Item #	Location/Functional Area	Type	Summary	Details
LMS-6601	OPCM - Users & Groups - Users & Managers - Users - Assignments - Event Assignments	Enhancement	New detail added to the Event Assignment - Status area	Added additional detail including Assigned and Completed Date to the User Event Status area of the User's Assignments tab, for informational purposes.
LMS-6561	OPCM - Users & Groups - Users & Managers - Memberships - Location Assignment	Enhancement	Option to remove user's location assignment from their Memberships tab	Add in the ability to remove a user from their location assignment from the user's Memberships tab in OPCM. Useful for customers who do not have an automated import feed -- which would potentially reassign the location back to the user the next day.
LMS-6702	OPCM - Users & Groups - Groups - Information Tab - Login Action	New Feature	Specify a 'next login' setting for a group of users	Add in the ability to set a forced "Login Action" for all users in a specified group for their next login. The options include Change password, Show My Profile Launch, and Present OPFX Form.
LMS-7497	OPCM - Users & Groups - Users & Managers - User - Information Tab - Assignment Views on action bar	Bug	Corrected certificate display whenever two share the same name	Correction made to OPCM and OPFM displays of earned certificates to ensure that the correct certificate is shown if there are two certificates that share the same name.
LMS-7509	OPCM - Users & Groups - Users & Managers - Assignments - Status	Enhancement	Changing the status of a user assignment should update the completion status of an associated Skill Profile	Manually changing the status of an assignment in a user's record should review the status of any associated Skill Profiles or Curriculums for that user to determine if the user is now complete for that Skill Profile or Curriculum.
LMS-6881	OPCM - Users & Groups - Users & Managers - Test Scores - User Survey Results	Bug	Showing User ID instead of Survey ID under User Survey Results	Showing User ID instead of Survey ID under User Survey Results in Users' Test Scores page; corrected.
LMS-7496	OPCM - Users & Groups - Users & Managers - Information tab - Assignment Views action button - User Certificates	Bug	Update the view of recertified certificates to ensure the proper data is included	Update the view of legacy recertified certificates to ensure that the proper object data is input into the certificate when launched from the Certificates listing for a specified user.
LMS-6938	OPCM - Users & Groups - Users & Managers - Assignments - Event Assignments	Enhancement	Update the User Event Status Page to properly show Linked Event Sessions when assigning users to event sessions.	Update the User Event Status Page to properly show Linked Event Sessions when assigning users to event sessions; previously we were not displaying this information because we were not able to take attendance separately for the linked session.
LMS-7571	OPCM - Users & Groups - Groups - Group Detail - Assignments - Assign Users	Enhancement	Assign members of other group(s) to a selected group	Update the Group Assignment page to allow for assigning members of other group(s) to the selected group. The filter will support the selection of other group(s) to be assigned, but just the current members of those groups, at the time of the action, will be assigned to the selected group. Newly added members of those other groups moving forward would not be auto-assigned to the selected group unless an additional action is taken.
LMS-6712	OPCM - Users & Groups - Users & Managers - Assignments Views action button	Enhancement	Print option added to Assignment Status and Competency Matrix	A new print option has been added to the Assignment Status and Competency Matrix (both views) of the User record in OPCM/OPFM
LMS-7520	OPCM - Content - Object - Triggers	Enhancement	Assignment triggers have been updated to include objects with specific key and param combinations	As part of the addition of Param values at the object level, all assignment triggers have been updated to allow for making assignments based on objects with specific key and param combinations as the params for those objects. Standard rules of access and assignment apply (approval, catalogs, etc.) Parameters need to be enabled.
LMS-6774	OPCM - Content - Nuggets	Enhancement	Add a breadcrumb to the Nugget creation process	Add in the expected breadcrumb navigation to the Nugget creation process so that an admin can navigate back to the nugget from a page within the nugget.
LMS-7153	OPCM - Content - Courses - Assignments - Page	Bug	Corrected navigation issue when accessing an Asset then returning to a Page	Drilling into a Course Asset then returning to the Page level causes the 'Course' back button to disappear; corrected.
LMS-7152	OPCM - Content - Assets	Bug	Selecting 'Refresh' at Asset level causes back buttons to disappear	Selecting 'Refresh' at Asset level causes 'Page' and 'Nugget' back-buttons to disappear, corrected.

Item #	Location/Functional Area	Type	Summary	Details
LMS-5543	OPCM - Content - Nuggets	New Feature	Added support for ePUB 3	Publishing a nugget now publishes ePUB 3 in addition to 1 and 2, in the format that is necessary for proper display.
LMS-7041	OPCM - Content - Wizards - Content Wizard	New Feature	Added support for URL(HTML-type) Nuggets via the Content Wizard	An additional option in the Content Wizard has been added to support the upload and creation of URL(HTML) Nuggets. Creation of a URL/HTML-type nugget will create an auto-launch HTML file (auto creates the Page and the Asset) that directs to the specified url. This url nugget is supported on mobile as well as portal and will open the nugget page to the specified url.
LMS-4512	OPCM - Content - Wizards - Content Wizard	New Feature	Add xAPI Course type to the Wizard	Addition to the Standard Course Wizard to allow for the guided creation of an xAPI course.
LMS-6555	OPCM - Content - Wizards - Content Wizard	Enhancement	Update the Content Wizard to remove assignment types no longer utilized and streamline the video format options	Updates to the Content Wizard to remove assignment types no longer utilized such as Flash (zip package) as well as the mobile course template downloads. In addition, the flow for video nuggets has been streamlined to the video formats and types more typically used.
LMS-6801	OPCM - Content - Wizards - Assessment Wizard & Assessments - Tests - Test Wizard Button	Enhancement	Update the Assessment Wizard to show required fields	Update the Assessment Wizard to properly indicate required fields and alert when those fields are not filled in.
LMS-6758	OPCM - Assessments - Tests - Advanced	Enhancement	The Question Sets field has been restricted to a maximum of 10	Question Pools have been limited to 10 pools per test. Previously, the drop down could be overwritten to allow for typing in a number above 10, but this was not supported in the display of the question pools.
LMS-6800	OPCM - Assessments - Tests and also Events & Activities - Activities	Bug	Update the Test and Activity list pages to have consistent styling	Update the Test list and Activity list pages to have the same styling as other similar areas in OPCM.
LMS-7501	OPCM-Assessments-Tests and also Questions	New Feature	New Parameter values at the Question and Test level	New "Parameter" values have been added at the Question and Test levels to assist with managing UI displays and provide more granular system analytics and tracking.
LMS-6437	OPCM - Various Test views	Bug	Archived tests incorrectly displaying score as "0"	Test Score of archived test information incorrectly displays the test score as "0"; corrected.
LMS-6739	OPCM - Assessments - Questions	Bug	Correct issue blocking "Inactive" questions from being accessed	Corrected an issue that was preventing "Inactive" questions from being selected or accessed from within OPCM.
LMS-7385	OPCM - Assessments - Performance	New Feature	New Performance Evaluation module that includes a Performance Form and routing	Creation of a new Performance Evaluation add-on module that leverages a customizable performance evaluation form and routing options. This is an optional add-on module (call for pricing).
LMS-7458	OPCM - Assessments - Performance Forms - Form Files	Enhancement	Associate multiple "form" files to a Form, one for each assigned language	Support has been created as part of the Form process to allow for the association of multiple "form" files to a Form, one for each assigned language. When the form is launched, the form specific to the user's preferred language is presented.
LMS-6693	OPCM - Assessments	New Feature	New Polling functionality	New Polling functionality has been added to allow for a new test type "Poll" that can be created in Course Manager and assigned to groups of users. Polls are then launched by a portlet linked to from a Custom Portal. Managers and Instructors can access this portlet to select and launch polls to their managed groups, and view/display the results. Users access a poll via a link on their Custom Portal, a deep link in an email, or via a provided QR code. Polls are not "assigned" content so they do not appear in a user's assignment lists.
LMS-6317	OPCM - Events - Triggers	Enhancement	Remove substitution values for event session triggers	Remove unnecessary substitution values for event session triggers (e.g. session ID's, class comments, etc.) that didn't make sense to be selectable.

Item #	Location/Functional Area	Type	Summary	Details
LMS-6891	OPCM - Events & Activities - Events - Event Session - Enrollment	Enhancement	Update Event Session Detail to provide End time field along with duration	Update Event Session Detail to provide End time field along with duration; either one will auto-calculate the other value.
LMS-6864	OPCM - Events & Activities - Webinars - Event Session	Enhancement	Update WebEx and Adobe Connect Sessions to provide an additional Config for participant time to completion	Update WebEx and Adobe Connect Session creation to provide an additional Config for participant time to completion. This value is set at each Webinar Session by an OnPoint Admin and is used by the participation process to mark a user as attended for the Webinar if the participation information returned from WebEx or Adobe Connect indicates that the user spent enough time based on this new value and the session duration.
LMS-6963	OPCM - Events & Activities - Events - Event Session - Enrollment	Enhancement	Capture a reason when removing a user from an event session	Updates have been made to force the capture of a reason when an admin is removing a user from an event session from within the enrollment pages of the Event session. This reason can be categorized as "personal" or "business" and configuration values determine whether "personal" allows for a comment as to why the user was removed. This setting is established under Administration - Configuration - Course Manager, and is a global setting only (i.e. once it is set, it applies to all sessions).
LMS-7040	OPCM - Events & Activities - Events - Event Session Creation	New Feature	New option to auto-create a forum when an event session group is created	Add additional option to the Event Session creation process to automatically create and associate a forum with an event session group. Note: you cannot create a Forum unless you are also creating a Group.
LMS-6897	OPCM - Events & Activities - Events - Event Session - Enrollment	Enhancement	Add list of users withdrawn from sessions on the event session enrollment page	Create a new function to record an "audit trail" of users withdrawn from event sessions. The list of Removed users is captured in the Event Session History and also displayed at the bottom of the Enrollment Session Enrollment page - information area to indicate the "Removed Users" and any applicable reasons.
LMS-6954	OPCM - Events & Activities - ILT - Classes tab - select user - Class Sessions	Enhancement	Update the User Class Schedule Page to show Linked Sessions	Update the User Class Schedule Page to show Linked Sessions; previously we did not display linked sessions.
LMS-6501	OPCM - Events & Activities - Instructor-Led and Webinars - Triggers	New Feature	New Triggers to message users removed from the Waitlist of an Event session - Event-Session-Closed & Removed-From-Waitlist"	A new Trigger action has been created to be fired when a user is removed from the Waitlist of a specific event session when that event's registration period has closed or the event session has started. This message would be used to alert the user that they did not get a seat in the requested event session and that they should select another session.
LMS-7226	OPCM - Events & Activities - Instructor-Led or Webinars - Triggers	New Feature	Support for triggered assignments that occur before an event session start date	Add in assignment rules to Event Session - Triggered Assignments to allow for the creation of triggered assignments <i>before</i> an event session start date. For example, the ability to make an assignment of an eLearning course to a group two weeks before an event session starts.
LMS-7230	OPCM - Events & Activities - ILT or Webinar - Triggers - Trigger Actions	New Feature	New event trigger to send an email to users assigned to an event but missing a session selection	Creation of a new event trigger action called 'No Assigned Event Session' designed to send an email to users when the user is assigned to the event but has not selected a session to attend. If a user is missing session assignments to any class within the event, after x number of days from assignment, send reminder notification.
LMS-6711	OPCM - Events & Activities - Event Locations	Enhancement	Add Event Location status of Inactive	Add in the ability to mark an Event Location as "Inactive" to preserve the connection to the event session, but prevent the display of that event session location to users and admins. For example, you no longer offer training at the Marriott-New Orleans. Instead of having to delete that location, you set it as Inactive, so that for any training that was held at that location, the historical detail is retained, but the location is removed from selection lists moving forward.
LMS-6805	OPCM - Events & Activities - Various Pages	Enhancement	Update page breadcrumbs	Update page breadcrumbs to have the same structure in missed locations.

Item #	Location/Functional Area	Type	Summary	Details
LMS-7512	OPCM - Events & Activities - Instructor-Led or Webinars - Classes - Event Class Session Edit	Enhancement	When deleting an Event Class, alert the admin and indicate any associated sessions	Updates have been made to the process of deleting an Event Class that alert the admin that they are attempting to delete a class of an event and whether there are any sessions associated with the class being deleted.
LMS-6946	OPCM - Events & Activities - ILT - Session Edit	Bug	Event Session calendar selector is partially hidden by the top menu	The Event Session calendar selector shown when creating a new session of an event was being partially hidden by the top menu in certain situations. This has been corrected so that the calendar appears on top of the menu when selected.
LMS-7461	OPCM - Events & Activities - Activity Completion, or from Home Page - Activities Pending Completion	Issue	Show all 20 user custom fields on the Activity Completion page	When an Admin is checking the Activities Pending Completion list, they can access a user information pop-up that provides additional detail about the user (populated from the user's information tab), to assist the Admin. This pop-up previously included 10 user custom fields, and has now been updated to show all 20 user custom fields if they have been defined for the customer.
LMS-7277	OPCM - Events & Activities - Events - Event Session Creation	New Feature	Auto-create a Catalog for an event session group	Add new option to the Event Session creation process to automatically create and associate a Catalog with an event session group
LMS-6740	OPCM - Events & Activities - ILT or Webinars - Classes - Sessions	Enhancement	Add duration field at the session level of an event	Updates have been made to allow for the tracking of the duration at each individual session within an event. Event Sessions inherit the duration of the class, but can have that duration edited independently for each session. The duration and end time of the session work in unison and are updated automatically when one or the other is changed.
LMS-7011	OPCM - Events & Activities - Webinars	Enhancement	New field at the Event level for defining the Adobe Connect Folder to combine all sessions of this event into	Provide a new field at the Event level for defining the Adobe Connect folder to create all sessions of this event in when passed to Adobe Connect. This is currently being done utilizing custom1 at the event level for Adobe Connect Events. This field is only present for Adobe Connect Webinars and will obviate the need for using Custom field values.
LMS-7369	OPCM - Events & Activities - Master Event Calendar	Enhancement	Master Calendar now auto-updates the Timezone filter	The Event Master Calendar in OPCM now auto-updates the Timezone filter based on your selection from the location filter.
LMS-5672	OPCM - select an object - Triggers - Add Notification or Add Assignment/ Recommendation	New Feature	New Trigger option to record a trigger action in the LRS when the action occurs	All standard and object-level triggers have been updated to allow an additional option "Send to LRS" to record a trigger action in the LRS when the action occurs. All trigger actions have a standard verb / statement combination for each trigger at this time. A mapping of these verb / statement combinations are included in the referenced documentation.
LMS-7456	OPCM - all key object classes - Information tab - action bar	New Feature	New object-level parameter fields added to support UI content groupings, business rule logic, or reporting/analytics.	A new set of fields called "Parameters" have been added for all object classes to allow for specific pairs of values to be associated with specific objects, to be utilized by separate processes or from the UI for groupings of content. These "params" can be accessed on the information tab of each object. "Keys" are defined by OnPoint; Admins can add "Values".
LMS-6799	OPCM - All Object List Pages	Bug	Update the spelling of "Inactive" in icon legend	Correct misspelling of "Inactive" in list views icon legend at the bottom of the page.
LMS-7007	OPCM - key assignable object classes - Assignments - Users - Assign	Enhancement	Modify the user assignments page to separate user and group assignments	Modify the user assignments page in all objects to separate user and group assignments with separate tabs in the available columns.
LMS-6942	OPCM - key assignable object classes - Assignments - Users - Recommended display	Bug	Corrected Recommended count on object's Assignments tab	On the Assignments tab of any object, the number of users recommended to the object was not correctly updating to reflect the correct number of recommended users. Corrected.
LMS-7502	OPCM - Objects - Triggers - Add Assignment	New Feature	New assignment-level custom trigger utilizing parameter values	Creation of a new assignment-level custom trigger action utilizing opux_param values. The trigger action allows for assignments to be made to the user of other objects with a specified param / key combination. An example of this is the use of a parameter value in order to auto assign the user to a cohort pre- and post-event webinar.

Item #	Location/Functional Area	Type	Summary	Details
LMS-7562	OPCM - Objects - Triggers - Add Assignment	New Feature	Assign users to a group via a trigger action	Add an option to triggered assignments to be able to assign users to a specific group based on the trigger action. An example of this is the ability to assign all users who successfully complete course ID 1234 to the group ID 5678.
LMS-7076	OPCM - Notifications - Forums - Content	Enhancement	Add ability to search the contents of a Forum	Add an option when reviewing a specific Forum to search that forum's contents for specific words or phrases. This is specific to OPCM review of the Forum entries.
LMS-6790	OPCM - Notifications - Email Queue	Issue	Email queue filter resets to default	Email queue filter resets to default when moving between results pages; corrected to retain the filter selection between the pages until you navigate away from the page.
LMS-6894	OPCM - Notifications - Standard Notifications	Issue	Standard notification modal windows were opening too large	Corrected an issue where Standard notification modal windows were opening too large on smaller height monitors. The window should appear within the available space without overflow; corrected. This does not refer to regular Announcements/ Notifications, which did not have this issue.
LMS-6918	OPCM - Skills & Games - Skill Profiles - Assignments - Assigned Objects	Enhancement	New option to control the skill profile update function based on the original assignment date	Add option to specify when an assignment to a Skill Profile or a Curriculum should only be made to those users that were assigned to the Skill Profile or Curriculum before a specified date.
LMS-7341	OPCM - Skills & Games - Skill Profiles - Assignment - Assign/Sequence - Filter	Bug	Set 'Enter' to function the same as 'Apply' for Skill Profile search	The 'Enter' key should function the same as 'Apply' for Skill Profile search fields on the Skill Profile List in OPCM.
LMS-6987	OPCM - Skills & Games - Skill Profiles - Assignments Tab - Assigned Objects	Enhancement	Change the "Assign Before" and "Assign After" text to past tense	Update the language in OPCM to change the text of "Assign Before" and "Assign After" to be past tense -- "Assigned Before" and "Assigned After"-- to clarify that the item within that skill profile will only be assigned to users (already assigned to the skill profile) before/after a certain specified date.
LMS-6369	OPCM - Skills & Games - Skill Profiles / Curriculums - Assignments	New Feature	New option to designate which items in a skill profile or curriculum are required for completion	An additional level of detail has been added to the Skill Profile Assignments to allow for designating which specific items within a skill profile or Curriculum are required for completion of the skill profile / curriculum. The individually set required items cancel out the minimum # of skills to reach completion. These two functions must be used separately from one another.
LMS-6595	OPCM - Skills & Games - Game Profile	Issue	Correct navigation when creating a game	When creating a game, the Admin is taken back to the game list instead of to the game info page. This has been corrected to return the Admin to the Game Profile page of the newly created game upon save, to make it easy to continue editing.
LMS-6828	OPCM - Administration - Audit Trail	Enhancement	Optimize Audit Trail page	Optimize Audit Trail page for faster load time; pagination has been added for efficiency.
LMS-6899	OPCM - Administration - System Administration - Administration Matrix - User Administrative Rights	Enhancement	New setting to allow an Admin to change another user's role	Additional options have been added to the Administrative Matrix to allow for adjusting the administrative rights of individual administrators -- specifically for setting which admins have the ability to affect change to the system roles of users / other admins in the OPLS.
LMS-5995	OPCM - Administration - Manage Reports - OPPM Reports	New Feature	Add a sequencing option to set the display of OPPM reports	A sequencing option has been added to reports that are set to show in OPPM. The list of Reports can now be sequenced from within OPCM - Manage Reports using a set of up/down arrows. This sequence sets the order of the reports when displayed in OPPM for all Performance Managers.
LMS-7223	OPCM - Administration - Portal & Mobile UI - Assigned Groups	Enhancement	New indicator shows the number of users assigned to a UI	The view of the Mobile UI in OPCM has been updated to indicate the number of users that are currently assigned to see each UI.
LMS-7464	OPCM - Administration - Transfer - Transfer Course, Nugget or Assessment Set	Enhancement	Updated the Transfer Assessment utility to retain answer point values	Update to the Transfer Assessment utility as it was not previously transferring the answer point values originally established for a test when that test was then transferred between slices. This update affects tests associated with a Course, Nugget or Assessment Set.

Item #	Location/Functional Area	Type	Summary	Details
LMS-7281	OPCM - Administration - Configuration - Content Viewer -Events	New Feature	New config value to establish how much in advance an instructor can begin taking attendance	An additional customer-level global configuration value called the 'Pre-Event Attendance Start' has been added to allow for setting the amount of time in minutes when an instructor should have access to begin taking attendance for their instructed event sessions.
LMS-7511	OPCM- Administration - Configuration - Content Viewer	Enhancement	New config value to set the window size that OPCV opens from OPPortal or deep links	A configuration value called 'Launch Window Size' has been added to set the size that OPCV windows should be opened to when launched from OPPortal or from deep links. This sizing is limited to a maximum of 90% of the available screen height to ensure users still see the portal behind the window. Portals will need to be updated to utilize the new value, but this can be used to match the deep link window size to that of the portal without further updates.
LMS-6959	OPCM - Administration - Configuration - Course Manager - Events	Enhancement	New config value to define the default start time for event sessions	A new Customer-level configuration value called 'Default Event Session Start Time' has been added to allow for defining the default start time for newly created event sessions.
LMS-5520	OPCM - Administration - File Management - Manage SCORM Files	Enhancement	New area to see, edit, and delete uploaded SCORM course files	Add in a new section under Administration - File Management to see, edit, and delete uploaded SCORM course files. This used to be found under a custom link; we're moving it to a more obvious spot for Admins to locate and manage SCORM packages.
LMS-7434	OPCM - Administration - Configuration - Content Viewer - Skillsoft	Enhancement	Add option to pass a generic user name as a valid credential to Skillsoft	Add a new configuration value that can be used in place of the user name when launching a Skillsoft course. The user first and last name will take on the generic value if one is defined while still passing the unique user id to Skillsoft to keep the records separated. This will prevent user data exposure due to the passing of the user first and last name.
LMS-6640	OPCM - Administration - Display Hierarchy	Enhancement	Add ability to move items directly to top or bottom of display hierarchy	Update Hierarchy to provide option to move an item in a list all the way to the top or bottom with one action versus hitting the up or down arrow button multiple times to change an item's placement in the list.
LMS-7023	OPCM - Administration - Catalogs - Select Catalog - Associated Objects action button - Assigned Skill Profiles/Curriculums	Enhancement	Update the Catalog assignment page to differentiate Skill Profiles from Curriculums	Update the Catalog assignment page to differentiate Skill Profiles from Curriculums in separate sub tabs.
LMS-6905	OPCM - Administration - Configuration - Customer - Content Viewer	Enhancement	Update the IE Compatibility Configuration default value	Update the Default IE Browser Compatibility default value to the lowest common denominator to be supported to prevent incorrect values from being utilized for IE Compatibility values. Pick one value to be the lowest you will support.
LMS-7402	OPCM - Administration - File Management - Manage SCORM Files	Enhancement	New process for updating a SCORM course to ensure a new SCORM asset is created	Improve the process for updating a SCORM course to ensure that a new SCORM asset is created and associated with the Course. This will ensure that significant changes to the SCORM course are properly read and presented to the user. Moved to a new location.
LMS-6695	OPCM - Administration - Configuration - Customer - Options action button - Edit WebEx Settings	Enhancement	New WebEx config values for telephony support and email invitations	Update the WebEx configuration pages to provide additional values for telephony support as well as for whether email invitations should be sent from WebEx as part of the registration process for a WebEx session.
LMS-6804	OPCM - Various	Enhancement	Updates to clear filter button	Update the clear filter button across OPCM to be consistent throughout.
LMS-6855	OPCM - Various	Enhancement	Updates to optimize hierarchical displays	Updates have been made to optimize all hierarchical-style displays (including Org Chart, Locations, Event Locations, Display Hierarchy) to provide faster loading as well as to return the user to where they left off when making selections.
LMS-6985	OPCM - Various	Enhancement	Updates to taxonomy and layout for consistency	Minor updates to taxonomy and layout to bring specific areas more in line with standards.

OPCommon (OPCommon)				
Item #	Location/Functional Area	Type	Summary	Details
LMS-7093	Events & Activities - Webinars - Event Session Creation	Enhancement	Update WebEx calls to include additional info	Update WebEx Createsession calls to include Pre-join Time (or "Open Time" in WebEx) as well as session Duration. We now pass this information over to WebEx.
LMS-7455	Events & Activities - Events - Event Session Enrollment	Bug	Event Auto-Assign not working correctly	Auto-Assign not working if next Class and Available Session are < 4-5 hours from when the last Session they were assigned ends; corrected.
LMS-7482	op-common - Events	Enhancement	Update to block notifications for past sessions	Update Event-Session-Changed logic to block notifications from being sent for past sessions.
LMS-7001	opcommon - Events - Webinars	Enhancement	Additional checks to review participation information from Adobe Connect and mark corresponding attendance	Add in additional checks to review Participation information from Adobe Connect and mark attendees as attended and assign those that have participation information but were not previously assigned to the event session if there is a match with their login or email address.
LMS-7050	opcommon - Events - Webinars	Bug	Correct error encountered if a user had a dash in their name	An error was encountered when joining an Adobe Connect session if a user had a dash (-) in their first or last name; corrected.
LMS-7002	opcommon - Events - Webinars	Bug	Correct error encountered if the user had a space in their name	An error was encountered when joining an Adobe Connect session if the user had a space in their name; corrected.
Content Viewer (OPCV)				
Item #	Location/Functional Area	Type	Summary	Details
LMS-6293	OPCV - Courses - Nuggets	Bug	Properly show Document Inline assets in nuggets	Correction to OPCV to properly show Document Inline assets in nuggets. These were previously not working.
LMS-7404	OPCV - Courses	Update	Show the Required value in the course assignment list in a different color	Correction to show the Required value in the course assignment list in OPCV in a different color than the Optional value as was the case in previous releases.
LMS-2963	OPCV - Courses - Search	Bug	Update search to properly look at title, description, and meta tags	Update the standard OPCV search to properly search using title, description, and meta tags.
LMS-7380	OPCV - Courses - Category	New Feature	Hide Categories not marked user-viewable	Utilize the new 'User Viewable' flag at the Category level to hide any category from the available category dropdowns that is not marked viewable by users.
LMS-7422	OPCV - Courses (Assignments)	Bug	Display the correct test score attempt on the Course Info page	Correction to the Course info page to make sure that the correct test attempt is displayed for the previous test attempt(s).
LMS-7423	OPCV - Courses - Assessment Sets	Bug	Display the correct test attempt on the Test Set info page	Correction to the Test Set info page to make sure that the correct test attempt is displayed for the previous test attempt(s).
LMS-6683	OPCV - Content Access	New Feature	Deep link into a Test from an email	Added in the ability to deep link into a testset from a link in an email. Admins can use the provided deep link URL to prompt the user to log in and then launch to the test set detail page. This type of deep link was previously only available for Courses and Nuggets.
LMS-6822	OPCV - SCORM Access	Enhancement	Update SCORM player to not show multi sco nav if only one SCO	Update OPCV SCORM player to not show multi sco nav if only one SCO. SCORM courses that are multi-sco use a left menu navigation area, but that is not needed for single sco courses, so now when a single sco course is launched, that left menu area is removed to improve the look of the page.
LMS-7513	OPCV - Content Access from Deep Link	Enhancement	Launching OPCV from deep links must adhere to defined launch size	Launching OPCV from deep links must adhere to the defined OPCV launch size. This ensures that the OPCV deep links open the OPCV window to the same size as specified for OPPortal to launch OPCV, versus adhering to a hard-coded size as previously done.
LMS-7389	OPCV - Content playback	Enhancement	Storyline-created xAPI courses were using an alternative launch method that needed to be supported	An issue in implementation was discovered specifically with Storyline-created xAPI courses where an alternative method of launching was being used by these courses that needed to be allowed based on the xAPI standard.

Item #	Location/Functional Area	Type	Summary	Details
LMS-6704	OPCV - Nugget exit	Enhancement	Prompt the user to rate a nugget	The nugget exit process has been updated to pop up a message to ask the user to optionally rate the nugget when they exit the nugget, if ratings are turned on. Ratings will be added to the Ratings/Comments tab in OPCV, where they can also access that tab to add optional Comments.
LMS-6746	OPCV - Activities	Enhancement	Expand an Activity when launched from Custom Portal	Automatically expand a specified activity ID in an Activities list when an activity is launched from the Custom Portal. Previously, if an Activity was selected from an assignments list, the user was presented a list of activities where they had to find the specific activity again. Now, if selected, the Activity will open in the list, and stay in focus.
LMS-6762	OPCV - Events -Event Locations	Enhancement	Add Inactive status for Event Locations	A new Status value has been added to the Event Locations to enable an admin to make an event location "Inactive" and it will then no longer appear in the location list for users.
LMS-6999	OPCV - Events / Events Calendar	Enhancement	Update Event Sessions to display the Duration as found at the session level	Update all Event Session displays to show the Duration as found at the Event Session level. Previously the duration was set at the class level and applied to the sessions in that class. The duration at the session level can be manipulated separately for each session and also includes and is adjusted in unison with the Session End time.
LMS-6957	OPCV - Games Tab	Bug	Correct the display of Game Details for users with archived items	Correction to the display of the Game Details for users with archived items. Archived Assignments in a game were incorrectly showing as "Unassigned" in the Game Details page in OPCV. Now shows as "Archived".
LMS-6875	OPCV - My Status - Competency Matrix	Enhancement	Create separate Curriculums section for Competency Matrix	Create separate Curriculums section for OPCV Competency Matrix to mimic OPCM Competency Matrix view of skill profiles and curriculums.
LMS-7166	OPCV - My Status - Assignment Status / Competency Matrix	Bug	Showing test scores to users when the test was set to not display test scores	OPCV was incorrectly showing test scores to users when the test was specifically set to not display test scores. At end of test, it was correctly hiding the score, but user could still see it under My Status; corrected.
LMS-6876	OPCV - My Status - Competency Matrix	Enhancement	Update the Competency Matrix to show the item detail within a Curriculum	Update the Competency Matrix in a user's record to show the items within a Curriculum in the view of a user's assignments, to ensure that if there is a skill profile inside the Curriculum, its detail is displayed properly.
LMS-7278	OPCV - Various filters	Enhancement	Update 'All' in pull-down menus to use key phrase	Update 'All' in OPCV pull-down menus to use key phrase in language file. This allows OnPoint to show this word in multiple languages.
LMS-6728	OPCV - Notifications - Forums	Bug	Add the header info to the Forum Digest emails	Correct an issue in the Forum Digest emails where the header information was not added to the triggered email notifications.
LMS-6459	OPCV - Event Attendance / Instructor	New Feature	Allow Event Coordinators access to the Event Attendance Page	Allow Event Coordinators access to the Event Attendance Page for event sessions they are directly coordinating and for sessions of events where they are set to be the coordinator for the entire Event -- to be able to take attendance as well as access and review session notes etc. similarly to what users set to Instructors in OPCM can do. Requires Custom UX to set the access rights.
LMS-7063	OPCV - Event Attendance / Instructor	Enhancement	Show linked event sessions on Event Instructor Calendar	Show linked event sessions on Event Instructor Calendar so that Instructors can see the main session and any linked sessions in order to take attendance.
OP-Portal (OPPORTAL)				
Item #	Location/Functional Area	Type	Summary	Details
LMS-7425	OPPortal - Admin managed portlets	Bug	Accommodate thumbnails and other images within news articles	Correct an issue in the News Portlet administration to allow for the upload of a thumbnail and other images to be referenced from within the news articles.
LMS-6983	OPPortal - Various	Enhancement	Update timeouts to align with OPCV settings	Update OPPortal to utilize and adhere to standard OPCV timeouts and session refresh functions.

Item #	Location/Functional Area	Type	Summary	Details
GW-1066	OP-Portal - Custom UI	Bug	Correct notification info passed to the Custom Portal that was marked for email only	Correction to notification information passed to the Custom Portal to ensure that notifications set to Not send the notification to the Portal and to only send via email are properly not shown in the Custom Portal. The default setting will still check to have the notification sent to Portal, but it can be unchecked.
GW-1082	OP-Portal - Custom UI	Bug	Ensure item name is included in prereq info	Correction to OPUX methods to ensure that the item name is properly included in the prerequisite information for assignments with prereqs.
LMS-7395	OPPortal Login	Enhancement	Speed up standard logins as well as SSO logins	Optimizations have been made to the OPPortal login process to speed up the process for standard login as well as SSO logins.
LMS-5701	Custom UI (OPUX)	Enhancement	Deep link into a specific object's certificate	Provide ability to deep link into the certificate for a specific object. The implementation of this is to provide a method to launch to a specific certificate directly from the Custom UI assignment lists. This is to align with existing functionality in OPCV-Courses tab which provides a clickable icon to view an earned Certificate.
LMS-6893	Custom UI (OPUX)	Enhancement	Provide Webinar times in user's timezone	Update OPUX Event Session calls to provide Webinar times in user's timezone. This corrects the display of an event session's start time to show in the proper time and timezone relative to the user's timezone.
GW-1090	Custom UI (OPUX)	Enhancement	Updates to the Login and authentication process to end timed-out sessions	Updates to the Login and authentication process to ensure that old sessions of OPPortal and OPUX cannot request data once timed out.
GW-1065	Custom UI (OPUX)	New Feature	New option to launch polls	A new portlet called OP-Poll is available to be launched from a custom portal, to open and show polls available to the manager or admin. Polls can be associated with specific Event Session groups such as in the case of an ILT class, or for any regularly managed groups. Polls are created in OPCM and associated with groups by an Administrator. The act of starting a poll and viewing/showing results occurs in the OP-Poll portlet launched from a link in a custom UI. Users do not see "assigned" polls in their normal assignment lists; they have to be provided access to them via their portal interface or from a link (or QR code) where they can launch a poll from.
GW-1048	Custom UI (OPUX)	Enhancement	Items not assigned but "available" in Custom UI now support the Requires Approval setting	In custom interfaces, items that are "available" to the user that are not assigned can now support a Requires Approval value set in OPCM. Previously, only the standard portals supported a Requires Approval launch option, that if set, prevents the item from being launched until approval has been granted.
GW-1064	Custom UI (OPUX)	New Feature	New option to apply a Start and End action for an event session	Custom Portals now have the option to include a Start and End concept for event session instructors to arbitrarily "Start" or "End" an event session; these actions drive related triggers pre-established at the Event Session level. New trigger actions have been created to support these (as described in the OPCM section above).
GW-992	CellCast - mobile gateway	Enhancement	Custom fields now passed to Mobile	All defined object-based custom fields are now passed to the Mobile UI for both assigned and available content. These values can be utilized by the UI for sorting and filtering requests.
GW-863	CellCast	Bug	Update hierarchy info sent to mobile apps to properly restrict events by catalogs	Correction to the hierarchy information sent to the mobile apps to ensure that events were properly restricted by the user's available catalogs if appropriate.
Performance Manager (OPPM)				
Item #	Location/Functional Area	Type	Summary	Details
LMS-7508	OPPM - User Details - Assignments	New Feature	New value to control whether a Group Manager can archive an assignment for a user	A new Configuration parameter has been added that allows for the control of whether or not a Group Manager in OPPM has the ability to archive an assignment for a managed user.
LMS-6783	OPPM - User Details - Assignments - Events	Enhancement	Added info to the sessions view when assigning a user	Update the view of the available and selected sessions when assigning a user to sessions from within the user's record in OPPM, including detail for Duration and Location.

Item #	Location/Functional Area	Type	Summary	Details
LMS-6781	OPPM - User Details	Enhancement	New default setting to display users, managers, or both in list display	A new configuration value has been added to control whether users, managers, or both are selected by default when logging into OPPM. This allows for managers and users to be automatically shown / selected when a PM is first logging into OPPM.
LMS-7189	OPPM - User Details - Memberships	Enhancement	Show a user's Event Location preference under Memberships	Add a section in the user's Memberships in OPPM to show the user's Event Location Preference.
LMS-7498	OPPM - Users Details - Certificates	Bug	Correct display of certificates when two share the same name	Correction made to OPCM and OPPM displays of earned certificates to ensure that the correct certificate is shown if there are two certificates that share the same name.
LMS-7047	OPPM - Users Details - Add User Wizard	Bug	Update the add user wizard to check if the user's login already exists	Correction to the user wizard process in OPPM as it was previously not checking to see if the user being created had a login that already existed in the OPLS. This was allowing a PM to create a duplicate user.
LMS-6863	OPPM - User Details - Information tab	Enhancement	Added Failed Login info and Clear function	Added Failed Login info and Clear function to user record in OPPM. Allows PM to see the number of failed attempts and easily clear them as needed.
LMS-7280	OPPM - User Details - Information tab	Enhancement	Update the user's group assignments when their record is edited and the status is changed from inactive to active	The OPPM user edit functions have been updated to evaluate a user's group assignments when a user is made active from previously being inactive by a PM. This checks that the current assignments made to user's groups are assigned to the user when they become active via OPPM. Replicating the action from what is already in OPCM. This can change the user's assignments to reflect those they should have based on their group memberships.
LMS-6779	OPPM - User Details - Options - Login Actions	New Feature	Add Custom Form to User Login action options	Update the User Login actions in OPPM to allow for a Performance Manager to set that a user should be presented with a custom Form on their next login. This choice is being added to the other existing actions (introduced in v6.1) at next login: Change Password and show My Profile. This option would trump any prior setting made in OPCM.
LMS-6703	OPPM - Groups	New Feature	Set the "next login" action for all users in a specified group	Add in the ability to set the "login" action for all users in a specified managed group for their next login. The login options include "Force Password change", "Force My Profile launch", or "Force Form launch".
LMS-7466	OPPM - Appraisals /Evaluations - Performance Evaluations	New Feature	New Appraisals subtab for accessing Performance Evaluations and assigning and actioning them	As part of the implementation of the Performance Evaluation module, OPPM has been updated to include an additional subtab in Appraisals for accessing available Performance Evaluations and assigning and actioning them for managed users.
LMS-6871	OPPM - Appraisals - Select User	Enhancement	Improve the page view of a user's past appraisals	Update the page view in OPPM to include a listing of all previous attempts of that same appraisal taken for that user. Under the Appraisals tab, select the appraisal, then in your list of managed users, if a user has taken that appraisal before, there will be a 'View' link to see all historical attempts along with any achieved scores for appraisals that were actually created as Tests and therefore gradable.
LMS-7208	OPPM - Events & Activities - Events tab	Enhancement	Optimize Event look-ups	Review and optimize OPPM Event look-ups to be more efficient and attempt to avoid slowdowns when loading the page with a large number of Events.
LMS-7368	OPPM - Events - Master Event Calendar	Enhancement	Update the Timezone filter in the Master Event Calendar to align with the selected location	The Timezone filter in the Master Event Calendar has been updated to adjust according to the selected location if that event location has a defined timezone.
LMS-7397	OPPM - Pending - Events Pending Approval	Enhancement	Add fields to the Events Pending Approval page	Add additional fields to the OPPM Events Pending Approval page for Location and Requested Date to help a Manager determine what the user has requested, and when they requested it.
LMS-7064	OPPM - Events	Enhancement	Update the Master Calendar to show linked sessions	Update the Events Master Calendar in OPPM to show linked event sessions. This helps a PM see what sessions are connected and therefore what dates/times their user will be attending the event.
LMS-7058	OPPM - Events - Master Event Calendar	Enhancement	Update Event Location filters to only show "Active" locations	Update to the Event Location filters in OPPM to only show "Active" locations in the filters. Unlike in OPCM where an Admin may need to see Inactive event locations, there is no need to show these inactive locations to Performance Managers.

Document Manager (OPDOC)				
Item #	Location/Functional Area	Type	Summary	Details
LMS-7356	OPDOC - Search	Bug	Correct issue where OPDOC search was limiting results to documents uploaded by active admin accounts only	An issue was encountered where OPDOC search was incorrectly limiting results to only documents that were uploaded by active admin accounts. Documents uploaded by admins where the admin had become inactive were no longer visible to users when searching. Corrected.
LMS-7026	OPDOC - Search	Feature Change	Remove full text indexing and searching	Remove full text indexing and searching from OPDOC. Legacy search code was only doing a partial job, on a limited number of file types, so results were inconsistent. With new metatags in place, admins can be sure that documents are keyed appropriately. Improved search relevancy logic is planned so that Title, Description and Metatags can be weighted to help ensure useful search results are achieved.
LMS-7085	OPDOC - Upload	Bug	Allow the association of a nugget to a document during the upload process	Associating a nugget to a document during the Upload New Document process was causing an error. This has been corrected and nuggets can now successfully be associated with a document.
LMS-7274	OPDOC - document upload & download	Bug	Ensure new filename can be captured/ shown when uploading/downloading documents	Correction to an issue in OPDOC where downloaded versions of a document did not properly reflect the original naming of the file when uploaded. The downloaded filename was reverting back to the original filename. Corrected.
LMS-7024	OPDOC - Document Upload	Enhancement	Add support for Metatags	Add support for metatags for all supported file types in OPDOC. Tags can be added as a document is added to OPDOC and are utilized in search functions to find appropriate results based on title, description and tags.
LMS-7154	OPDOC - Document List	Bug	Correct the Document count of a node in OPDOC mobile	The Document count at the bottom of a node in OPDOC mobile was incorrect. Corrected.
LMS-6982	OPDOC Timeout	Enhancement	Utilize OPCV settings for timeouts and session refresh functions	Update OPDOC to utilize and adhere to standard OPCV timeouts and session refresh functions.
LMS-7415	OPDOC - Mobile	Enhancement	Create Phrase Key for OPDOC mobile UI 'Back' button	Create Phrase Key for OPDOC mobile UI 'Back' button so it can be language aware
OP Registration (OPREG)				
Item #	Location/Functional Area	Type	Summary	Details
LMS-7392	OPReg - registration page	Enhancement	Add support for the 20 newly added custom fields	Add in support for using the newly added 20 custom fields as part of the available values to be used in the OPReg self registration form.
LMS-7393	OPReg - registration page	Enhancement	Allow for a separate login that is not the user's email	Update made to OPReg self registration process to allow for a separate login that is NOT necessarily the user's email. Previously the email was always used as the user's unique login and login was not allowed as a separate field.
